Wallet Activism - Tanja Hester
2021-11-16

How do we vote with our dollars, not just to make ourselves feel good, but to make a real difference? Wallet Activism challenges you to rethink your financial power so can feel confident spending, earning, and saving money in ways that align with your values. While we call the American system a democracy, capitalism is the far more powerful force in our lives. The greatest power we have—especially when political leaders won't move quickly enough—is how we use our money: where we shop, what we buy, where we live, what institutions we entrust with our

money, who we work for, and where we donate determines the trajectory of our society and our planet. While our votes and voices are essential, too, Wallet Activism helps you use your money for real impact. It can feel overwhelming to determine “the right way” to spend: a choice that might seem beneficial to the environment may have unintended consequences that hurt people. And marketers are constantly lying to you, making it hard to know what choice is best. Wallet Activism empowers us to vote with our wallets by making sense of all the information coming at us, and teaching us to cultivate a more holistic mindset that considers the complex, interrelated ecosystems of people and the planet together, not as opposing forces. From Tanja Hester, Our Next Life blogger and author of Work Optional, comes the mindset-shifting guide to help you put your money where your values are. Wallet Activism is not a list of dos and don'ts that will soon become outdated, nor does it

call for anti-consumerist perfection. Instead, it goes beyond simple purchasing decisions to explore:

- The impacts a financial decision can have across society and the environment
- How to create a personal spending philosophy based on your values
- Practical questions to quickly assess the “goodness” of a product or an entity you may buy from
- The ethics of earning money, choosing what foods to eat, employing others, investing responsibly, choosing where to live, and giving money away

For anyone interested in leaving the world better than you found it, *Wallet Activism* helps you build habits that will make your money matter.

GENRE: Children's Adventure
(An Unofficial Minecraft Book for Kids Ages 9 - 12 (Preteen)
Book 1: Tom's Guide Bill washed ashore to an unknown island completely devoid of any

form of humans or civilization. At first he was worried at the sheer emptiness of the place, how was one to survive in the wild? As a modern man, Bill is worried of his survival and safety. It's quickly changed when he stumbles upon an odd book. Placed on a pedestal, it's certainly hoping for attention. Bill takes the book and finds out that a person named Tom had written the book. What's even more surprising is that the book contained numerous entries about surviving in this unknown island. Bill is unsure if he should trust the book but gives it a try. As the only one on the island, Bill strives to survive and overcome the odds that a life in the wilds has for him. With monsters lurking about in the dark, an inexperienced man with so little knowledge can only get so far. Slowly but surely, Bill tries to make his mark on the island and builds a home for himself in the island. Armed only with the knowledge written by Tom and the mystery of the island, can Bill survive long enough to get out of the island? Will he be

able to fend off the beasts that make their way into his makeshift home at night or will he succumb to the treacherous nature of the unknown island? Only Tom's guide can help him on his journey, or will it be his fall? Book 2: The Mysterious Island Bill has just begun to get used to the life alone in the island. While it's not the most ideal way of life for him, a man must learn to survive on his own. Tom's journal has become his greatest companion through the days, as a wellspring of knowledge and guide that make his life in the island easier than one can imagine. Home is still a place that Bill wants to go back to and he still dreams of his life before the island. One day, he stumbles upon some visiting natives, a pair of tribal individuals who were visiting to gather some goods from the island. Bill asks for their aid to get back home but alas, it's due to the island's power that Bill can't go home just yet. In order to break the series of misfortune, Bill must find Tom in order to give the journal

back; and only then can Bill truly get home. However, the big question is, where is Tom? With so many secrets sprawling about in the island and the promise of home becoming more and more complicated, Bill must rise to the occasion to prove that he can get through the obstacles presented to him. Book 3: The Journey Ends Bill has made his way through the Nether. Guided only by the hearsay of the villagers along with his gut feeling, Bill must wade through numerous undead and walk through the thin paths of land between lava. No matter how many times, Bill wakes up to the Nether, it will never grow on him. Despite that, his drive to get home gives him the willpower to press onwards. With skeletons and endermen and fortresses to explore, there are surely a lot of things on Bill's plate. Armed with the weapons he's crafted along with the guidance of what he's learned from the past few days, Bill tries his best to outwit all the dangers of the Nether. Had he prepared enough for this

journey? Will he be able to find Tom in due time? And if he does manage to find the writer of the journal, can they escape the treacherous nature of the beasts of Nether? Playing with the Past -

Matthew Wilhelm Kapell

2013-10-24

Game Studies is a rapidly growing area of contemporary

scholarship, yet volumes in the area have tended to focus on more general issues. With *Playing with the Past*, game studies is taken to the next level by offering a specific and detailed analysis of one area of digital game play -- the representation of history. The collection focuses on the ways in which gamers engage with, play with, recreate, subvert, reverse and direct the historical past, and what effect this has on the ways in which we go about constructing the present or imagining a future. What can World War Two strategy games teach us about the reality of this complex and multifaceted period? Do the possibilities of playing with the past change the way we understand history? If we embody a colonialist's perspective to conquer 'primitive' tribes in *Colonization*, does this privilege a distinct way of viewing history as benevolent intervention over imperialist expansion? The fusion of these two fields allows the editors to pose new questions about the

ways in which gamers interact with their game worlds. Drawing these threads together, the collection concludes by asking whether digital games - which represent history or historical change - alter the way we, today, understand history itself. Felt Friends - Angela C. Santomero 2002-11-01

Homo Deus - Yuval Noah Harari 2017-02-21
Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet

riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive

powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

Rewiring Education - John D. Couch 2018-05-08

What if we could unlock the potential in every child? As it turns out, we can. Apple's iconic cofounder Steve Jobs had a powerful vision for education: employing technology to make an enormous impact on the lives of millions of students. To realize this vision, Jobs tapped John D. Couch, a trusted engineer and executive with a passion for education. Couch believed the real purpose of education was to help children discover their unique potential and empower them to reach beyond their perceived limitations. Today, technology is increasingly integrated into every aspect of our lives, rewiring our homes, our jobs, and even our brains. Most important, it presents an opportunity to rewire education to enrich and strengthen our schools, children, and society. In Rewiring Education, Couch shares the professional lessons he's learned during his 50-plus years in education and

technology. He takes us behind Apple's major research study, Apple Classrooms of Tomorrow (ACOT), and its follow-up (ACOT 2), highlighting the powerful effects of the Challenge-Based Learning framework. Going beyond Apple's walls, he also introduces us to some of the most extraordinary parents, educators, and entrepreneurs from around the world who have ignored the failed promises of memorization and, instead, utilize new science-backed methods and technologies that benefit all children, from those who struggle to honor students. Rewiring Education presents a bold vision for the future of education, looking at promising emerging technologies and how we—as parents, teachers, and voters—can ensure children are provided with opportunities and access to the relevant, creative, collaborative, and challenging learning environments they need to succeed.

He was only eight when a bloodied sorcerer tutored him on the perils of questing in the Cave Maze... ...The craving to enter has tormented ever since. The Wizard Talhoffer stocked the underground labyrinth with a murderous assortment of beasts, traps, gold, and personal magic items worth dying for. And treasure hunters did die for them. Not Raff Jenkins. He planned to survive. After losing the scholarship for the questing university, sword whiz Raff takes drastic measures to earn tuition. With the help of his hustling cousin Dread and a party of rag-tag locals...he heads into the maze as a newbie. What he discovers

inside is more than just treasure, bloodthirsty hags, or crotch-masticating hellhounds - he learns that a link to his past is tied to the fate of his kingdom. Will he return in time to pay off the death-threats awaiting him at home? Will he return at all? -----
