**Eden in the East** - Stephen Oppenheimer 1998

This book completely changes the established and conventional view of prehistory by relocating the Lost Eden—the world's first civilisation—to Southeast Asia. At the end of the Ice Age, Southeast Asia formed a continent twice the size of India, which included Indochina, Malaysia, Indonesia, and Borneo. In *Eden in the East*, Stephen Oppenheimer puts forward the astonishing argument that here in southeast Asia—rather than in Mesopotamia where it is usually placed—was the lost civilization that fertilized the Great cultures of the Middle East 6,000 years ago. He produces evidence from ethnography, archaeology, oceanography, creation stories, myths, linguistics, and DNA analysis to argue that this founding civilization was destroyed by a catastrophic flood, caused by a rapid rise in the sea level at the end of the last ice age.

**Meanings for Manhood** - Mark C. Carnes 1990-10-15

The stereotype of the Victorian man as a flinty, sexually repressed patriarch belies the remarkably wide variety of male behaviors and conceptions of manhood during the mid- to late- nineteenth century. A complex pattern of alternative and even competing behaviors and attitudes emerges in this important collection of essays that points toward a "gendered history" of men.

*The Spirit of Hegel* - Errol E. Harris 1993

"This comprehensive and illuminating collection of essays by Errol E. Harris covers the entire range of Hegel's philosophy, emphasizing Hegel's contemporary relevance, elucidating difficult and controversial questions, and revealing Hegel's insight into key philosophical problems. It presents Hegel's philosophy as consistent, credible, and prophetic in its anticipation of modern scientific developments." "Professor Harris concentrates on key points of controversy and attempts to resolve them by stressing the prevailing consistency of Hegel's thought, interpreted as realistic holism. In this context Harris explains Hegel's idealism as objective, in a way that reconciles the earlier oppositions of idealism to realism, rationalism to empiricism, and reason to revelation." "Much space and discussion is given to Hegel's Philosophy of Nature as the crucial issue in judging whether Hegel is a pure idealist, or is a realist in the same sense and to the same degree as A. N. Whitehead. The final chapter compares the philosophies of Hegel and Whitehead to throw light on this question and to underline the book's two main purposes: to highlight Hegel's contemporary relevance and to insist on the essential realism of this thought." "Key questions, such as those of the body-mind relationship, political liberalism, international relations, and the so-called end of history, are addressed in the course of what amounts to a general presentation of the character and scope of Hegel's philosophy."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. *The Legends of the Pyramids* - Jason Colavito 2021-08-03

Could the Great Pyramid of Giza be a repository of ancient magical knowledge? Or perhaps evidence of a vanished pre-Ice Age civilization? Misinformation and myths have attached themselves to the Egyptian pyramids since ancient Greece and Rome. While many Americans believe

that the pyramids were built by aliens, archaeologists understand that the Giza pyramids were built by the pharaohs of the Fourth Dynasty around 2450 BCE. So why is there such a disconnect between scholarly opinion and the popular view of Egypt? In *The Legends of the Pyramids*, Jason Colavito takes us back to Late Antique Egypt, where the replacement of polytheism with Christianity gave rise to local efforts to rewrite the stories of Egyptian history in the image of the Bible. When the Arab conquest absorbed Egypt into the Islamic community, these stories then passed into Islamic historiography and reentered the West. Colavito's *The Legends of the Pyramids* lays open pop culture's view of Egypt in movies, TV shows, popular books, and New Age beliefs, detailing how the hidden history of Egypt has grown alongside the official history of archaeology and Egyptology.

