*Reconsidering Constitutional Formation II
Decisive Constitutional Normativity* - Ulrike
Müßig 2018-05-25

This second volume of ReConFort, published open access, addresses the decisive role of constitutional normativity, and focuses on discourses concerning the legal role of constitutional norms. Taken together with ReConFort I (National Sovereignty), it calls for an innovative reassessment of constitutional history drawing on key categories to convey the legal nature of the constitution itself (national sovereignty, precedence, justiciability of power, judiciary as constituted power). In the late 18th and early 19th centuries, constitutional

normativity began to complete the legal fixation of the entire political order. This juridification in one constitutional text resulted in a conceptual differentiation from ordinary law, which extends to alterability and justiciability. The early expressions of this 'new order of the ages' suggest an unprecedented and irremediable break with European legal tradition, be it with British colonial governance or the French ancien régime. In fact, while the shift to constitutions as a hierarchically 'higher' form of positive law was a revolutionary change, it also drew upon old liberties. The American constitutional discourse, which was itself heavily influenced by British common law, in turn served as an inspiration for a variety of constitutional experiments - from the French Revolution to Napoleon's downfall, in the halls of the Frankfurt Assembly, on the road to a unified Italy, and in the later theoretical discourse of twentieth-century Austria. If the constitution states the legal rules for the law-making process, then its Kelsian primacy is

mandatory. Also included in this volume are the French originals and English translations of two vital documents. The first - Emmanuel Joseph Sieyès' *Du Jury Constitutionnaire* (1795) - highlights an early attempt to reconcile the democratic values of the French Revolution with the pragmatic need to legally protect the Revolution. The second - the 1812 draft of the Constitution of the Kingdom of Poland - presents the 'constitutional propaganda' of the Russian Tsar Alexander I to bargain for the support of the Lithuanian and Polish nobility. These documents open new avenues of research into Europe's constitutional history: one replete with diverse contexts and national experiences, but above all an overarching motif of constitutional decisiveness that served to complete the juridification of sovereignty. Courtly Song in Late Sixteenth-Century France - Jeanice Brooks 2000

In the late sixteenth century, the French royal court was mobile. To distinguish itself from the rest of society, it depended more on its cultural practices and attitudes than on the royal and aristocratic palaces it inhabited. Using courtly song-or the air de cour-as a window, Jeanice Brooks offers an unprecedented look into the culture of this itinerant institution. Brooks concentrates on a period in which the court's importance in projecting the symbolic centrality of monarchy was growing rapidly and considers the role of the air in defining patronage hierarchies at court and in enhancing courtly

visions of masculine and feminine virtue. Her study illuminates the court's relationship to the world beyond its own confines, represented first by Italy, then by the countryside. In addition to the 40 editions of airs de cour printed between 1559 and 1589, Brooks draws on memoirs, literary works, and iconographic evidence to present a rounded vision of French Renaissance

culture. The first book-length examination of the history of air de cour, this work also sheds important new light on a formative moment in French history.
