He learned everything there was to know about engines - how to design them and how to build them. But when he returned to the United States to look for work at the Michigan Central Railroad, the only job Elijah could get was shoveling coal into a train's firebox. Undaunted, he went on to invent a means of oiling the engine while the train was running, changing the face of travel around the world. With playful text and lively illustrations, All Aboard!
