Africa and the Formation of the New System of International Relations - Alexey M. Vasiliev

2021-09-16

This book discusses the prospects for the development of the African continent as part of the emerging system of international relations in the twenty-first century. African countries are

playing an increasingly important part in the current system of international relations. Nevertheless, even 60 years after gaining their independence, most of them are confronted with regional and global issues that are directly related to their colonial past and its influence. Due to Africa's wealth of natural and geopolitical

resources, the possibility of interference in the internal affairs of African countries on the part of new and traditional global actors remains very real. Leading Africanists, together with international scholars from both international relations and African studies, examine the experience of decolonization, the impact of the emergence of a unipolar world on the African continent, and the growing influence of new international actors on the African continent in the twenty-first century. In addition, the importance of African countries' foreign policy concepts and ideological attitudes in the post-bipolar period is revealed. "This volume strengthens the intellectual bridge between Russian, African and Western scholars of international relations. Strongly recommended!" Vladimir G. Shubin, Institute for African Studies, Russian Academy of Sciences "This book presents a wide range of prominent global scholars who bring a wealth of knowledge on the subject of Africa and the world." Gilbert

Khadiagala, Jan Smuts Professor of International Relations and Director of the African Centre for the Study of the USA (ACSUS) at the University of the Witwatersrand, Johannesburg, South Africa. "As a genuine contribution to the field of international relations and Global South Agency, this book should be in every institution of higher education's library." Lembe Tiky, Director of Academic Development, International Studies Association.

Waging a Good War - Thomas E. Ricks
2022-10-04

#1 New York Times bestselling author and Pulitzer Prize winner Thomas E. Ricks offers a new take on the Civil Rights Movement, stressing its unexpected use of military strategy and its lessons for nonviolent resistance around the world. In *Waging a Good War*, bestselling author Thomas E. Ricks offers a fresh perspective on America's greatest moral revolution—the civil rights movement of the 1950s and 1960s—and its legacy today. While

the Movement has become synonymous with Martin Luther King Jr.'s ethos of nonviolence, Ricks, a Pulitzer Prize-winning war reporter, draws on his deep knowledge of tactics and strategy to note the surprising affinities between that ethos and the organized pursuit of success at war. The greatest victories for Black Americans of the past century, he stresses, were won not by idealism alone, but by paying attention to recruiting, training, discipline, and organization—the hallmarks of any successful military campaign. An engaging storyteller, Ricks deftly narrates the movement's triumphs and defeats. He follows King and other key figures from Montgomery to Memphis, demonstrating that Gandhian nonviolence was a philosophy of active, not passive, resistance – involving the bold and sustained confrontation of the Movement's adversaries, both on the ground and in the court of public opinion. While bringing legends such as Fannie Lou Hamer and John Lewis into new focus, Ricks also highlights

lesser-known figures who played critical roles in fashioning nonviolence into an effective tool—the activists James Lawson, James Bevel, Diane Nash, and Septima Clark foremost among them. He also offers a new understanding of the Movement's later difficulties as internal disputes and white backlash intensified. Rich with fresh interpretations of familiar events and overlooked aspects of America's civil rights struggle, *Waging a Good War* is an indispensable addition to the literature of racial justice and social change—and one that offers vital lessons for our own time.

Teardown - Gordon Young 2021-02-23

After living in San Francisco for fifteen years, journalist Gordon Young found himself yearning for his Rust Belt hometown: Flint, Michigan, the birthplace of General Motors and the “star” of the Michael Moore documentary *Roger & Me*. Hoping to rediscover and help a place that had once boasted one of the world's highest per capita income levels but had become one of the

