The Nordic Languages - Oskar Bandle 2002

The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism, encompassing all aspects of actual methodology. Moreover it combines diachronic with synchronic-systematic aspects, longitudinal sections with cross-sections (periods such as Old Norse, transition from Old Norse to Early Modern Nordic, Early Modern Nordic 1550-1800 and so on). The description of Nordic language history is built upon a comprehensive collection of linguistic data; it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries. The organization of the book combines a central part on the detailed chronological developments and some chapters of a more general character: chapters on theory and methodology in the beginning and on overlapping spatio-temporal topics in the end.

Writing in Nonstandard English - Irma Taavitsainen 2000-02-15

This book investigates linguistic variation as a complex continuum of language use from standard to nonstandard. In our view, these notions can only be established through mutual definition, and they cannot exist without the opposite pole. What is considered standard English changes according to the approach at hand, and the nonstandard changes accordingly. This book offers an interdisciplinary and multifaceted approach to this central theme of wide interest. The articles approach writing in nonstandard language through various disciplines and methodologies: sociolinguistics, pragmatics, historical linguistics, dialectology, corpus linguistics, and ideological and political points of view. The theories and methods from these fields are applied to material that ranges from nonliterary writing to canonized authors. Dialects, regional varieties and worldwide Englishes are also addressed.

Potterism - Dame Rose Macaulay 2016-09-01

"CHAPTER I POTTERS Johnny and Jane Potter, being twins, went through Oxford together. Johnny came up from Rugby and Jane from Roedean. Johnny was at Balliol and Jane at Somerville. Both, having ambitions for literary careers, took the Honours School of English Language and Literature. They were ordinary enough young people; clever without being brilliant, nice-looking without being handsome, active without being athletic, keen without being earnest, popular without being leaders, open-handed without being generous, as revolutionary, as selfish, and as intellectually snobbish as was proper to their years, and inclined to be jealous one of the other, but linked together by common tastes and by a deep and bitter distaste for their father's newspapers, which were many, and for their mother's novels, which were more. These were, indeed, not fit for perusal at Somerville and Balliol. The danger had been that Somerville and Balliol, till they knew you well, should not know you knew it. In their first year, the mother of Johnny and Jane ('Leila Yorke, ' with 'Mrs. Potter' in brackets after it), had, after spending Eights Week at Oxford, [...]."

Regions in Europe - Patrick Le Gales 2006-02-27

Regions in Europe explores the state of regional politics in an increasingly integrated Europe. It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox. In doing so this study locates regions in relation to European integration, globalisation, the nation state, local government, and comparative and national perspectives. Using case studies of the main players in Europe including: * Germany * France * UK * Italy * Spain * the Netherlands * Belgium. the contributors show how and why European regions remain remarkably weak in European governance.

Acidification is one of the most serious environmental problems - especially in Sweden, which suffers most from the consequences of acid rain. Besides international negotiations to reduce sulphur emissions - 85% of the acid load on Sweden can be traced to emissions from outside the country itself - the Swedish Government has employed large-scale, operative liming activities to counteract acidification of surface waters. The scientific results show that - although acidification cannot be solved by liming alone - the measures taken resulted in substantial improvements to around 8,000 Swedish lakes and watercourses. The idea is that other countries affected by acidification may also profit from this experience.