**The Churches of Rome** - Roloff Beny 1981

**Meet Me in Atlantis** - Mark Adams 2015-03-10

The New York Times Bestselling Travel Memoir! The author of *Turn Right at Machu Picchu* travels the globe in search of the world's most famous lost city. "Adventurous, inquisitive and mirthful, Mark Adams gamely sifts through the eons of rumor, science, and lore to find a place that, in the end, seems startlingly real indeed."—Hampton Sides A few years ago, Mark Adams made a strange discovery: Far from alien conspiracy theories and other pop culture myths, everything we know about the legendary lost city of Atlantis comes from the work of one man, the Greek philosopher Plato. Stranger still: Adams learned there is an entire global sub-culture of amateur explorers who are still actively and obsessively searching for this sunken city, based entirely on Plato's detailed clues. What Adams didn't realize was that Atlantis is kind of like a virus—and he'd been exposed. In *Meet Me in Atlantis*, Adams racks up frequent-flier miles tracking down these Atlantis obsessives, trying to determine why they believe it's possible to find the world's most famous lost city—and whether any of their theories could prove or disprove its existence. The result is a classic quest that takes readers to fascinating locations to meet irresistible characters; and a deep, often humorous look at the human longing to rediscover a lost world.

*The Dark Side of Innovation* - Alex Coad 2022-02-24

This book is a reaction to popular assumptions that innovation is always a force for good. While the popular press and politicians often take the view that "the more innovation, the better", the chapters in this edited volume reflect on the harmful effects of innovation on society and the environment. The book begins with a broad discussion of the dark side of innovation, followed by contributions by various experts in the area. It is a critical reply to the innovation optimists, complementing the list of indicators that show steady human progress with a list of indicators that show sustained deterioration (largely due to innovation). The volume outlines some relevant dimensions of harmful innovation, before distinguishing between the types of harm brought on by innovation. The various contributed chapters focus on the following themes: a bibliometric analysis of the scientific literature on the harmful consequences of innovation; harmful side-effects from solar photovoltaic waste; harmful consequences of process innovations on working practices in areas such as accountancy; the difficulties of transferring innovations from research to practice in clinical healthcare; and the harmful consequences of social innovations. The chapters in this book were originally published as a special issue of the journal *Industry and Innovation*.

**Aristotle and Atlantis** - Thorwald C. Franke 2012-10-15

Aristotle considered Plato's Atlantis to be an invention; so we read time and again - but is this really true? Until the late 19th century, academia still held the opposite opinion. How did this shift in opinion take place? And was it justified? Over 100 works from the Atlantis and Aristotle literature, from antiquity to the Renaissance, from the 18th to the 21st century, were examined in order to track down the truth. A scientific adventure regarding Aristotle's opinion about Atlantis unfolds step by step, starting 200 years ago and reaching into the present. What did the great philosopher and disciple of Plato really think? All the relevant passages from Aristotle's works as well as all the steps taken during the

literary research are documented in the appendix.

Learning from Logistics - Clare Lyster 2016-02-22

In the 19th century railroads and canals provided both structure and motor for city development. This role has been taken over today by the global flow of data and products, as the author argues. Flow of material and communication is the DNA of contemporary environments. This development has enormous and partially unfathomable implications for our city fabric. Logistics networks and their complex structure increasingly bear upon many urban spheres. Counter trends to the ubiquitous internet retail trade - to name one of the most palpable phenomena - are gaining momentum as well, exemplified by the criticism of labor conditions in e-commerce and the trend to buy regional products from local stores. The author describes the current development and its impact on architecture, landscape architecture and urbanism: Aspects such as today's hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design. Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects.

**The "Man" Question in International Relations** - Marysia Zalewski 2019-04-05

Originally published in 1998, *The "Man" Question in International Relations* looks at the prevalence of man in the world of international relations. The book argues that, focusing on women as a way of changing the gender of international relations can position women as "the problem." The authors of this book suggest that the problem is not "woman" but "man." Rather than highlighting the absences and presence of women in the theories and practices of international relations, the authors concentrate on questioning the practices of masculinities, the hegemony of men, and the subject of "man." In this way, they hope to destabilize the field in ways that "adding women and stirring" has not.

