Literary Translation, Reception, and Transfer - Norbert Bachleitner 2020-09-21

The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

East European Jews in Switzerland - Tamar Lewinsky 2013-10-14

During the era of Jewish mass migration from Eastern Europe (from the 1880s until the First World War), Switzerland played an important role in absorbing immigrants. Though located at the periphery of the main migration routes, the federal state with its liberal policies on foreigners became a key destination for students, revolutionaries, and travelers.

The micro-studies and more general papers of this volume approach the topic in its transnational, local, linguistic, gendered, and ideological dimensions and from various disciplinary angles. They interweave and facilitate a novel take on the transitory spatial history and the Lebenswelt of East European Jews in Switzerland. Topics of this volume range- among others- from the location of Switzerland on the map of East European Jewish politics (Bundism, Socialism, Yiddishism, Zionism), conflicting performative cultures of Jewish and Russian revolutionaries, the Swiss Lehr- and Wanderjahre of the Jewish public intellectual Meir Wiener, the impact of Geneva on the Zionist Hebrew writer Ben Ami, the Russian-Jewish students' colonies in Berne and Zurich and questions of individuals' integration and acculturation.

The Role of Music in European Integration - Albrecht Riethmüller
2017-08-07

The volume focuses on music during the process of European integration since the Second World War. Often music in Europe is defined by its relation to the concept of Occidentalism (Musik im Abendland; western music). The emphasis here turns rather to recent manifestations of its involvement in ensembles, events, musical organisations and ideas; questions of unity and diversity from Bergen to Tel Aviv, from Lisbon to Baku; and deals with the tension between local, regional and national music within the larger confluence of European music. The status of classical and avante-garde music, and to a degree rock and pop, during Europe's development the past sixty years are also reviewed within the context of eurocentrism - the domination of European music within world music, a term propagated by anthropologists and ethnomusicologists several decades ago and based on multiculturalism. Conversely, the search for a musical European identity and the ways in which this search has in turn been influenced by multiculturalism is an ongoing, dynamic process.
