Urbanization in the Middle East - V. F.

Costello 1977-03-10

Originally published in 1977 as part of the Urbanization in Developing Countries series, this

book studies the social, demographic, political and economic processes involved in the growth of cities in the Middle East. It was the first study of urbanization in this region from a single

viewpoint and it draws on the findings of numerous scholars. The main emphasis is on the insights provided by urban geography, sociology and social anthropology, but the work of demographers, economists and historians is also taken into account. Its main purpose is to examine the causes and consequences of the change in the character of the Middle Eastern city from a traditional to a twentieth-century pattern. The book describes the social and environmental background to urban development and the nature of the pre-industrial urban society in the region. The differences between planned urban development in various countries are also studied.

Permanent Supportive Housing - National Academies of Sciences, Engineering, and Medicine 2018-07-11

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with

fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to

bring the PSH and other housing models to scale to address housing and health care needs.

The Representation of Immigrant Life in Upton Sinclair's "The Jungle" - Eva Deinzer 2009-05

Seminar paper from the year 2007 in the subject American Studies - Literature, grade: 1,3, Friedrich-Alexander University Erlangen-Nuremberg (Institut für Anglistik und Amerikanistik), course: American Culture and Society During the Progressive Era, 20 entries in the bibliography, language: English, abstract: In

my paper I would primarily like to demonstrate how Sinclair represents the immigrant life in his book and how it ties with the reality at that time. However, before coming to this I would like to outline the immigration to and the urbanization in the United States in the Progressive Era and give a short summary of *The Jungle*.

The Cambridge Economic History of the United States - Stanley L. Engerman 1996

This three volume work offers a comprehensive survey of the history of economic activity and economic change in the United States, and in those regions whose economies have at certain times been closely allied to that of the US.

The Laws of Migration - Ernest George Ravenstein 1889

Immigration and Immigrants - Michael Fix 1994

World Social Report 2020 - Department of Economic and Social Affairs 2020-02-14

This report examines the links between

inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation. *Organized Labor...* - Samuel Gompers 1925

The New Americans - National Research Council 1997-11-14

This book sheds light on one of the most controversial issues of the decade. It identifies the economic gains and losses from immigration for the nation, states, and local areas and provides a foundation for public discussion and policymaking. Three key questions are explored: What is the influence of

immigration on the overall economy, especially national and regional labor markets? What are the overall effects of immigration on federal, state, and local government budgets? What effects will immigration have on the future size and makeup of the nation's population over the next 50 years? The *New Americans* examines what immigrants gain by coming to the United States and what they contribute to the country, the skills of immigrants and those of native-born Americans, the experiences of immigrant women and other groups, and much more. It offers examples of how to measure the impact of immigration on government revenues and expenditures—estimating one year's fiscal impact in California, New Jersey, and the United States and projecting the long-run fiscal effects on government revenues and expenditures. Also included is background information on immigration policies and practices and data on where immigrants come from, what they do in America, and how they will change the nation's

social fabric in the decades to come.

U.S. History - P. Scott Corbett 2017-12-19
Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both

the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

World Migration Report 2015 - International Organization for Migration 2015-12-31
The World Migration Report 2015: Migrants and Cities, New Partnerships to Manage Mobility ? the eighth report in IOM's World Migration Report (WMR) series ? focuses on how migration and migrants are shaping cities and how the life of migrants is shaped by cities, their people, organizations and rules. Over 54 per cent of people across the globe were living in urban areas in 2014. The number of people living in cities will almost double to some 6.4 billion by 2050, turning much of the world into a global city. Human mobility and migration play an important part in this but are largely missing from the global debate on urbanization. Many city and local governments also still do not include migration or migrants in their urban development planning and implementation. The

report aims to address this gap by considering migration as a defining factor alongside climate change, population growth, demographic change and economic crisis in shaping sustainable cities of the future.

