How Children Learn - John Holt 2009-04-20
From the preface by Deborah Meier: "We have a
long way to go to make John Holt's dream
available to all children. But his books make it
possible and easier for many of us to join him in
the journey." In this enduring classic, rich with
deep, original insight into the nature of early

learning, John Holt was the first to make clear
that, for small children, "learning is as natural as
breathing." In his delightful book he observes
how children actually learn to talk, to read, to
count, and to reason, and how, as adults, we can
best encourage these natural abilities in our
children.

Libertà e amore - Elena Balsamo 2011-01-01
L'autrice di Sono qui con te ci propone con
questo suo ultimo volume un viaggio attraverso
il tempo e lo spazio per scoprire una nuova
modalità di approccio al bambino, dalla vita
prenatale all'adolescenza: è la visione di Maria
Montessori, che ha dato origine ad un sistema
educativo rivoluzionario diffuso in tutto il mondo
ma ancora poco noto da noi in Italia. Le sue
scuole sono un vero e proprio laboratorio
creativo in cui, in un clima di estremo rispetto e
di autentica libertà di scelta, le potenzialità del
bambino possono svilupparsi e sbocciare in tutta
la loro forza e bellezza. Ma quello montessoriano
non è solo un metodo educativo, è molto di più: è

un modo di guardare il mondo e le creature che lo abitano con gentilezza e amore, nella consapevolezza che siamo tutti parte della stessa grande ragnatela... Elena Balsamo, Scrittrice, insegnante, pediatra, mamma... Una vita dedicata a farsi interprete dei bambini, a dare parola a chi è troppo piccolo per farlo da solo... Specialista in puericoltura, si occupa da anni di pratiche di maternage nelle diverse culture e lavora in particolare a sostegno della coppia madre-bambino nei momenti critici della gravidanza, del parto e dell'allattamento, attraverso strumenti quali l'omeopatia e la floriterapia. Dopo esperienze di viaggi in diversi paesi africani e di lavoro sul campo in Guinea-Bissau, ha dedicato un decennio della sua vita ad attività di formazione all'interno dell'Associazione Interculturale Bambaràn, da lei fondata a Bologna, città in cui vive. Attualmente, oltre a continuare l'attività di medico libero-professionista e l'impegno in ambito formativo sui temi dell'etnopediatria e del maternage

consapevole, in un'ottica prettamente montessoriana, svolgendo corsi e interventi in tutta Italia, si dedica alla grande passione della sua vita: la scrittura. Ha curato il volume Lui,lei,noi (EMI,1994), è coautrice di Mille modi di crescere (Franco Angeli, 2002) e Etnopediatria (Fimp, 2003). Con il Leone Verde ha pubblicato Sono qui con te (2007) e Libertà e Amore (2010); e per i bambini nel 2010 Il latte di mamma sa di fragola, Girotondo intorno al mondo e Il Quaderno del Neonato. Nel 2012 è apparso sempre per i bambini Storia di un piccolo seme.

[An Astrological Guide for Broken Hearts](#) - Silvia Zucca 2019-07-09

NOW A NETFLIX ORIGINAL SERIES Frustrated at the path her life has taken, Alice decides to take control of her personal life using astrology as her guide in this quirky, steamy, and hilarious romantic comedy. Alice Bassi is (a little) over

thirty, single (not by choice), and she can't help but feel that she is failing at this whole adulthood thing. She's stuck in a dead-end job, just found out her ex-boyfriend is engaged to his pregnant girlfriend, and Richard Gere hasn't shown up with flowers and a limo to save her from it all. On one particularly disastrous morning—when Alice would much rather have stayed home, curled up with her favorite rom-coms—she meets Davide Nardi. Handsome yet indecipherable, Davide would be the leading man of Alice's dreams—if only he weren't the “hatchet man” brought in to help streamline production and personnel at the small television network she works for. In the midst of all this, Alice runs into Tio—an actor and astrology expert who is convinced he can turn her life around with a little help from the stars. Skeptical but willing, Alice decides to take Tio's advice and only date men whose Zodiac signs are compatible with hers. Unfortunately, it turns out that astrological affinity doesn't always

guarantee a perfect match, nor prevent a series of terrible dates, disappointments, and awkward surprises. It also doesn't keep Davide from becoming more attractive every day. Perfect for fans of Bridget Jones's Diary and Star-Crossed, An Astrological Guide for Broken Hearts is a witty, sexy, and relatable portrait of a modern woman's search for love and a dream job, only to discover that your destiny isn't always written in the stars.

