*Modern Architecture and Climate* - Daniel A. Barber 2020-07-07

How climate influenced the design strategies of modernist architects *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate-mediating strategies into their designs, and shows how regional approaches to climate adaptability were essential to the development of modern architecture. Focusing on the period surrounding World War II—before fossil-fuel powered air-conditioning became widely available—Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design, materials, and shading systems as means of interior climate control. He looks at projects by well-known architects such as Richard Neutra, Le Corbusier, Lúcio Costa, Mies van der Rohe, and Skidmore, Owings, and Merrill, and

the work of climate-focused architects such as MMM Roberto, Olgyay and Olgyay, and Cliff May. Drawing on the editorial projects of James Marston Fitch, Elizabeth Gordon, and others, he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge, alongside the work of meteorologists, physicists, engineers, and social scientists. Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design. Extensively illustrated with archival material, *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate, showcasing designs from Latin America, Europe, the United States, the Middle East, and Africa. This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever-increasing carbon emissions from the mechanical cooling systems of buildings, and offers a historical foundation

for today's zero-carbon design.

**Mid-Air: Two Novellas** - Victoria Shorr  
2022-05-17

Fate is explored in the fall and rise of two twentieth-century American families. Victoria Shorr's remarkable gift for depicting the inner lives of complex characters shines in two

powerful explorations of family, ambition, class, and status. In “Great Uncle Edward,” a family gathers for dinner. At ninety-three, Great Uncle Edward commands the table in his three-piece suit; Cousin Russell attended both Harvard and Yale but is now reduced to selling off the family books; sisters Betty and Molly are caught between ghosts of a storied past and creeping destitution. These lives are signposts along the downward spiral of an old aristocracy. “Cleveland Auto Wrecking” introduces Sam White, an immigrant from eastern Europe. He cannot read but has a gift for math and an instinct for the value of junk. We follow his clan through the Depression to the postwar boom in the West, where their fortunes soar, creating new tests of loyalty. Taken together, these two novellas might be the reverse images of the American dream in the twentieth century. They ask to what degree, in the face of such powerful forces as love, death, and social constraints, do any of us have control over our own lives.

*Air Traffic* - Gregory Pardlo 2019-03-19

From the beloved Pulitzer Prize-winning poet: an extraordinary memoir and blistering meditation on fatherhood, race, addiction, and ambition.

Gregory Pardlo's father was a brilliant and charismatic man--a leading labor organizer who presided over a happy suburban family of four.

But when he loses his job following the famous air traffic controllers' strike of 1981, he succumbs to addiction and exhausts the family's money on more and more ostentatious whims. In the face of this troubling model and disillusioned presence in the household, young Gregory rebels.

Struggling to distinguish himself on his own terms, he hustles off to Marine Corps boot camp. He moves across the world, returning to the United States only to take a job as a manager-cum-barfly at his family's jazz club. *Air Traffic* follows Gregory as he builds a life that honors his history without allowing it to define

his future. Slowly, he embraces the challenges of being a poet, a son, and a father as he enters recovery for alcoholism and tends to his family.

In this memoir, written in lyrical and sparkling prose, Gregory tries to free himself from the overwhelming expectations of race and class, and from the tempting yet ruinous legacy of American masculinity. *Air Traffic* is a richly realized, deeply felt ode to one man's remarkable father, to fatherhood, and to the frustrating yet redemptive ties of family. It is also a scrupulous, searing examination of how manhood can be fashioned in our cultural landscape.

and Frederick Farrell. Bachelard uses his extensive knowledge of the poetry of Poe, Blake, Shelley, and Nietzsche to amplify the images of the airy elements. THE BACHELARD TRANSLATIONS are the inspiration of Joanne H. Stroud, Director of Publications for The Dallas Institute of Humanities and Culture, who in 1981 contracted with Jose Corti to publish in English the untranslated works of Bachelard on the imagination. From 1929 to 1962 he authored twenty-three books addressing his dual concerns, the philosophy of science and the analysis of the imagination of matter. The influence of his thought can be felt in all disciplines of the humanities - art, architecture, literature, language, poetics, philosophy, and depth psychology. His teaching career included posts at the College de Bar-sur-Aube, the University of Dijon, and from 1940 to 1962 the chair of history and philosophy of science at the

Sorbonne. One of the amphitheatres of the Sorbonne is called "L'Amphi Gaston Bachelard," an honor Bachelard shared with Descartes and Richelieu. He received the Grand Prix National Lettres in 1961-one of only three philosophers ever to have achieved this honor. The influence of his thought can be felt in all disciplines of the humanities-art, architecture, literature, poetics, psychology, philosophy, and language."

