Rethinking Teacher
Supervision and Evaluation -

Kim Marshall 2009-10-30

In this important book, education expert Kim Marshall shows how to break away from the typical and often ineffective

evaluation approaches in which principals use infrequent classroom visits or rely on standardized test scores to assess a teacher's performance. Marshall proposes a broader framework

for supervision and evaluation that enlists teachers in improving the performance of all students. Emphasizing trust-building and teamwork, Marshall's innovative, four-part framework shifts the focus from periodically evaluating teaching to continuously analyzing learning. This book offers school principals a guide for implementing Marshall's framework and shows how to make frequent, informal classroom visits followed by candid feedback to each teacher; work with teacher teams to plan thoughtful curriculum units rather than focusing on individual lessons; get teachers as teams involved in low-stakes analysis of interim assessment results to fine-tune their teaching and help struggling students; and use compact rubrics for summative teacher evaluation. This vital resource also includes extensive tools and advice for managing time as well as ideas for using supervision and evaluation practices to foster teacher professional development.

Effective Supervision - Robert J. Marzano 2011-05-05
In *Effective Supervision*, Robert J. Marzano, Tony Frontier, and David Livingston show school and district-level administrators how to set the priorities and support the practices that will help all teachers become expert teachers. Their five-part framework is based on what research tells us about how expertise develops. When these five conditions are attended to in a systematic way, teachers do improve their skills: * A well-articulated knowledge base for teaching * Opportunities for teachers to practice specific strategies or behaviors and to receive feedback * Opportunities for teachers to observe and discuss expertise * Clear criteria for success and help constructing professional growth and development plans * Recognition of the different stages of development progressing toward expertise. The focus is on developing a collegial atmosphere in which teachers can freely share

effective practices with each other, observe one another's classrooms, and receive focused feedback on their teaching strategies. The constructive dynamics of this approach always keep in sight the aim of enhancing students' well-being and achievement. As the authors note, "The ultimate criterion for expert performance in the classroom is student achievement. Anything else misses the point."

Get Better Faster - Paul Bambrick-Santoyo 2016-07-25

Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given

feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of Get Better Faster while at the same time closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, Get Better Faster provides agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. Phase 4: The Power of Discourse Perfect for new educators and those who supervise them, Get Better Faster will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource.

Leverage Leadership - Paul Bambrick-Santoyo 2012-06-06 Paul Bambrick-Santoyo (Managing Director of Uncommon Schools) shows leaders how they can raise their schools to greatness by following a core set of principles. These seven principles, or "levers," allow for consistent, transformational, and replicable growth. With intentional focus on these areas, leaders will leverage much more learning from the same amount of time investment. Fundamentally, each of these seven levers answers the core questions of school leadership: What should an effective leader do, and how and when should they do it. Aimed at all levels of school leadership, the book is for any principal, superintendent, or

educator who wants to be a transformational leader. The book includes 30 video clips of top-tier leaders in action. These videos bring great schools to you, and support a deeper understanding of both the components of success and how it looks as a whole. There are also many helpful rubrics, extensive professional development tools, calendars, and templates. Explores the core principles of effective leadership Author's charter school, North Star Academy in Newark, New Jersey, received the highest possible award given by the U.S. Department of Education; the National Blue Ribbon Print version includes an instructive DVD with 30 video clips to show how it looks in real life. E-book customers: please note that details on how to access the content from the DVD may be found in the e-book Table of Contents. Getting Teacher Evaluation

Right - Linda Darling-Hammond 2015-04-28

Teacher evaluation systems are being overhauled by states and districts across the United States. And, while intentions are admirable, the result for many new systems is that goodoften excellentteachers are lost in the process. In the end, students are the losers. In her new book, Linda Darling-Hammond makes a compelling case for a research-based approach to teacher evaluation that supports collaborative models of teacher planning and learning. She outlines the most current research informing evaluation of teaching practice that incorporates evidence of what teachers do and what their students learn. In addition, she examines the harmful consequences of using any single student test as a basis for evaluating individual teachers. Finally, Darling-Hammond offers a vision of teacher evaluation as part of a

teaching and learning system that supports continuous improvement, both for individual teachers and for the profession as a whole.

