Model Rules of Professional Conduct -
American Bar Association. House of Delegates
2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical

application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Critical Disability Theory - Richard Francis Devlin 2006

People with disabilities in Canada experience and inhabit a system of deep structural, economic, social, political, legal, and cultural inequality - a regime of dis-citizenship. Despite the widespread belief that Canada is a country of liberty, equality, and inclusion, many persons with disabilities experience social exclusion and marginalization. They are socially constructed as second-class citizens. Critical Disability Theory inquires into the possibilities and parameters of a critical theory of disability. Its essays argue

that accommodating equality for the disabled is not fundamentally a question of medicine or health, nor is it just an issue of sensitivity or compassion. Rather, it is a question of politics, of power and powerlessness. Conventional understandings of disability are dependent upon assumptions that characterize disability as misfortune and by implication privilege the "normal" over the "abnormal." Consequently, it is presumed that societal organization based upon able-bodied and -minded norms is inevitable and the best we can do is show sympathy or pity. This book argues that we need new ways to think about the nature of disability, a new understanding of participatory citizenship that encompasses the disabled, new policies to respond to their needs, and a new vision of their entitlements. Twenty-four scholars from a variety of disciplines come together here to identify the problems with traditional approaches to disability and to provide new directions. The essays range from focused

empirical and experiential studies of different disabilities, to policy analyses, legal interrogations, and philosophical reconsiderations. The result will be of interest to policy makers, professionals, academics, non-governmental organizations, and grass-roots activists.
