The Multiplying Menace Divides - Pam Calvert 2011-02-01
A ribbiting math adventure! After being banished to the Abyss of Zero in MULTIPLYING MENACE: THE REVENGE OF RUMPELSTILTSKIN, Rumpelstiltskin is back, and he?s stirring up more trouble than ever. Together with his sidekick, a witch named Matilda, Rumpelstiltskin plots his revenge on Peter and uses his magical powers to divide the kingdom into frogs. Peter and his dog, Zero, must locate the Great Multiplier and find a solution that will break the Great Divide before Rumpelstiltskin has a chance to combine the two mighty math sticks. Can Peter once again save the kingdom in time, or will it meet a green and warty

fate? Young readers will fall in love with this math adventure and learn all about dividing by whole numbers and fractions, as well as division rules for equations involving zero. Beautifully rendered illustrations will grab readers? attention as they learn basic math skills in a fun and inventive way. Back matter includes a summary of the basics of division.

Whole-y Cow! - Taryn Souders 2010-10-15
Learning about fractions isn't always easy, but who says it can't be fun? Using one very entertaining cow, math teacher Taryn Souders has devised a very clever (and fun) way of explaining fractions to beginning learners. One whole cow, calmly eating hay, decided to act differently on this particular day. One whole cow - what should we do? I know! Let's paint one half blue! Prompted by a poem and a visual clue, students are asked to answer what fraction is illustrated in the cow's antics, starting with halves and progressing into thirds,

fourths, eighths, and tenths. What fraction of the cow is blue? Answer: ½ What fraction of the cow is white? Answer: ½ With the math problem featured as part of the artwork, students get an immediate sense of how to apply and understand the concept of fractions. How moo-velous! Taryn J. Souders lives in Winter Park, Florida. With a background in math education, she is passionate about keeping math fun for young students. This is her first children's book. Tatjana Mai-Wyss was born in Switzerland. She remembers learning about fractions with the help of a typical Swiss cake. Tatjana has illustrated several children's books and her work has been published in books and magazines in the United States and abroad. She lives in South Carolina.

Math Curse - Jon Scieszka 1995-10-01
Did you ever wake up to one of those days where everything is a problem? You have 10 things to do, but only 30 minutes until your bus leaves. Is there enough time? You have 3 shirts and 2 pairs of pants. Can you make 1 good outfit? Then you start to wonder: Why does everything have to be such a problem? Why do 2 apples always have to be added to 5 oranges? Why do 4 kids always have to divide 12 marbles? Why can't you just keep 10 cookies without someone taking 3 away? Why? Because you're the victim of a Math Curse. That's why. But don't despair. This is one girl's story of how that curse can be broken.

I Can Be a Maths Magician - Anna Claybourne 2020-08-27 Do you have what it takes to be a maths magician? Yes, of course you do - and this action-packed book will prove it! Baffle your friends with mysterious number squares;

measure the height of a tree using only shadows; and solve a mathematical spot-the-difference! While you're drawing, making, and playing, you'll be learning all kinds of exciting facts and ideas about the world of STEM- science, technology, engineering, and maths. This book supports the key stage 1 (KS1) and key stage 2 (KS2) curriculum and is great for home learning. An awesome book for both boys and girls, aged 7+.

Sir Cumference and the Off-the-Charts Dessert - Cindy Neuschwander 2021-06-22 Join Sir Cumference and the gang for more wordplay, puns, and problem solving in the clever math adventure that introduces readers to charts and graphs through an annual bake-off. Sir Cumference and Lady Di need a baker to prepare a special dessert for the annual Harvest Faire. Two bakers compete to see whose dessert is most popular. When Pia of Chartres and Bart Graf have trouble keeping track of the votes their desserts receive, they each develop a better system. Pia places a colored candy around the edges of a pie dough (like a pie chart), and Bart stacks up cookie tins (making a 3D bar graph). When there's a tie, the two chefs cook up a hybrid dessert just in time for the Faire. Puns--both literal and visual--abound in this fun adventure story with beloved characters and a solid pedagogical foundation.