Rubric Nation - Michelle Tenam-Zemach 2015-04-01

What is a rubric and how are they being used in teacher education and evaluation? When did rubrics become ubiquitous in the field of education? What impact do rubrics have on students, teachers, teacher educators, and the educational enterprise? This book is an edited volume of essays that critically

examine the phenomenon of rubrics in teacher education, evaluation and education more broadly. Rubrics have seen a dramatic rise in use and presence over the past twenty-five years in colleges of education and districts across the country. Although there is a wealth of literature about how to make rubrics, there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education. The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education. Since rubrics have become indelible in education, it is necessary for a fuller, nuanced discussion of the phenomenon. Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool. This book is not meant to be a series of chapters dedicated to best practices for creating rubrics, nor is this text meant to

present all sides of the rubric discussion. Rather, this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature. Enhancing Professional Practice - Charlotte Danielson 2007-02-08

The framework for teaching is a research-based set of components of instruction that are grounded in a constructivist view of learning and teaching. The framework may be used for many purposes, but its full value is realized as the foundation for professional conversations among practitioners as they seek to enhance their skill in the complex task of teaching. The framework may be used as the foundation of a school's or district's recruitment and hiring, mentoring, coaching, professional development, and teacher evaluation processes, thus linking all those activities together and helping teachers become more thoughtful practitioners. The actions

teachers can take to improve student learning are clearly identified and fall under four domains of teaching responsibility: Planning and Preparation, the School Environment, Instruction, and Professional Responsibilities. Within the domains are 22 components and 76 descriptive elements that further refine our understanding of what teaching is all about. The framework defines four levels of performance-- Unsatisfactory, Basic, Proficient, and Distinguished-- for each element, providing a valuable tool that all teachers can use. This second edition has been revised and updated and also includes frameworks for school specialists, such as school nurses, counselors, library and media specialists, and instructional coaches. Comprehensive, clear, and applicable to teaching across the K-12 spectrum, the framework for teaching described in this book is based on the PRAXIS III: Classroom Performance Assessment criteria developed by

Educational Testing Service and is compatible with INTASC standards.

Tell Me So I Can Hear You - Eleanor Drago-Severson 2016-02

In *Tell Me So I Can Hear You*, Eleanor Drago-Severson and Jessica Blum-DeStefano show how education leaders can learn to deliver feedback in a way that strengthens relationships as well as performance and builds the capacity for growth. The authors provide real-life examples with practical strategies for creating a safe space for feedback, finding the right words, and bridging feedback and action. *Tell Me So I Can Hear You* offers invaluable guidance to help educators support a culture of learning in classrooms, schools, and districts. *Tell Me So I Can Year You* comes to the field at just the right time, when educators at every level are recognizing the importance of ensuring that feedback contributes to continuous learning for adults. The authors offer actionable insights to help

educators engage in meaningful feedback conversations that lead to growth and change. Stephanie Hirsh, executive director, Learning Forward In a perfect marriage of theory and practice, Drago-Severson and Blum-DeStefano introduce a whole new dimension for thinking about feedback that is both intellectually stimulating and immediately applicable. Robert Kegan, Meehan Professor of Adult Learning, Harvard Graduate School of Education, and coauthor, Immunity to Change and An Everyone Culture Articulate and meaningful, Tell Me So I Can Hear You draws deeply from the research on feedback and thoughtfully integrates it with theories of adult development. The book offers a clear blueprint, as well as tools and examples of how we can move to broader and deeper growth-enhancing feedback for those we coach, evaluate, and mentor. The mark of a great coach is a constant desire to learn and grow. A hunger to use whatever can make them better. The best-selling author of *Teach Like a Champion* and *Reading Reconsidered* brings his considerable knowledge about the science of classroom teaching to the sports coaching

world to create championship caliber coaches on the court and field. What great classroom teachers do is relevant to coaches in profound ways. After all, coaches are at their core teachers. Lemov knows that coaches face many of the same challenges found in the classroom, so the science of learning applies equally to them. Unfortunately, coaches and organizations have a mixed level of understanding of the research and study of the science of learning. Sometimes coaches and organizations build their teaching on myths and platitudes more than science. Sometimes there isn't any science applied at all. While there are thousands of books and websites a coach can consult to better understand technical and tactical aspects of the game, there is nothing for a coach to consult that explicitly examines the teaching problems on the field, the court, the rink, and the diamond. Until now. Intended to offer lessons and guidance that are applicable to coaches of any sporting

endeavor including everyone from parent volunteers to professional coaches and private trainers, Lemov brings the powerful science of learning to the arena of sports coaching to create the next generation of championship caliber coaches.