A Nation of Immigrants - John Fitzgerald Kennedy 1964

Tells the story of the struggles of successive waves of immigrants who came to America and includes the President's plea for a complete revision of our immigration law. The late President expounds the need for an enlargement of our narrow immigration laws. His book expresses an ideal defined by Washington in the first years of the Republic: that America should always be a "propitious asylum for the unfortunates of other countries."

The Framework for Teaching Evaluation Instrument, 2013 Edition - Charlotte

Danielson 2013

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in

the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Urban Evolutionary Biology - Marta Szulkin
2020-05-05

Urban Evolutionary Biology fills an important knowledge gap on wild organismal evolution in the urban environment, whilst offering a novel exploration of the fast-growing new field of evolutionary research. The growing rate of urbanization and the maturation of urban study systems worldwide means interest in the urban environment as an agent of evolutionary change is rapidly increasing. We are presently witnessing the emergence of a new field of research in evolutionary biology. Despite its rapid global expansion, the urban environment has until now been a largely neglected study site among evolutionary biologists. With its conspicuously altered ecological dynamics, it stands in stark contrast to the natural environments traditionally used as cornerstones

for evolutionary ecology research. Urbanization can offer a great range of new opportunities to test for rapid evolutionary processes as a consequence of human activity, both because of replicate contexts for hypothesis testing, but also because cities are characterized by an array of easily quantifiable environmental axes of variation and thus testable agents of selection. Thanks to a wide possible breadth of inference (in terms of taxa) that may be studied, and a great variety of analytical methods, urban evolution has the potential to stand at a fascinating multi-disciplinary crossroad, enriching the field of evolutionary biology with emergent yet incredibly potent new research themes where the urban habitat is key. Urban Evolutionary Biology is an advanced textbook suitable for graduate level students as well as professional researchers studying the genetics, evolutionary biology, and ecology of urban environments. It is also highly relevant to urban ecologists and urban wildlife practitioners.

Immigration and Labor - Allen Johnson 1920

Central America Urbanization Review - Augustin Maria 2017-03-22

Central America is undergoing an important transition. Urban populations are increasing at accelerated speeds, bringing pressing challenges for development, as well as opportunities to boost sustained, inclusive and resilient growth. Today, 59 percent of the region's population lives in urban areas, but it is expected that 7 out of 10 people will live in cities within the next generation. At current rates of urbanization, Central America's urban population will double in size by 2050, welcoming over 25 million new urban dwellers calling for better infrastructure, higher coverage and quality of urban services and greater employment opportunities. With more people concentrated in urban areas, Central American governments at the national and local levels face both opportunities and challenges to ensure the

prosperity of their country's present and future generations. The Central America Urbanization Review: Making Cities Work for Central America provides a better understanding of the trends and implications of urbanization in the six Central American countries -Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua and Panama- and the actions that central and local governments can take to reap the intended benefits of this transformation. The report makes recommendations on how urban policies can contribute to addressing the main development challenges the region currently faces such as lack of social inclusion, high vulnerability to natural disasters, and lack of economic opportunities and competitiveness. Specifically, the report focuses on four priority areas for Central American cities: institutions for city management, access to adequate and well-located housing, resilience to natural disasters, and competitiveness through local economic development. This book is written for national

and local policymakers, private sector actors, civil society, researchers and development partners in Central America and all around the world interested in learning more about the opportunities that urbanization brings in the 21st century.

Toward an Integrated Science of Research on Families - National Research Council
2011-03-18

Demographic changes, immigration, economic upheavals, and changing societal mores are creating new and altered structures, processes, and relationships in American families today. As families undergo rapid change, family science is at the brink of a new and exciting integration across methods, disciplines, and epistemological perspectives. The purpose of The Science of Research on Families: A Workshop, held in Washington, DC, on July 13-14, 2010, was to examine the broad array of methodologies used to understand the impact of families on children's health and development. It sought to

explore individual disciplinary contributions and the ways in which different methodologies and disciplinary perspectives could be combined in the study of families. *Toward an Integrated Science of Research on Families* documents the information presented in the workshop presentations and discussions. The report explores the idea of family research as being both basic and applied, offering opportunities for learning as well as intervention. It discusses research as being most useful when organized around particular problems, such as obesity or injury prevention. *Toward an Integrated Science of Research on Families* offers a problem-oriented approach that can guide a broad-based research program that extends across funders, institutions, and scientific disciplines.