Maria Montessori - Rita Kramer 2017-05-21
The definitive biography of a physician, feminist, social reformer, educator, and one of the most influential, and controversial women of the 20th century. Maria Montessori effected a worldwide revolution in the classroom. She developed a new method of educating the young and inspired a movement that carried it into every corner of the world. This is the story of the woman behind the public figure—her accomplishments, her ideas, and her passions. Montessori broke the mold imposed on women in the nineteenth

century and forged a new one, first for herself and eventually for those who came after her. Against formidable odds she became the first woman to graduate from the medical school of the University of Rome and then devoted herself to the condition of children considered uneducable at the time. She developed a teaching method that enabled them to do as well as normal children, a method which then led her to found a new kind of school—the Casa dei Bambini, or House of Children—which gained her worldwide fame and still pervades classrooms wherever young children learn. This biography is not only the story of a groundbreaking feminist but a vital chapter in the history of education. “Highly recommended for educators, parents, and moderate feminists who seek inspiration from one of the most accomplished women of this or any other age.”—Publishers Weekly

To Educate the Human Potential - Maria Montessori 2015-10-12

This book is intended to follow Education for a New World and to help teachers to envisage the child's needs after the age of six. We claim that the average boy or girl of twelve years who has been educated till then at one of our schools knows at least as much as the finished High School product of several years' seniority, and the achievement has been at no cost of pain or distortion to body or mind. Rather are our pupils equipped in their whole being for the adventure of life, accustomed to the free exercise of will and judgment, illuminated by imagination and enthusiasm. Only such pupils can exercise

rightly the duties of citizens in a civilised commonwealth. The first four chapters are mainly psychological, showing the changed personality with which the teacher has to deal at six years of age, and the need for a corresponding change of approach. The secret of success is found to lie in the right use of imagination in awakening interest, and the stimulation of seeds of interest already sown by attractive literary and pictorial material, but all correlated to a central idea, of greatly ennobling inspiration—the Cosmic Plan, in which all, consciously or unconsciously, serve the great Purpose of Life. It is shown how the conception of evolution has been modified of late through geological and biological discoveries, so that self-perfection now has to yield precedence to service among the primary natural urges. The next eight chapters show how the Cosmic Plan can be presented to the child, as a thrilling tale of the earth we live in, its many changes through slow ages when water was Nature's chief toiler

for accomplishment of her purposes, how land and sea fought for supremacy, and how equilibrium of elements was achieved, that Life might appear on the stage to play its part in the great drama. Illustrated as it must be by fascinating, charts and diagrams, the creation of earth as we now know it unfolds before the child's imagination, and always with emphasis on the function each agent has to perform in Nature's household, whether consciously or unconsciously, failure in this alone leading to extinction. So the tale proceeds till Palaeolithic Man appears, most significantly traced by the tools he used on his environment rather than by physical remains of so slight a creature. The new element of mind is brought to creation by man, and from that time the children are helped to see the great acceleration that has taken place in evolution. They learn to reverence the earliest pioneers, who toiled for purposes unknown to them but now to be recognised. Nomadic men and settlers alike contributed to build up early

communities, and by interchanges of war and peace to share and spread social amenities. From chapter thirteen brief descriptions are given of some of the earliest civilizations, particularly with a view to their impacts on each other, showing human society as slowly organising itself towards unity, just as, in the individual human being, organs are built around separate centres of interest, to be later connected by the blood-circulatory system and the nerves, into an integrated human organism. So the child is led, by review of some of the most thrilling epochs of world-history, to see that so far humanity has been in an embryonic stage, and that it is just now emerging into true birth, able to consciously realise its true unity and function. The last chapters go back to the psychological point of view, urging on educators the supreme importance, to the nation and to the world, of the tasks imposed on them. Not in the service of any political or social creed should the teacher work, but in the service of the complete

human being, able to exercise in freedom a self-disciplined will and judgment, unperverted by prejudice and undistorted by fear.

Roma in transizione - Paolo Carusi

2013-07-10T00:00:00+02:00

I primi anni del Novecento rappresentarono per la capitale del Regno d'Italia un periodo di rapida e sostanziale trasformazione. Nel momento in cui il Paese si avviava a una nuova fase politico-sociale - e a uno squilibrato decollo industriale - Roma esemplificava le contraddizioni di un tessuto nazionale in bilico tra passato e modernità, tra sviluppo e arretratezza, tra società di massa e antiche reti di notabili. Il volume, attraverso un approccio multidisciplinare, cerca di cogliere alcuni aspetti di questa fondamentale transizione, focalizzando l'attenzione sull'emergere di nuove istanze provenienti da un territorio cittadino e provinciale in rapido mutamento ambientale e sulla pressante richiesta dei ceti popolari di incidere sui processi decisionali politico-

amministrativi. In tal senso l'osservatorio privilegiato è il mondo del lavoro, ma vengono studiati anche altri settori chiave nel processo di integrazione delle masse, come l'istruzione professionale, l'assistenza nei quartieri popolari, la presenza femminile, l'associazionismo studentesco.

Finnish Lessons - Pasi Sahlberg 2014

It is now time to break down the ideology of exceptionalism in the United States and other Anglo-American nations if we are to develop

reforms that will truly inspire our teachers to improve learning for all our students—especially those who struggle the most. In that essential quest, Pasi Sahlberg is undoubtedly one of the very best teachers of all. From the Foreword by Andy Hargreaves, Lynch School of Education, Boston College Finnish Lessons is a first-hand, comprehensive account of how Finland built a world-class education system during the past three decades. The author traces the evolution of education policies in Finland and highlights how they differ from the United States and other industrialized countries. He shows how rather than relying on competition, choice, and external testing of students, education reforms in Finland focus on professionalizing teachers' work, developing instructional leadership in schools, and enhancing trust in teachers and schools. This book details the complexity of educational change and encourages educators and policymakers to develop effective solutions for their own districts and schools.
