*Análisis de la implementación de los IFRS* - Samuel Alberto Mantilla B.  
2020-03-01

Esta publicación no es para principiantes. Supone que el lector conoce los estándares (mucho más allá de las normas) y tiene experiencia tanto en la implementación como en el análisis financiero asociado a ella. El punto de partida es que la adopción de los IFRS® es un asunto superado, algunas entidades o jurisdicciones lo han hecho bien, otras han realizado adaptaciones. Algunas avanzan lentamente en sus procesos de convergencia. Unas más se han hecho las de la vista gorda para facilitar el regreso a las viejas prácticas de la contabilidad creativa y de las acomodaciones tributarias. En el presente, el tema central es el análisis de la implementación: lo realizado, sometido a la lupa de análisis de los expertos, desde tres perspectivas: Samuel Mantilla (Colombia), John Hughes (Canadá) y The Footnotes Analyst / Steve Cooper y Dennis Jullens (Holanda).

Corporate Fraud and Corruption - M. Krambia-Kapardis 2016-04-08

Recent large-scale corporate collapses, such as Lehman Brothers, Enron, Worldcom, and Parmalat, highlight the implosion of traditional models of fraud prevention. By focusing on risk factors at the micro level, they have failed to take into account the broader context in which external auditors operate as well as the crucial importance of such factors as corruption, organizational culture, corporate social responsibility, ethical values, governance, ineffective regulation, and a lack of transparency. Corporate Fraud and Corruption engages readers by showing how evidence-based, multi-level micro and macro analysis of fraud risk and protective factors inform effective fraud prevention, in turn minimizing financial catastrophes. Krambia-Kapardis focuses on her own empirical research into the aetiology of fraud to showcase a holistic approach to fraud prevention. This book also features major case studies from the United States, the United Kingdom, and Australia.

**Managing Agile** - Alan Moran 2015-03-18

This book examines agile approaches from a management perspective by focusing on matters of strategy, implementation, organization and people. It examines the turbulence of the marketplace and business environment in order to identify what role agile management has to play in coping with such change and uncertainty. Based on observations, personal experience and extensive research, it clearly identifies the fabric of the agile organization, helping managers to become agile leaders in an uncertain world. The book opens with a broad survey of agile strategies, comparing and contrasting some of the major methodologies selected on the basis of where they lie on a continuum of ceremony and formality, ranging from the minimalist technique-driven and software engineering focused XP, to the pragmatic product-project paradigm that is Scrum and its scaled counterpart SAFe®, to the comparatively project-centric DSDM. Subsequently, the core of the book focuses on DSDM, owing to the method's comprehensive elaboration of program and project management practices. This work will chiefly be of interest to all those with decision-making authority within their organizations (e.g., senior managers, line managers, program, project and risk managers) and for whom topics such as strategy, finance, quality, governance and risk management constitute a daily aspect of their work. It will, however, also be of interest to those readers in advanced management or business administration courses (e.g., MBA, MSc), who wish to engage in the management of agile organizations and thus need to adapt their skills and knowledge accordingly.

The Art of M&A Valuation and Modeling bridges the gap between M&A valuation in theory and as an appraisal practice. It shows how to perform objective analyses, address all parties' subjective interests in the transaction, and use practical financial models to complete a smooth transaction that benefits everyone. Alexandra Reed Lajoux is Chief Knowledge Officer at the National Association of Corporate Directors (NACD). She has more than 30 years of experience as a senior writer and editor of newsletters, articles, and books on various business topics. H. Peter Nesvold is a managing director with Jefferies & Co. in New York, where he heads transportation and automotive-related equity research. *Political Standards* - Karthik Ramanna 2015-11-09

Prudent, verifiable, and timely corporate accounting is a bedrock of our modern capitalist system. In recent years, however, the rules that govern corporate accounting have been subtly changed in ways that compromise these core principles, to the detriment of the economy at large. These changes have been driven by the private agendas of certain corporate special interests, aided selectively—and sometimes unwittingly—by arguments from business academia. With *Political Standards*, Karthik Ramanna develops the notion of “thin political markets” to describe a key problem facing technical rule-making in corporate accounting and beyond. When standard-setting boards attempt to regulate the accounting practices of corporations, they must draw on a small pool of

qualified experts—but those experts almost always have strong commercial interests in the outcome. Meanwhile, standard setting rarely enjoys much attention from the general public. This absence of accountability, Ramanna argues, allows corporate managers to game the system. In the profit-maximization framework of modern capitalism, the only practicable solution is to reframe managerial norms when participating in thin political markets. *Political Standards* will be an essential resource for understanding how the rules of the game are set, whom they inevitably favor, and how the process can be changed for a better capitalism.

*The Routledge Companion to Financial Accounting Theory* - Stewart Jones 2015-05-22

Financial accounting theory has numerous practical applications and policy implications, for instance, international accounting standard setters are increasingly relying on theoretical accounting concepts in the creation of new standards; and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices. The global financial crisis has also led to a new found appreciation of the social, economic and political importance of accounting concepts generally and corporate financial reporting in particular. For instance, the fundamentals of capital market theory (i.e. market efficiency) and measurement theory (i.e. fair value) have received widespread public and

regulatory attention. This comprehensive, authoritative volume provides a prestige reference work which offers students, academics, regulators and practitioners a valuable resource containing the current scholarship and practice in the established field of financial accounting theory.

*Intellectual Property, Finance and Corporate Governance* - Janice Denoncourt 2018-04-13

IP law has evolved from being a little pool to a big ocean. Corporate governance needs to respond to society's rising expectations of directors and boards as the impact of the global intellectual property ecosystem is felt. How can a responsible corporate culture of IP transparency be stimulated to create a rosy future to connect corporate communication with the desires of shareholders, investors and other stakeholders? The

astonishing lack of material quantitative and qualitative information companies report about their IP assets makes it difficult for shareholders and other stakeholders to assess directors' stewardship of those assets - a pressing corporate governance issue in the 21st century. This book advances IP reporting in alignment with the key corporate governance principles of transparency and disclosure. It analyses the juncture between the IP ecosystem; corporate finance and accounting for intangibles; and corporate governance. Patents, mini-case studies and an original business triage style model for assessing IP disclosures are used to illustrate the gaps corporate governance theory needs to address. Focussing on the common law tradition of corporate governance in England and Wales, intangibles and IP reporting developments in other jurisdictions are also explored.