Global Trends 2030 - Office of the Director of National Intelligence Council 2017-03-11

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the

National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

Black Identities - Mary C. WATERS 2009-06-30
The story of West Indian immigrants to the
United States is generally considered to be a
great success. Mary Waters, however, tells a
very different story. She finds that the values
that gain first-generation immigrants initial
success--a willingness to work hard, a lack of

attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Round-Trip to America - Mark Wyman
2018-07-05

"Historians of migration will welcome Mark Wyman's new book on the elusive subject of persons who returned to Europe after coming to the United States. Other scholars have dealt with particular national groups . . . but Wyman is the first to treat . . . every major group Wyman explains returning to Europe as not just the fulfillment of original intentions but also the result of 'anger at bosses and clocks, nostalgia for waiting families, ' nativist resentment and heavy-handed Americanization programs, and a complex of other problems. . . . Wyman's 'nine broad conclusions' about the returnees deserve

to be read by everyone concerned with international migration."--Journal of American History

Wood Properties and Processing - Miha Humar
2020-05-23

Wood-based materials are CO2-neutral, renewable, and considered to be environmentally friendly. The huge variety of wood species and wood-based composites allows a wide scope of creative and esthetic alternatives to materials with higher environmental impacts during production, use and disposal. Quality of wood is influenced by the genetic and environmental factors. One of the emerging uses of wood are building and construction applications. Modern building and construction practices would not be possible without use of wood or wood-based composites. The use of composites enables using wood of lower quality for the production of materials

with engineered properties for specific target applications. Even more, the utilization of such reinforcing particles as carbon nanotubes and nanocellulose enables development of a new generation of composites with even better properties. The positive aspect of decomposability of waste wood can turn into the opposite when wood or wood-based materials are exposed to weathering, moisture oscillations, different discolorations, and degrading organisms. Protective measures are therefore unavoidable for many outdoor applications. Resistance of wood against different aging factors is always a combined effect of toxic or inhibiting ingredients on the one hand, and of structural, anatomical, or chemical ways of excluding moisture on the other.

Hanging Together - John Higham 2001-01-01
This book presents three decades of writings by one of America's most distinguished historians. John Higham, renowned for his influential works on immigration, ethnicity, political symbolism, and the writing of history, here traces the changing contours of American culture since its beginnings, focusing on the ways that an extraordinarily mobile society has allowed divergent ethnic, class, and ideological groups to "hang together" as Americans. The book includes classic essays by Higham and more recent writings, some of which have been

substantially revised for this publication. Topics range widely from the evolution of American national symbols and the fate of our national character to new perspectives on the New Deal, on other major turning points, and on changes in race relations after major American wars. Yet they are unified by an underlying theme: that a heterogeneous society and an inclusive national culture need each other.

World Migration Report 2020 - United Nations 2019-11-27

Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as

thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Education Finance, Equality, and Equity - Iris BenDavid-Hadar 2018-08-13

This volume revisits educational equality and equity issues, especially, in education finance-related topics consisting of 15 chapters and organized in two parts. The first part of the volume entitled “Education Finance”, focuses on equity aspects of resource allocation and its influence on education. The second part, entitled “Educational Equality and Equity”, focuses on the conceptualization, and the measurements of educational inequity, and inequality with special emphasis on the cost of inequality. The field of

education finance has been significantly influencing policy-makers in many countries in recent years. This volume is focused on equity and equality in education finance in an international frame. This book would be of interest to (1) scholars at the fields of education finance, economics of education, and

educational policy, (2) graduate students at the course of school finance or economics of education, and (3) local and global policy makers at the fields of education policy, and education finance.