country's most impoverished and dangerous cities, he returned to Flint with the intention of buying a house. What he found was a place of stark contrasts and dramatic stories, where an exotic dancer could afford a lavish mansion, speculators scooped up cheap houses by the dozen on eBay, and arson was often the quickest route to neighborhood beautification. Skillfully blending personal memoir, historical inquiry, and interviews with Flint residents, Young constructs a vibrant tale of a once-thriving city still fighting—despite overwhelming odds—to rise from the ashes. He befriends a ragtag collection of urban homesteaders and die-hard locals who refuse to give up as they try to transform Flint into a smaller, greener town that offers lessons for cities all over the world. Hard-hitting, insightful, and often painfully funny, *Teardown* reminds us that cities are ultimately defined by people, not politics or economics. *The North Carolina Gazetteer* - William S. Island Life - Jay Fleming 2021-10-15
Photographer Jay Fleming turned his attention to Smith and Tangier Islands - the Chesapeake Bay's last inhabited 'water-locked' islands. Fleming has made countless trips to the islands to document the unique way of life and environment that have been shaped by isolation and the waters of the Chesapeake. This collection of photographs will fill the pages of Fleming's second book, *Island Life*. This body work comes at an important time for the islands, as their populations continue to decline and the unrelenting forces of the bay threaten the working waterfronts that have sustained the communities for centuries. Fleming hopes that his photography will immerse readers in the *Island Life* and capture a crucial moment in time for the Chesapeake's most unique communities. *Queen* - Nadine Cohodas 2007-12-18

Queen is the landmark biography of the brief, intensely lived life and soulful music of the great Dinah Washington. A gospel star at fifteen, she was discovered by jazz great Lionel Hampton at eighteen, and for the rest of her life was on the road, playing clubs, or singing in the studio--making music one way or another. Dinah's tart and heartfelt voice quickly became her trademark; she was a distinctive stylist, crossing over from the "race" music category to the pop and jazz charts. Known in her day as Queen of the Blues and Queen of the Juke Boxes, Dinah was regarded as that rare "first take" artist, her studio recordings reflecting the same passionate energy she brought to the stage. As Nadine Cohodas shows us, Dinah suffered her share of heartbreak in her personal life, but she thrived on the growing audience response that greeted her signature tunes: "What a Difference a Day Makes," "Evil Gal Blues," and "Baby (You've Got What It Takes)," with Brook Benton. She made every song she sang her own. Dinah lives large

in these pages, with her seven marriages; her penchant for clothes, cars, furs, and diets; and her famously feisty personality--testy one moment and generous the next. This biography, meticulously researched and gracefully written, is the first to draw on extensive interviews with family members and newly discovered documents. It is a revelation of Dinah's work and her life. Cohodas captures the Queen in all her contradictions, and we hear in this book the voice of a natural star, born to entertain and to be loved.

Biocommunication of Animals - Guenther

Witzany 2013-11-08

Every coordination within or between animals depends on communication processes. Although the signaling molecules, vocal and tactile signs, gestures and its combinations differ throughout all species according their evolutionary origins and variety of adaptation processes, certain levels of biocommunication can be found in all animal species: (a) Abiotic environmental indices such as temperature, light, water, etc. that affect the local ecosphere of an organism and are sensed, interpreted. (b) Trans-specific communication with non-related organisms. (c) Species-specific communication between same or related species. (d) Intraorganismic communication, i.e., sign-mediated coordination within the body of the organism. Heteroactivism - Catherine Jean Nash
2020-10-29

Around the world, LGBTQ+ activists have won an unprecedented series of political victories, from marriage equality to increased representation in government. But this success has sparked a backlash. While there has been much scrutiny of the role of the Christian right in opposing LGBTQ+ equality in the US, the backlash goes far beyond these traditional elements, and also extends beyond the US to countries including the UK, Ireland and Canada. In this book, Nash and Browne consider the rise of the new 'heteroactivism', showing how social media and new sources of funding have reinvigorated the opponents of LGBTQ+ rights. They also show how the rhetoric and tactics of

this new generation of heteroactivists differ from that of their predecessors, exploiting notions of 'parental rights' and freedom of speech to assert heteronormative values in spaces ranging from schools to workplaces. They also reveal the increasingly transnational nature of anti-LGBTQ+ activism, with growing links between heteroactivists in the US, UK and beyond.