Enabling Innovation - Sabina Jeschke 2011-10-08

The capability to innovate in an on-going manner is emerging as a decisive key factor in today's world of business and work. The ability to stay competitive is becoming identical with the ability to innovate. This book originated from the research and development project "International Monitoring" and outlines the topic of innovative capability from a practice-oriented angle. Contributions of German and international experts offer an enlightening glimpse behind the scenes of innovations. The central issue is not the description of features of successful innovation processes or how innovations can be efficiently controlled and managed, but under which conditions they can emerge in the first place. In what way can individuals, organizations, networks and societies be enabled to continuously induce innovations?

*The Heart Beats on the Left* - Oskar LaFontaine 2000-10-23

This is the English-language edition of what has become one of the most controversial books in German politics today. Oskar Lafontaine was the leader of Germany's Social Democratic party and finance minister in Gerhard Schröder's government until he suddenly resigned in March 1999. Lafontaine's left-wing commitments brought him into conflict with Schröder's endorsement of third way politics and with his attempt to remodel the SDP along the lines of Tony Blair's New Labour. *The Heart Beats on the Left* is the inside story of why Lafontaine broke with the SDP and Schröder's government, and why he believed that the social and political costs of Schröder's third way politics were too high. It is a merciless settling of scores in which the policies of Schröder and his

government are subjected to scathing criticism. But it is also the most sustained criticism of third way politics from a prominent political figure who stands on the left. A bestseller in Germany and already translated into many languages, this book is bound to be widely reviewed in English and to become a focal point for political debate about social democracy and its future.

**Beyond the Gibson Girl** - Martha H. Patterson 2010-10-01

Challenging monolithic images of the New Woman as white, well-educated, and politically progressive, this study focuses on important regional, ethnic, and sociopolitical differences in the use of the New Woman trope at the turn of the twentieth century. Using Charles Dana Gibson's "Gibson Girls" as a point of departure, Martha H. Patterson explores how writers such as Pauline Hopkins, Margaret Murray Washington, Sui Sin Far, Mary Johnston, Edith Wharton, Ellen Glasgow, and Willa Cather challenged and redeployed the New Woman image in light of other "new" conceptions: the "New Negro Woman," the "New Ethics," the "New South," and the "New China." As she appears in these writers' works, the New Woman both promises and threatens to effect sociopolitical change as a consumer, an instigator of evolutionary and economic development, and, for writers of color, an icon of successful assimilation into dominant Anglo-American culture. Examining a diverse array of cultural products, Patterson shows how the seemingly celebratory term of the New Woman becomes a trope not only of progressive reform, consumer power, transgressive femininity, modern energy, and modern cure, but also of racial and ethnic taxonomies, social Darwinist struggle, imperialist ambition, assimilationist pressures, and modern decay.

**Machine in the Studio** - Caroline A. Jones 1996

**The American New Woman Revisited** - Martha H. Patterson 2008-05-01

In North America between 1894 and 1930, the rise of the "New Woman" sparked controversy on both sides of the Atlantic and around the world. As she demanded a public voice as well as private fulfillment through work, education, and politics, American journalists debated and defined her. Who was she and where did she come from? Was she to be celebrated as the agent of progress or reviled as a traitor to the traditional family? Over time, the dominant version of the American New Woman became typified as white, educated, and middle class: the suffragist, progressive reformer, and bloomer-wearing bicyclist. By the 1920s, the jazz-dancing flapper epitomized her. Yet she also had many other faces. Bringing together a diverse range of essays from the periodical press of the late nineteenth and early twentieth centuries, Martha H. Patterson shows how the New Woman differed according to region, class, politics, race, ethnicity, and historical circumstance. In addition to the New Woman's prevailing incarnations, she appears here as a gun-wielding heroine, imperialist symbol, assimilationist icon, entrepreneur, socialist, anarchist, thief, vamp, and eugenicist. Together, these readings redefine our understanding of the New Woman and her cultural impact.
