The Cambridge Companion to Brass Instruments - Trevor Herbert 1997-10-13

This Companion covers many diverse aspects of brass instruments and in such detail. It provides an overview of the history of brass instruments, and their technical and musical development.

Although the greatest part of the volume is devoted to the western art music tradition, with chapters covering topics from the medieval to the contemporary periods, there are important contributions on the ancient world, non-western music, vernacular and popular traditions and the rise of jazz. Despite the breadth of its narrative, the book is rich in detail, with an extensive glossary and bibliography. The editors are two of the most respected names in the world of brass

performance and scholarship, and the list of contributors includes the names of many of the world's most prestigious scholars and performers on brass instruments.

The Tuba Source Book - R. Winston Morris 1996

A massive research effort by leading professional tubists in 36 countries presents a comprehensive picture of the tuba. The "baby" of the orchestra, the tuba was "born" in 1835. The first major solo compositions for the instrument appeared only in the 1950s, but in the next forty years the body of literature for the tuba increased at an amazing pace. The first several chapters of The Tuba Source Book identify that literature by ensemble type. They provide

bibliographic data and descriptions of 1,900 pieces for tuba and keyboard, 234 for tuba and band, 1,056 for tuba ensemble, 106 for tuba and strings, and 258 for unaccompanied tuba, as well as hundreds of works in other categories and 456 methods and studies. The chapter entitled "Recommended Basic Repertoire" is subdivided by level, from high school through professional, and "Orchestral Excerpts," in addition to listing 146 works that every tubist should know, includes advice on how to audition. The Tuba Source Book also offers an extensive discography (400 entries), a very complete bibliography, biographies of professional tubists, career advice, guidelines for composing and arranging music for the tuba, and lists of instrument builders and sources of tuba equipment. This encyclopedic volume fills a need for tubists at all levels of study and accomplishment. It is invaluable for composers, music educators, conductors, administrators, librarians, historians, and everyone who enjoys the art of tuba performance.

Brass Bands of the British Isles 1800-2018 - a historical directory - Gavin Holman

Of the many brass bands that have flourished in Britain and Ireland over the last 200 years very few have documented records covering their history. This directory is an attempt to collect together information about such bands and make it available to all. Over 19,600 bands are recorded here, with some 10,600 additional cross references for alternative or previous names. This volume supersedes the earlier "British Brass Bands - a Historical Directory" (2016) and includes some 1,400 bands from the island of Ireland. A separate work is in preparation covering brass bands beyond the British Isles. A separate appendix lists the brass bands in each county

The Cambridge Encyclopedia of Brass Instruments - Trevor Herbert 2019-09-19

Some thirty-two experts from fifteen countries join three of the world's leading authorities on the design, manufacture, performance and history of brass musical instruments in this first major encyclopaedia on the subject. It includes over one hundred illustrations, and gives attention to every brass instrument which has been regularly used, with information about the way they are played, the uses to which they have

been put, and the importance they have had in classical music, sacred rituals, popular music, jazz, brass bands and the bands of the military. There are specialist entries covering every inhabited region of the globe and essays on the methods that experts have used to study and understand brass instruments. The encyclopaedia spans the entire period from antiquity to modern times, with new and unfamiliar material that takes advantage of the latest research. From Abblasen to Zorsi Trombetta da Modon, this is the definitive guide for students, academics, musicians and music lovers.

Technical Studies for the Cornet - Herbert L. Clarke

There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help to me is surely good for other Cornet Players. You cannot expect to attain the highest point of excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are

few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.

Guide to the Euphonium Repertoire - R. Winston Morris 2007-03-01

Guide to the Euphonium Repertoire is the most definitive publication on the status of the euphonium in the history of this often misunderstood and frequently under-appreciated instrument. This volume documents the rich history, the wealth of repertoire, and the incredible discography of the euphonium. Music educators, composers/arrangers, instrument historians, performers on other instruments, and students of the euphonium (baritone horn, tenor tuba, etc.) will find the exhaustive research evident in this volume's pages to be compelling and comprehensive. Contributors are Lloyd Bone, Brian L. Bowman, Neal Corwell, Adam Frey, Marc Dickman, Bryce Edwards, Seth D. Fletcher, Carroll Gotcher, Atticus Hensley, Lisa M. Hocking, Sharon Huff, Kenneth R. Kroesche, R. Winston Morris, John Mueller, Michael B. O'Connor, Eric Paull, Joseph Skillen, Kelly

Thomas, Demondrae Thurman, Matthew J. Tropman, and Mark J. Walker.

A College Level Tuba Curriculum - Geoffrey Ian Whitehead 2003

This study begins with a brief history of the tuba, focusing on its development from its instrumental precursors, as well as the development of solo and ensemble literature for the tuba. The second chapter contains an in-depth study of pedagogical techniques and materials required for the implementation of a college level tuba program. It contains essential technical information such as tone production articulation concepts, etc., as well as essential administrative information such as grading procedures, equipment choices, etc. The final section contains annotated tuba literature lists, divided into solo, orchestral, band, and etude works, and a listing of solo tuba recordings.
