Charter Schools - Steve P. Jefferson 2004

The purpose of this book was to describe the variables that contributed to the establishment of a charter school in an urban Arizona and rural California school district, noting the similarities and dissimilarities and disclosing the factors used to justify implementation of the Montessori theory of education. The secondary purpose of this book was to describe the guidelines for maintaining a charter school, the evaluation methods and factors used in the school's unique experience with staff development. The two schools experienced many similarities when the same variables were applied to both schools. As a result, the stakeholders of both schools used the principles of the organizational theory area of empowerment to implement choices in curriculum. This book provides an insight for parents, teachers, and community leaders to develop strategies by utilizing the same principles to meet the educational needs of children.

Research-Based Unit and Lesson Planning - Marie Menna Pagliaro 2012-01-16

By integrating the best of current research and practice in curriculum planning this book presents that comprehensive topic in a manageable form. Examples throughout are representative of different grade levels and subjects areas. It should be understood at the outset that the content offered for curriculum planning is not a rigid prescriptive formula but a careful and purposeful thought process that must be considered to obtain optimal results. In addition to developing knowledge about curriculum and instructional planning (what teachers should know), this book offers an innovative method for translating that knowledge into performance (what teachers are able to do). Knowledge is implemented by the use of coaching rubrics, sets of criteria for developing performance. Though readers will receive a thorough background in the planning process just from the content itself, its potential will be fully realized when readers also use the coaching rubrics.

Between 2002 and 2016, the federal government, state governments, and school districts undertook unprecedented measures to improve the lowest-performing schools. This book draws on dozens of actual examples to illustrate the wide range of interventions adopted over this time period. Among the initiatives examined in depth are efforts by states to provide technical assistance to schools and districts, offer students educational choices, engage communities in school improvement, take over low-performing schools and districts, create special state-run school districts, and close failing schools. Also discussed are district-initiated measures, including programs to standardize instruction, innovative approaches to raising student achievement, and restructuring of district operations. The book concludes with an assessment of 15 years of turnaround initiatives and recommendations based on lessons learned over this time period.

Common Core Meets Education Reform - Frederick M. Hess 2014

How can the Common Core complement and not conflict with school improvement efforts already at work across the United States? How can it be seamlessly integrated into accountability systems, teacher preparation and development, charter schools, and educational technology? This timely volume brings together prominent scholars and policy analysts to examine the pressing issues that will mark Common Core implementation. Whether or not you agree with the standards, the Common Core is coming, and this book will help policymakers, practitioners, and other stakeholders anticipate the challenges and take steps to address them. "Common Core Meets Education Reform raises the hard questions about implementing and sustaining the Common Core State Standards so they don't end up in the dustbin of abandoned public education reforms. These new standards can help students enormously in becoming problem solvers and critical thinkers—which is essential in the 21st century—but only if teachers become engaged in the rollout, get the support they need, and the fixation on high-stakes testing gives way to a fixation on learning."

—Randi Weingarten, president, American Federation of Teachers "Adopting the Common Core in a mad dash for federal gold, policymakers across the country blew right past critical questions about how they'd implement the thing. This volume, in stark contrast, meticulously studies the road ahead, seeking out tripwires, pitfalls, and boulders, making it a must-read for anyone who hopes to avoid total Common Core disaster." —Neal McCluskey, associate director, Center for Educational Freedom, Cato Institute, Washington, DC "This balanced, wide-ranging, and deeply informed book is certain to guide educators and reformers through a complex time of transition for U.S. education. But it also turns out to be timely and clarifying as politicians battle over ambitious new academic standards with plenty of heat and smoke but appallingly little illumination. Thanks to the authors for turning on some lights!" —Chester E. Finn, Jr.,

Only in New Orleans - Luis Mirón 2015-07-22

With 2015 marking the 10th commemoration of Hurricane Katrina, education reform in New Orleans continues to garner substantial local, national, and international attention. Advocates and critics alike have continued to cite test scores, new school providers, and different theories of governance in making multiple arguments for and against how contemporary education policy is shaping public education and its role in the rebuilding of the city. Rather than trying to provide a single, unified account of education reform in New Orleans, the chapters in this volume provide multiple ways of approaching some of the most significant questions around school choice and educational equity that have arisen in the years since Katrina. This collection of research articles, essays, and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the city's public schools toward a new market-based model was shaped by many local, historically specific conditions. In consequence, while the city's schools have been both heralded as a model for other cities and derided as a lesson in the limits of market-based reform, the experience of education reform that has taken place in the city - and its impacts on the lives of students, families, and educators - could have happened only in New Orleans.