The Framework for Teaching Evaluation Instrument, 2013 Edition -

Charlotte Danielson 2013

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the

enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Habits of Mind Across the Curriculum - Arthur L. Costa 2009-01-15

Distinguished educators Arthur L. Costa and Bena Kallick present this collection of stories by educators around the world who have successfully implemented the habits in their day-to-day teaching in K-12 classrooms. The collective wisdom and experience of these thoughtful practitioners provide readers with insight into the transdisciplinary nature of the 16 Habits of Mind—intelligent behaviors that lead to success in school and the larger world—as well

as model lessons and suggestions for weaving the habits into daily instruction in language arts, music, physical education, social studies, math, foreign language, and other content areas. Readers will come to understand that, far from an "add-on" to the curriculum, the habits are an essential element for helping students at all grade levels successfully deal with the challenges they face in school and beyond. As in all their books on the Habits of Mind, Costa and Kallick have a broad and worthwhile goal in mind. As they say in the concluding chapter of this volume, "If we want a future that is much more thoughtful, vastly more cooperative, greatly more compassionate, and a whole lot more loving, then we have to invent it. That future is in our homes, schools, and classrooms today. The Habits of Mind are the tools we all can use to invent our desired vision of the future."

[The Challenge of Counseling in Middle Schools](#) - Edwin R.

Gerler 1990

This book of readings presents 33 articles that address topics

of importance to counselors who serve middle school students. It was written for counselors already working in middle schools and for individuals who are preparing for careers as middle school counselors. The book will also benefit both elementary school counselors who help children make the transition from elementary to middle school and high school counselors who work with adolescents making the transition from middle school into high school. It deals with how counselors in middle schools can help early adolescents face the challenges of adolescence, noting that middle school counseling programs should focus on preparing students for the increased independence of high school life that is typically accompanied by more social pressures and increased stress. The chapters in this book offer many ideas for helping young people improve their sense of self, their decision-making capabilities, their interpersonal relationships, their academic skills, and their abilities to deal

with stress. Chapters contain articles that have been invited for the book in addition to articles that have been published in various counseling journals. Each chapter contains an introduction by the editors and a collection of articles on a particular topic. Individual chapters focus on: (1) self-discovery; (2) family relationships; (3) peer pressure and drug abuse; (4) stress and suicide; (5) sexual maturation; (6) academic achievement; (7) career exploration; and (8) organizing a middle school counseling program. (NB) **Teacher Evaluation** - Anthony J. Shinkfield 2012-12-06 Teacher Evaluation: Guide to Professional Practice is organized around four dominant, interrelated core issues: professional standards, a guide to applying the Joint Committee's Standards, ten alternative models for the evaluation of teacher performance, and an analysis of these selected models. The book draws heavily on research and development conducted by the Federally funded national

Center for Research on Educational Accountability and Teacher Evaluation (CREATE). The reader will come to grasp the essence of sound teacher evaluation and will be able to apply its principles, facts, ideas, processes, and procedures. Finally, the book invites and assists school professionals and other readers to examine the latest developments in teacher evaluation.

Rethinking Teacher Evaluation in Chicago - Lauren Sartain

2011-11-18

Teacher evaluation is arguably the hottest issue in education right now. Because of Race to the Top, many states and districts around the country are designing and implementing new teacher evaluation systems that--for the first time ever--evaluate teachers based on how much their students learn. However,

there is limited research on how to build an evaluation system centered on classroom observations that can distinguish between effective and ineffective teaching. This report from the University of Chicago Consortium on School Research focuses on Chicago, but the lessons learned have significant applicability to districts across the country. The report is one of the first to provide research-based evidence showing that new teacher observation tools, when accompanied by thoughtful evaluation systems and professional development, can effectively measure teacher effectiveness and provide teachers with feedback on the factors that matter for improving student learning. This is especially relevant for those districts that are implementing the Charlotte Danielson Framework for Teaching, including Arkansas, Delaware, Florida, Idaho, Illinois, New Jersey, New York, South Dakota, Washington, Los Angeles, and Pittsburgh.

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) - Naeyc 2021-08

The long-awaited new edition

of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2)

each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
