The Oxford Handbook of the Abrahamic Religions - Adam Silverstein 2015-10-01

The Oxford Handbook of the Abrahamic Religions includes authoritative yet accessible

studies on a wide variety of topics dealing comparatively with Judaism, Christianity, and Islam, as well as with the interactions between the adherents of these religions throughout history. The comparative study of the Abrahamic Religions has been undertaken for many centuries. More often than not, these studies reflected a polemical rather than an ecumenical approach to the topic. Since the nineteenth century, the comparative study of the Abrahamic Religions has not been pursued either intensively or systematically, and it is only recently that the comparative study of Judaism, Christianity, and Islam has received more serious attention. This volume contributes to the emergence and development of the comparative study of the Abrahamic religions, a discipline which is now in its formative stages. This Handbook includes both critical and supportive perspectives on the very concept of the Abrahamic religions and discussions on the role of the figure of Abraham in these religions. It

features 32 essays, by the foremost scholars in the field, on the historical interactions between Abrahamic communities; on Holy Scriptures and their interpretation; on conceptions of religious history; on various topics and strands of religious thought, such as monotheism and mysticism; on rituals of prayer, purity, and sainthood, on love in the three religions and on fundamentalism. The volume concludes with three epilogues written by three influential figures in the Christian, Jewish, and Muslim communities, to provide a broader perspective on the comparative study of the Abrahamic religions. This ground-breaking work introduces readers to the challenges and rewards of studying these three religions together.

Pre-Incident Indicators of Terrorist Incidents -

Brent L. Smith 2011-01

This is a print on demand edition of a hard to find publication. Explores whether sufficient

data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
