The Education of Teachers - Gary A. Griffin 1999

This volume addresses persistent issues in the preservice and continuing education of teachers. Attention is focused upon perspectives on teacher education that differ significantly from those that have characterized views of this field in the past. Among developments that provide the current context for teacher education are the movement for standards, the emphasis upon inquiry in the classroom, increased expectations for teachers' participation in curriculum development, constructivism and the cognitive revolution, and professional development schools. These and other matters receive the attention of a distinguished group of scholars and practitioners in the field.

Involving Parents in their Children's Learning - Margy Whalley 2007-07-16

'A unique guide for students, practitioners, parents, and administrators of young children who want to understand specific strategies to maximise parent involvement and collaboration' - Education Libraries 'This is an excellent book that draws extensively on the work of a children's centre that has been running for over 25 years' - SENCO Update Involving Parents in their Children's Learning is the story of the pioneering work of the Pen Green Centre for children and families. Showing how early years practitioners can collaborate effectively with parents, the book includes case studies of parents and children who have attended the centre, studies which chart developments in learning for both children and parents. The book will inspire early years practitioners and offer

them practical advice on ways of developing effective work with parents. Drawing on their work at the renowned Pen Green Centre, the authors show how to: o support parents as their child's first educator o provide practical and psychological support to parents o involve fathers and male carers o share important child development concepts o support and extend children's learning o reach out to hard-to-reach parents. This New Edition follows up on the stories of people featured in the first edition, showing how they have progressed over the last few years. It also includes new chapters covering the headteacher's role in developing parental involvement programmes, how the Pen Green model has been applied in primary schools, and the use of parental diaries. The book is essential reading for students on early years courses (BA, FdA, B.Ed), as well as practising early years professionals and senior management teams in primary schools.

Storymaking is the process of retelling, innovating and creating new stories. Like the best-selling *Jumpstart! Literacy*, this book contains imaginative 'quick-fire' ideas that could be used as creative warm-ups and starters or developed into lessons. There are over 100 provocative and thought-provoking games and

activities, intended to 'jumpstart' storytelling, reading and writing in any Key Stage 1, 2 or 3 classroom. Practical, easy-to-do and vastly entertaining, the 'jumpstarts' will appeal to busy teachers.

Enriching Feedback in the Primary Classroom - Shirley Clarke 2003

Shirley Clarke explains how to make full and effective use of oral and written feedback including marking strategies to promote children's learning in the primary classroom. Marking and other forms of classroom feedback to pupils can actively boost self-esteem, motivate and actively promote learning or it can demoralise and alienate. The ways in which pupils can be involved in and told what is expected of them, how well they are doing and what to do next, and how their efforts are appraised, lie at the heart of effective assessment for learning. Drawing on classroom research, and with a focus on practical issues and examples from across the primary curriculum, this book offers clear strategies for purposeful marking and effective feedback. Shirley Clarke shows how marking and feedback complete the 'learning loop' which starts with clear learning intentions and success criteria. Taking forward core themes developed in her book *Unlocking Formative Assessment*, she contrasts traditional and alternative approaches, showing how children respond to written, oral and 'incidental' feedback. She explores different ways of marking, including pupil and paired marking, and explains which are most effective and why. INSET suggestions and advice on implementing a whole-school feedback policy (including liaising with parents) are also included. Lila and the Secret of Rain - David Conway 2011-04-01

For months the sun has burned down on Lila's Kenyan village. It is too hot to gather firewood, too hot to weed the garden, even too hot to milk the cow. Without rain the well will run dry and the crops will fail. Lila is so worried that when her grandfather whispers to her the secret of

rain, she decides to go and talk to the sky herself. How Lila saves the village by telling the sky the saddest thing she knows is told in David Conway's elegant and spare prose style, which is complemented perfectly by Jude Daly's beautiful and poignant illustrations.

The Threads of Reading - Karen Tankersley 2003-11-03

How can teachers make sure that all students gain the reading skills they need to be successful in school and in life? In this book, Karen Tankersley describes the six foundational "threads" that students need to study in order to become effective readers: phonemic awareness, phonics and decoding, vocabulary, fluency, comprehension, and higher-order processing. For each area, the author explains how students acquire the reading skills they need and offers a series of skill-building strategies and activities that teachers can use in the classroom. Although reading is perhaps most intensely taught in the kindergarten and 1st-grade classrooms, Tankersley emphasizes that helping students become lifelong readers is a task for all teachers, including content-area teachers in middle and high schools. *The Threads of Reading* addresses key questions about literacy, such as * What makes a difference in reading achievement? * How much reading time is enough? * How can teachers use writing to build reading skills? * How can teachers help students make meaning from their reading? The strategies in this book address many situations, from individual instruction to small- or large-group instruction, from kindergarten to high school. Teachers will appreciate the multitude of activities provided, and administrators will learn to better evaluate the reading programs in place in their districts and schools. Grounded in both research and "teacher lore" from actual classrooms, this book is a solid guide to helping students become lifelong readers. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

The National Literacy Strategy - 2001

[Integrated Curriculum for Secondary Education English - Years 1 and 2](#) - Claire Manners 2012
The MEC/BC bilingual project, initiated in 1996 in primary as a unique experiment within the Spanish state education system, and in

September 2004 the classes that had started their bilingual education 8 years earlier took the project forward into Secondary schools. The formal agreement between the MEC/BC states that the aim of the project is to provide students from the age of three to sixteen with a bilingual, bicultural education through an integrated Spanish/English curriculum based on the Spanish National Curriculum and aspects of the National Curriculum for England and Wales. The implantation of such a curriculum requires, firstly, with regard to English as a subject, a very different classroom approach from the traditional EFL classroom where the focus is on learning English as a foreign language; secondly, a similar new methodology for teaching and learning other curricular areas through English. Such an integrated approach sits very positively within the Directives of the Council of Europe which insists on the need for students to be competent in three European languages by the end of the obligatory period of Secondary Education and that the learning of the first foreign language should begin in the early years of formal education. In addition to this, the secondary integrated curricula have consistently focused on the continuing development of students' skills and learning strategies, thus firmly establishing learning as a lifelong process. The specific objectives of the Project in the Secondary education level are to: continue the acquisition and learning of both languages through an integrated content-based curriculum, encourage awareness and understanding of the diversity of both cultures, facilitate the exchange of teachers and students, encourage the use of modern technologies in learning other languages, promote the certification of studies under both educational systems, if and when appropriate.