Radical Collaborations for Learning: School Librarians as Change Agents - Violet H. Harada 2020-07-01

Librarians can be effective catalysts and vital connectors who facilitate successful partnerships that enrich

students' lives—"radical collaborations" that have deep and far-reaching impact. Envisioning schools as learning organizations requires collaborating with the greater communities as an integral part of the school's dynamic. How can librarians be key players in realizing this concept of schools? This book addresses this essential question, as well as how librarians can serve as catalysts in reaching beyond the traditional school to form alliances and partnerships with a range of community organizations and agencies, and how these collaborations result in transformative learning experiences not only for the students but for the adults who work together as well. The authors provide examples of schools where librarians, library directors, and educators are joining together in these types of unique partnerships. Chapters are authored by library professionals, who describe what stimulates and motivates these partnerships and how they are collaboratively developed and sustained. This publication will be a catalyst that will inspire readers to grow similar alliances in their own schools and districts among public libraries, colleges, arts foundations, nonprofit cultural organizations, and STEM-related agencies. Defines a unique and critical role for today's school librarians Describes the rationale for forming distinctive collaborations to enhance student learning Features projects currently being implemented and how to foster collaborations

Adventures of Charter School Creators - Terrence E. Deal 2004

Adventures of Charter School Creators takes the reader inside the world of individual educational entrepreneurs who have created charter schools from scratch and lived to tell about it. Drawn from examples across the country, individuals (and a few teams) tell their stories of the victories they enjoyed and the defeats they overcame to create their schools. They include an Episcopal priest working in the Pico-Union community of Los Angeles, a corporate attorney in Miami, a manpower training specialist in East

Saint Louis, the chief financial officer of a major African American church in New York City, a retired military officer in North Carolina, as well as experienced school teachers and administrators. From these stories Deal and Hentschke extract and examine the issues of school leadership that are peculiar to those school leaders who have chosen to create schools from scratch. This book: Examines entrepreneurial leadership as a concrete manifestation of school leadership. Sheds light on the concrete differences between leadership in relatively autonomous start-up charters and the relatively dependent traditional schools. Anchors charter school leadership within the context of general (non-education) leadership and distinguishes it from what is typically associated with school leadership today. It describes: The general forces in society which are pushing public K-12 education into market-based initiatives. The general leadership issues of any break-away or start-up enterprise. Will be of interest to all educators.

Education Reform in the Twenty-First Century - Erinn Brooks 2020-11-04

This book explores how, why, and with what consequences one no-excuses charter network marketizes teaching and learning, through the author's 1000 hours of covert participant observation at a network charter school. In her research, Brooks found that the "AAG" (pseudonym) network re-conceptualized teaching by urging staff to envision their careers in corporate education rather than in classroom teaching. While some employees received a boost up the corporate ladder, others found themselves being pushed out of the organization. Despite AAG's equity-conscious discourse, administrators emphasized controlling student behavior as a central measure of teaching effectiveness. Brooks develops the concept of creative compliance to describe the most successful teachers' tactics for adhering to formal policies strategically, bending the rules in order to survive and advance in a workplace fraught with competition and insecurity.

The Charter School Experience - Michael Bitz 2016-10-26

The Charter School Experience: Voices from the Field is a unique book that presents readers with balanced perspectives from teachers, students, parents, and school leaders at charter schools across the United States. Through first-person narratives, the book highlights the delicate intricacies of what makes a school charter succeed or fail. Unlike a book written by academics far removed from the practice of education, this book gives voice to the people most impacted by charters: the families and educators who have embraced these schools for better or worse, and who now have enriching stories to tell. These experiences—embodied in introspective and moving chapters—go well beyond the news headlines and politicized studies that have spotlighted charters in the past. In this book, teachers highlight their successes and failures in charter school classrooms, parents explore decisions to enroll in charters, school leaders discuss the social missions of charters, and students write about how charter schools have impacted their lives. The result is an engaging collection of ideas for a wide audience, including people researching, attending, and making policy on charter schools in the United States and around the world.