Aging and Disability - National Academies of Sciences, Engineering, and Medicine 2018-07-06
Many different groups of people are subject to stereotypes. Positive stereotypes (e.g., "older and wiser") may provide a benefit to the relevant groups. However, negative stereotypes of aging and of disability continue to persist and, in some cases, remain socially acceptable. Research has shown that when exposed to negative images of aging, older persons demonstrate poor physical

and cognitive performance and function, while those who are exposed to positive images of aging (or who have positive self-perceptions of aging) demonstrate better performance and function. Furthermore, an individual's expectations about and perceptions of aging can predict future health outcomes. To better understand how stereotypes affect older adults and individuals with disabilities, the National Academies of Sciences, Engineering, and Medicine, with support from AARP, convened a public workshop on October 10, 2017. This publication summarizes the presentations and discussions from the workshop.

Working the Water - Jay Fleming 2016-10-01

Sustaining Development in Mineral Economies - Richard Auty 2002-09-26

It is widely believed that natural mineral resources are desirable. However there is growing evidence that this may not always be the case. Indeed, it seems that natural assets

can distort the economy to such a degree that the benefit actually becomes a curse. In *Sustaining Development in Mineral Economies*, Richard Auty highlights these drawbacks and the devastating effect they can have on developing economies. With reference to six ore-exporters (viz. Peru, Bolivia, Chile, Jamaica, Zambia and Papua New Guinea) he outlines how things can go badly wrong. He particularly stresses the need to avoid 'Dutch Disease' whereby competitiveness is drained out of the agriculture and manufacturing sectors so that in the long term growth falters.

Justice Is Coming - Cenk Uygur 2023-09-19
A manifesto that outlines the progressive vision, recent history and worldview—by the founder of The Young Turks and co-founder of Justice Democrats. Right now, the shelves are filled with books on Donald Trump, as if everything was just hunky dory before the orange buffoon took over. Well, it wasn't. What ails America goes far beyond Trump, but don't worry—progressives are going to take over the country and America is going to love it. In fact, in many ways we already have. In *Justice Is Coming*, The Young Turks founder Cenk Uygur presents two central ideas that counter everything we hear from pundits and politicians on a daily basis: one, progressives are correct on all of the issues, and two, America is actually a very progressive country. Millions of us know that we are not isolated individuals—we are a part of something larger, a movement that is already transforming Washington. This compulsively readable manifesto seeks to apply the momentum we have

already built to a concrete progressive agenda that activists, voters, and citizens can all rally around. It looks beyond Trump to the larger historical forces that have given us this unique political moment, and explains why we should fight, how we should fight, and how we can—and will—win. Look out, Washington. We are building an army. This book is our battle plan.

The Poisoned City - Anna Clark 2018-07-10

When the people of Flint, Michigan, turned on their faucets in April 2014, the water pouring out was poisoned with lead and other toxins. Through a series of disastrous decisions, the state government had switched the city's water supply to a source that corroded Flint's aging lead pipes. Complaints about the foul-smelling water were dismissed: the residents of Flint, mostly poor and African American, were not seen as credible, even in matters of their own lives. It took eighteen months of activism by city residents and a band of dogged outsiders to force the state to admit that the water was

poisonous. By that time, twelve people had died and Flint's children had suffered irreparable harm. The long battle for accountability and a humane response to this man-made disaster has only just begun. In the first full account of this American tragedy, Anna Clark's *The Poisoned City* recounts the gripping story of Flint's poisoned water through the people who caused it, suffered from it, and exposed it. It is a chronicle of one town, but could also be about any American city, all made precarious by the neglect of infrastructure and the erosion of democratic decision making. Places like Flint are set up to fail—and for the people who live and work in them, the consequences can be fatal.

The Black-eyed Stranger - Charlotte Armstrong 1951

Lost to the World - Shahbaz Taseer 2022-11-15

Shahbaz Taseer's memoir of his five-year-long captivity at the hands of the Islamic Movement of Uzbekistan. In late August 2011, Shahbaz

