**Birthplace of the Atomic
Bomb** - William S. Loring
2019-02-22

It was not Robert Oppenheimer
who built the bomb--it was
engineers, chemists and young
physicists in their twenties,
many not yet having earned a
degree. The first atomic bomb
was originally conceived as a

backup device, a weapon not then currently achievable. The remote Trinity Site--the birthplace of the bomb--was used as a test range for U.S. bombers before the first nuclear device was secretly detonated. After the blast, locals speculated that the flash and rumble were caused by colliding B-29s, while Manhattan Project officials nervously measured high levels of offsite radiation. Drawing on original documents, many recently declassified, the author sheds new light on a pivotal moment in history--now approaching its 75th anniversary--told from the point of view of the men who inaugurated the Atomic Age in the New Mexico desert.

**Methods for Novel
Psychoactive Substance
Analysis** - Marta Concheiro
2022-11-13

This collection provides detailed information on current advances in analytical methods and strategies employed for monitoring and discovering a wide range of novel psychoactive substances (NPS) in clinical and forensic laboratories. The main classes of NPS in terms of prevalence include synthetic cannabinoids, synthetic cathinones, synthetic opioids, and designer or synthetic benzodiazepines, and this book explores selecting the appropriate sample matrix and analytical testing approaches for laboratories faced with NPS drug testing, such as in blood, urine, saliva, and hair. Written for the Methods in Pharmacology and Toxicology series, chapters in this volume feature the kind of detailed implementation advice from the experts that leads to successful results in the lab.

Authoritative and practical, Methods for Novel Psychoactive Substance Analysis serves as an ideal guide for forensic and clinical toxicologists, pharmacologists and chemists in academic and research settings, as well as for private laboratories seeking to increase our ability to test for these substances.

Current Research in African Linguistics - Oluseye Adesola
2015-09-04

Current Research in African Linguistics recognizes and honors Oladele Awobuluyi's contributions to African linguistics. The contributors, an international group of scholars, represent four generations of African linguists who have been influenced by Awobuluyi's work as a scholar and teacher. The papers are organized into three thematic sections, namely applied

linguistics and sociolinguistics; phonology and morphology; and syntax and semantics and their interfaces. The wide range of topics investigated in this volume will enhance the reader's understanding of current issues in the field of African linguistics today. Indeed, the book marks an important contribution to the expanding work on language documentation and comparative linguistics by presenting data and linguistic analysis from a number of different African languages.

The European Higher Education Area - Adrian Curaj
2015-10-12

Bridging the gap between higher education research and policy making was always a challenge, but the recent calls for more evidence-based policies have opened a window of unprecedented opportunity for researchers to bring more contributions to shaping the future of the European Higher Education Area (EHEA). Encouraged by the success of

the 2011 first edition, Romania and Armenia have organised a 2nd edition of the Future of Higher Education - Bologna Process Researchers' Conference (FOHE-BPRC) in November 2014, with the support of the Italian Presidency of the European Union and as part of the official EHEA agenda. Reuniting over 170 researchers from more than 30 countries, the event was a forum to debate the trends and challenges faced by higher education today and look at the future of European cooperation in higher education. The research volumes offer unique insights regarding the state of affairs of European higher education and research, as well as forward-looking policy proposals. More than 50 articles focus on essential themes in higher education: Internationalization of higher education; Financing and governance; Excellence and the diversification of missions; Teaching, learning and student engagement; Equity and the social dimension of higher education;

Education, research and innovation; Quality assurance, The impacts of the Bologna Process on the EHEA and beyond and Evidence-based policies in higher education. "The Bologna process was launched at a time of great optimism about the future of the European project - to which, of course, the reform of higher education across the continent has made a major contribution. Today, for the present, that optimism has faded as economic troubles have accumulated in the Euro-zone, political tensions have been increased on issues such as immigration and armed conflict has broken out in Ukraine. There is clearly a risk that, against this troubled background, the Bologna process itself may falter. There are already signs that it has been downgraded in some countries with evidence of political withdrawal. All the more reason for the voice of higher education researchers to be heard. Since the first conference they have established themselves as

powerful stakeholders in the development of the EHEA, who are helping to maintain the momentum of the Bologna process. Their pivotal role has been strengthened by the second Bucharest conference." Peter Scott, Institute of Education, London (General Rapporteur of the FOHE-BPRC first edition)

**The Education System in
Malawi - World Bank**

2010-02-25

'The Education System in Malawi', an Education Country Status Report (CSR), is a detailed analysis of the current status of the education sector in Malawi, the results of which have been validated by the government of Malawi. Its main purpose is to enable decision makers to orient national policy on the basis of a factual diagnosis of the overall education sector and to provide relevant analytical information for the dialogue between the government and development partners. The analysis incorporates data and information from multiple sources, such as school administrative surveys by the Ministry of Education,

household surveys, and a tracer survey created especially for this study. This CSR, developed by a multi-ministerial national team supported by UNESCO P le de Dakar, the World Bank, and GTZ specialists, updates the previous one drawn up in 2003 and consists of eight chapters, including a chapter on higher education. The analysis provides key monitoring and evaluation inputs for the overall education sector, particularly under the framework of the implementation of the National Education Sector Plan.

Malawi - International Monetary Fund 2012-08-03
The Malawi Growth and Development Strategy II (MGDS-II) is a poverty reduction strategy for the period 2006-11, which is aimed

at fulfilling Malawi's future developmental aspiration—Vision 2020. The strategy identifies broad thematic areas and key priority areas to bring about sustained economic growth. A striking feature of this strategy is that the various governmental organizations, private sector, and general public are equal stakeholders. However, successful implementation of MGDS-II will largely depend on sound macroeconomic management and a stable political environment.