**When Breath Becomes Air** - Paul Kalanithi  
2016-01-12

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational

Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this

profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

**A Chill in the Air** - Iris Origo 2018-08-07

In 1939 it was not a foregone conclusion that Mussolini would enter World War II on the side of Hitler. In this previously unpublished and only recently discovered diary, Iris Origo, author of the classic *War in Val d'Orcia*, provides a vivid

account of how Mussolini decided on a course of action that would devastate his country and ultimately destroy his regime. Though the British-born Origo lived with her Italian husband on an estate in a remote part of Tuscany, she was supremely well-connected and regularly in touch with intellectual and diplomatic circles in Rome, where her godfather, William Phillips, was the American ambassador. Her diary describes the Fascist government's growing infatuation with Nazi Germany as Hitler's armies marched triumphantly across Europe and the campaign of propaganda and intimidation that was mounted in support of its new aims. The book ends with the birth of Origo's daughter and Origo's decision to go to Rome to work with prisoners of war at the Italian Red Cross. Together with *War in Val d'Orcia*, *A Chill in the Air* offers an indispensable record of Italy at war as well as a thrilling story of a formidable woman's transformation from observer to actor at a great historical turning point.

### **Gods of the Upper Air** - Charles King

2020-07-14

2020 Anisfield-Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award-winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it—a sweeping chronicle of discovery and the fascinating origin story of our multicultural world. A century ago, everyone knew that people were fated by their race, sex, and nationality to be more or less intelligent, nurturing, or warlike. But Columbia University professor Franz Boas looked at the data and decided everyone was wrong. Racial categories, he insisted, were biological fictions. Cultures did not come in neat packages labeled "primitive" or "advanced." What counted as a family, a good meal, or even

common sense was a product of history and circumstance, not of nature. In *Gods of the Upper Air*, a masterful narrative history of radical ideas and passionate lives, Charles King shows how these intuitions led to a fundamental reimagining of human diversity. Boas's students were some of the century's most colorful figures and unsung visionaries: Margaret Mead, the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time; Ruth Benedict, the great love of Mead's life, whose research shaped post-Second World War Japan; Ella Deloria, the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains; and Zora Neale Hurston, whose studies under Boas fed directly into her now classic novel, *Their Eyes Were Watching God*. Together, they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets, and unearthed an essential fact buried by centuries

of prejudice: that humanity is an undivided whole. Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today. Rich in drama, conflict, friendship, and love, *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind.

**The Book of Air** - Steven Forrest 2020-03-27  
In The Book of Air, award-winning astrologer Steven Forrest continues his investigation of the four elements which began with The Book of Fire and The Book of Earth. In this third volume of the series, he focuses on what seems to be a very simple idea: the fine art of truly paying attention. He writes, "Air is what connects our hearts and our minds to the world around us. Astrologically - but also in plain speech - it is the linking element, telegraphing an endless stream of information to us - and letting us send a few telegrams in return. Air makes a mockery of the delusion that we are separate from each other - or, for that matter, from anything else. Air connects. It is what allows us to pay attention, and perhaps to create some good reasons for other people to pay attention to us." In these pages, Forrest offers a detailed exploration of Gemini, Libra, and Aquarius, along with their planetary rulers and their associated astrological houses: the third, the seventh, and the eleventh.

Together, these powerful words in astrology's magical vocabulary are the key to nothing less than aligning your mind with reality as it actually is.

**Into Thin Air** - Jon Krakauer 1998-11-12  
#1 NATIONAL BESTSELLER • "A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse judgment and of heartbreaking heroism." —PEOPLE A bank of clouds was assembling on the not-so-distant horizon, but journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that "suggested that a murderous storm was bearing down." He was wrong. The storm, which claimed five lives and left countless more—including Krakauer's—in guilt-ridden disarray, would also provide the impetus for *Into Thin Air*, Krakauer's epic account of the May 1996 disaster. By writing *Into Thin Air*, Krakauer may have hoped to exorcise some of his own demons and lay to rest some of the painful questions that still surround

the event. He takes great pains to provide a balanced picture of the people and events he witnessed and gives due credit to the tireless and dedicated Sherpas. He also avoids blasting easy targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But for Krakauer himself, further interviews and investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded and even generous assessment of others' actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new

postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and Everest guide Anatoli Boukreev in the wake of the tragedy. "I have no doubt that Boukreev's intentions were good on summit day," writes Krakauer in the postscript, dated August 1999. "What disturbs me, though, was Boukreev's refusal to acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients." As usual, Krakauer supports his points with dogged research and a good dose of humility. But rather than continue the heated discourse that has raged since Into Thin Air's denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G. Weston De Walt, who coauthored The Climb, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last conversation with the late Boukreev, in which the two weathered climbers

agreed to disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in Literature from the American Academy of Arts and Letters--a prestigious prize intended "to honor writers of exceptional accomplishment." According to the Academy's citation, "Krakauer combines the tenacity and courage of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercialization of what was once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of nature and the devastating effects of its lure on a young and

curious mind."
