Ernesto - Andrew Feldman 2019-05-28

From the first North American scholar permitted to study in residence at Hemingway's beloved Cuban home comes a radically new understanding of "Papa's" life in Cuba Ernest Hemingway first landed in Cuba in 1928. In some ways he never left. After a decade of visiting regularly, he settled near Cojimar—a tiny fishing village east of Havana—and came to think of himself as Cuban. His daily life among the common people there taught him surprising lessons, and inspired the novel that would rescue his declining career.

That book, *The Old Man and the Sea*, won him a Pulitzer and, one year later, a Nobel Prize. In a rare gesture of humility, Hemingway announced to the press that he accepted the coveted Nobel "as a citizen of Cojimar." In *Ernesto*, Andrew Feldman uses his unprecedented access to newly available archives to tell the full story of Hemingway's self-professed Cuban-ness: his respect for Cojimar fishermen, his long-running affair with a Cuban lover, the warmth of his adoptive Cuban family, the strong influences on his work by Cuban writers, his connections to Cuban political figures and celebrities, his denunciation of American imperial ambitions, and his enthusiastic role in the revolution. With a focus on the island's violent political upheavals and tensions that pulled Hemingway between his birthplace and his adopted country, Feldman offers a new angle on our most influential literary figure. Far from being a post-success, pre-suicide exile, Hemingway's decades in Cuba were the richest and most dramatic of his life, and a surprising instance in which the famous American bully sought redemption through his loyalty to the underdog.

Emerging States at Crossroads - Keiichi Tsunekawa 2018-11-30

This book is open access under a CC BY-NC-ND license. This volume analyzes the economic, social, and political challenges that emerging states confront today. Notwithstanding the growing importance of the 'emerging states' in global affairs and governance, many problems requiring immediate solutions have emerged at home largely as a consequence of the rapid economic development and associated sociopolitical changes. The middle-income trap is a major economic challenge faced by emerging states. This volume regards interest coordination for technological upgrading as crucial to avoid the trap and examines how various emerging states are grappling with this challenge by fostering public-private cooperation, voluntary associations of market players, and/or social networks. Social disparity is another serious problem. It is deeply rooted in history in the emerging states such as South Africa and many Latin American countries. However, income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity. Increasing pressure for political opening is another challenge for emerging states. This volume argues that the economic, social, and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties. Democratic institutions have not always been successful in this respect.

Deep Cuba - Bill Belleville 2010-01-25

Geography, politics, and other factors have allowed Cuba to preserve the region's most pristine coast and offshore marine environment. *Deep Cuba* recounts Bill Belleville's month-long journey around the island in the company of American and Cuban marine biologists and a Discovery Channel film crew. It was the first, and so far only, United States submersible research expedition in Cuban waters. From coral reefs to mangrove swamps to a submerged volcanic mountain, the voyagers encountered sublimely wild places unseen before by anyone from the United States—or even by many Cubans. Belleville conveys the tempo of the scientists' workday, during which the routine gathering of data and specimens could be punctuated by

trips in a state-of-the-art submersible, the discovery of new species, or a tropical storm. Throughout the trip, as well, all on board had to work through differences that arose from the expedition's contrary goals: to produce a commercially viable seagoing adventure film and to conduct controlled, methodical scientific investigations. Belleville paces his coverage of the expedition with absorbing stories about the history and culture of the island's peoples, from the indigenous Taino to its current inhabitants of African and European heritage. *Deep Cuba* even includes a candid portrait of Castro himself. An avid diver, sport fisherman, and naturalist, El Comandante paid a visit aboard the research vessel. *Deep Cuba* is an engaging mix of nature and travel writing, along with scientific reportage that is keenly attuned to current crises in research funding. Revealed here is a magnificent marine world with crucial ecological links to the Caribbean Basin and the southeastern United States.

Selected Issues in Experimental Economics - Kesra Nermend 2016-03-24

The aim of this volume is to provide deep insights and the latest scientific developments and trends in experimental economics. Derived from the 2015 Computational Methods in Experimental Economics (CMEE) conference, this book features papers containing research and analysis of economic experiments concerning research in such areas as management science, decision theory, game theory, marketing and political science. The goal is to present possibilities for using various computer methods in the scope of experimental economics to further provide researchers with a wide variety of tools. The field of experimental economics is rapidly evolving. Modern use of experimental economics requires the integration of knowledge in the domains of economic sciences, computer science, psychology, and neuroscience. Recent research includes experiments conducted both in the laboratory and in the field, and the results are used for testing and a better understanding of economic theories. Researchers working in this field use mainly a set of well-established methods and computer tools that support the experiments. Methods such as artificial intelligence, computer simulation and computer graphics, however, are not represented enough in experimental economics studies and most experimenters do not consider their usage. The goal of the conference and the enclosed papers is to allow for an exchange of experiences and to promote joint initiatives to insight change in this trend.