Fractions in Disguise - Edward Einhorn 2014-03-25 Crack the case with George Cornelius Factor in this entertaining math adventure that introduces simplified and reduced fractions with equal parts intrigue and humor. When a valuable fraction goes missing, George Cornelius Factor (a.k.a. GCF) vows to track it down. Knowing that the villainous Dr. Brok likes to disguise his ill-gotten fractions, GCF invents a Reducer—half ray gun, half calculator— that strips away the disguise, reducing the fraction to its lowest common denominator and revealing its true form. With the Reducer in hand, George seeks out Dr. Brok in hopes of retrieving the missing fraction. Back matter includes more detail on simplifying, or reducing, fractions.

If You Were a Fraction - Trisha Speed Shaskan 2008-07-01 A basic introduction to the concept of fractions.

Piece=part=portion/Pedazo=parte=porcion - Scott Gifford 2007-08 Find fractions frustrating? Do decimals get you down? Perhaps you're puzzled by percents. Never fear--the solution to your confusion is here! See, fractions, decimals, and percents are different math terms that describe the same thing--a piece, part, or portion of a larger whole. It's just like "hello," "hola," and "bonjour" mean "Hi there!"--but each in a different language. Once you've mastered this simple concept, you can try it out on your friends. Ask them for 0.5 of their pizza. You'll be finished eating before they realize they agreed to give you half!

Counting on Frank - Rod Clement 1990-12-15 A boy and his dog present amusing counting, size comparison, and mathematical facts.

Luna's Yum Yum Dim Sum - Natasha Yim 2020-12-22 Celebrate diversity, math, and the power of storytelling! On Luna's birthday, the whole

family goes out for dim sum-- but Luna and her brothers can't agree on how to share their pork buns fairly. How can three people divide up five buns? Should some siblings get more than others? Or should they cut the buns into smaller and smaller pieces so everyone gets the same amount? A playful exploration of division and fractions, featuring Chinese American characters and a cultural note. Storytelling Math celebrates children using math in their daily adventures as they play, build, and discover the world around them. Joyful stories and hands-on activities make it easy for kids and their grown-ups to explore everyday math together. Developed in collaboration with math experts at STEM education nonprofit TERC, under a grant from the Heising-Simons Foundation.

Pythagoras and his cousins want to win a music contest, but first they must figure out how to play their instruments in tune, something that's never been done before. While trying to fix the problem, Pythagoras makes an important discovery--notes that sound pleasant together have a certain mathematical relationship. When Pythagoras applies this ratio to his cousins' pipes and lyres, the result is music to the ears.

Multiplying Menace - Pam Calvert 2006-02-01 Readers will put their multiplication skills to use in this clever math adaptation starring the fairy-tale favorite, Rumpelstiltskin. It's been 10 years since the queen defeated Rumpelstiltskin and now he's back to collect his payment from years before. He causes a stir in the kingdom by making mischief with his multiplying stick and threatens to do far worse if the debt is not repaid. It's up to Peter, the young prince, to take possession of the Rumpelstiltskin's magical multiplying stick and learn how to use it—and multiply both whole numbers and fractions-- in order to restore peace to the kingdom. A perfect mix of math, fairy-tale, and fun, The Multiplying Menace will get STEM/STEAM readers excited to solve the adventure one number at a time.

The Golem, Methuselah, and Shylock - Edward Einhorn 2005 Edward Einhorn blends absurdist humor with philosophy in these critically acclaimed plays about legendary Jewish figures. Golem Stories retells an old Kabalistic legend. It's a ghost story and a love story, about a childlike clay man who may be a demon inside. In The Living Methuselah, the oldest living man survives every disaster is human history, with the help of his wife Serach, the oldest living woman. But when a doctor tells him he will only live until the end of the play, will this be his final curtain? To find the title character of A Shylock, Jacob Levy interrogates every character in The Merchant of Venice, but oddly Hamlet may know the most-although this Hamlet is a woman. And in One-Eyed Moses and the Churning Red Sea, Rabbi Tzipporah Finestein dreams Moses is a pirate captain, but what do the dreams mean? Two congregants hold the key.