Taseer was driving to his office in Lahore when he was dragged from his car at gunpoint and kidnapped by members of the Islamic Movement of Uzbekistan (IMU), a Taliban-affiliated Uzbek terrorist group. Shahbaz's father, the late Pakistani governor, had recently been assassinated. His crime: speaking in support of a Christian woman who had been accused of blasphemy and sentenced to death. Though Taseer himself wasn't much interested in politics, he was somewhat of a public figure, and he represented a more tolerant, internationally connected Pakistan that the IMU despised. What followed was nearly five years of torture and harrowing danger while Taseer was held captive, his fate determined by the infighting of the IMU, the Taliban, and ISIS. *Lost to the World* is his memoir of that time—a story of extraordinary sorrow but also of goodness and faith. While deeply dramatic, this tale is also comedic; for Taseer, humor, as much as the Koran, provided a light by which to see his own

humanity, even under the most inhumane conditions, and to find a way back to his family. In a time when Western leaders use fear-mongering rhetoric to paint all followers of Islam as dangerous fundamentalists, *Lost to the World* illustrates the chasm between Muslim terrorists and ordinary Muslim citizens, and how terrorist organizations gain strength from the war on terror.

To Be Israeli - Yair Lapid 2020-12-25

In *To Be Israeli*, Yair Lapid offers his unique perspective on his equally unique homeland: its war-torn but inspiring history, prickly but warmhearted people, imperfect but spirited democracy. In a collection of insightful, poignant, and often humorous essays, Lapid takes on the topics that have shaped his country: the conflict with the Palestinians, anti-Semitism, terrorism, and the legacy of the Holocaust. A popular newspaper columnist and TV host before he entered politics, Lapid for the first time shares with American readers the tough-minded

but hopeful vision that won over so many voters, bringing a calm, levelheaded voice to topics usually dominated by vitriol and denunciation. A fervent secularist who attends synagogue, Lapid addresses hot-button issues such as the role of religion in Israeli society. A devoted father with a passion for history, Lapid also reflects on the personal and family milestones that reflect Israel's differences from other countries, such as watching his oldest son join the army and seeing four generations attend the same Passover seder. Lapid assesses his country's greatest accomplishments and most horrific failures, its miraculous survival and the gathering threats it faces, the burdens of the past and reasons to think a bright future lies ahead.

Dirtbag - Amber A'Lee Frost 2023-07-25

The complete story of the victories and failures of millennial socialism, as told by the writer who witnessed it all firsthand. Amber A'Lee Frost came to New York City as a working class activist in a punk band, arriving just before the start of Occupy Wall Street—the first major event in decades for a socialist movement that was nearly extinct at the turn of the century. She's been at the vanguard of radical politics ever since, as a writer, veteran member of the Democratic Socialists of America, and cohost of the wildly popular Chapo Trap House podcast.

She has reported on millennial activism everywhere from the sunny streets of Havana, to the Labour Party's unexpected victory in the UK, to small towns in her home state of Indiana. *Dirtbag* is a much-anticipated debut from one of the greatest emerging writers in modern socialism. This memoir is more than Frost's story; it is also the story of the only movement that has a chance to reshape our world. Both are chock-full of momentary triumphs, stupid decisions, new international friendships and rivalries, struggle, joy, setbacks, and heartbreak. Both are related with magnetic prose, remarkable candor, and unflappable humor. Throughout it all, Frost burned the candle at both ends. She kissed a man in the rain at a train stop after he sang her "The Internationale," and gave herself hangovers that left her begging for death. But all of the late nights, heated debates, and joyous camaraderie was set against the unmistakable sense that somehow, socialism was winning.

Local Redistribution and Local Democracy -

Clayton P. Gillette 2011-06-28

The traditional theory of urban finance argues against local redistribution of wealth on the assumption that such action is likely to chase away the relatively wealthy, leaving only the impoverished behind. Nevertheless, Clayton P. Gillette observes, local governments engage in substantial redistribution, both to the wealthy

and to the poor. In this thoughtful book, Gillette examines whether recent campaigns to enact "living wage" ordinances and other local redistributive programs represent gaps in the traditional theory or political opportunism. He then investigates the role of the courts in distinguishing between these explanations. The author argues that courts have greater capacity to review local programs than is typically assumed. He concludes that when a single interest group dominates the political process, judicial intervention to determine a program's legal validity may be appropriate. But if the political contest involves competing groups, courts should defer to local political judgments.