SPQR - Shelley Lindgren 2012-10-16

A cookbook and wine guide celebrating the regional traditions and exciting innovations of modern Italian cooking, from San Francisco's SPQR restaurant. The Roman Empire was famous for its network of roads. By following the path of these thoroughfares, Shelley Lindgren, wine director and co-owner of the acclaimed San Francisco restaurants A16 and SPQR, and executive chef of SPQR, Matthew Accarrino, explore Central and Northern Italy's local cuisines and artisanal wines. Throughout each of the eight featured regions, Accarrino offers not only a modern version of Italian cooking, but also his own take on these constantly evolving regional specialties. Recipes like Fried Rabbit Livers with Pickled Vegetables and Spicy Mayonnaise and Fontina and Mushroom Tortelli with Black Truffle Fonduta are elevated and thoughtful, reflecting Accarrino's extensive knowledge of traditional Italian food, but also his focus on precision and technique. In addition to recipes, Accarrino elucidates basic kitchen skills like small animal butchery and pasta making, as well as newer techniques like sous vide—all of which are prodigiously illustrated with step-by-step photos. Shelley Lindgren's uniquely informed essays on the wines and winemakers of each region reveal the most interesting Italian wines, highlighting overlooked and little-known grapes and producers—and explaining how each reflects the region's unique history, cultural influences, climate, and terrain. Lindgren, one of the foremost authorities on Italian wine, shares her deep and unparalleled knowledge of Italian wine and winemakers through producer profiles, wine recommendations, and personal observations, making this a necessary addition to any wine-lover's library. Brimming with both discovery and tradition, SPQR delivers the best of modern Italian food rooted in the regions, flavors, and history of Italy.

Cuba: What Everyone Needs to Know - Julia E Sweig 2009-06-06

Ever since Fidel Castro assumed power in Cuba in 1959, Americans have obsessed about the nation ninety miles south of the Florida Keys. America's fixation on the tropical socialist republic has only grown over the

years, fueled in part by successive waves of Cuban immigration and Castro's larger-than-life persona. Cubans are now a major ethnic group in Florida, and the exile community is so powerful that every American president has kowtowed to it. But what do most Americans really know about Cuba itself? In *Cuba: What Everyone Needs to Know*, Julia Sweig, one of America's leading experts on Cuba and Latin America, presents a concise and remarkably accessible portrait of the small island nation's unique place on the world stage over the past fifty years. Yet it is authoritative as well. Following a scene-setting introduction that describes the dynamics unleashed since summer 2006 when Fidel Castro transferred provisional power to his brother Raul, the book looks backward toward Cuba's history since the Spanish American War before shifting to more recent times. Focusing equally on Cuba's role in world affairs and its own social and political transformations, Sweig divides the book chronologically into the pre-Fidel era, the period between the 1959 revolution and the fall of the Soviet Union, the post-Cold War era, and finally the looming post-Fidel era. Informative, pithy, and lucidly written, it will serve as the best compact reference on Cuba's internal politics, its often fraught relationship with the United States, and its shifting relationship with the global community.

Cuba Libre - Elmore Leonard 2009-03-17

"A wild ride through Cuba during the Spanish-American War." —Miami Herald "Not only his finest novel but one that transcends the limits of its genre and is worthy of being evaluated as literary fiction." —Houston Chronicle Before Grand Master Elmore Leonard earned his well-deserved reputation as "the best writer of crime fiction alive" (Newsweek), he penned some of the finest western fiction to ever appear in print. (The classics *Hombre*, *Valdez is Coming*, and *3:10 to Yuma* were just a few of his notable works.) With his extraordinary *Cuba Libre*, Leonard ingeniously combines all of his many talents and delivers a historical adventure/caper/western/noir like none other. The creator of U.S. Marshal Raylan Givens, star of *Raylan*, *Pronto*, *Riding the Rap*, and TV's *Justified*, spins a gloriously exciting yarn about an American horse wrangler who escapes a date with a Cuban firing squad to join forces with a powerful sugar baron's lady looking to make waves and score big in and around Spanish-American War-torn Havana in 1898. Everything you love about Leonard's fiction—and more—is evident in *Cuba Libre*. No wonder the New York Times Book Review enthusiastically declared him "a literary genius."

Battle for the Big Top - Les Standiford 2021-06-15

"Les Standiford takes us under the big top and behind the curtain in this richly researched and thoroughly engaging narrative that captures all of the entrepreneurial intrigue and spirit of the American circus." —Gilbert King, Pulitzer Prize-winning author of *Devil in the Grove* Millions have sat under the "big top," watching as trapeze artists glide and clowns entertain, but few know the captivating stories behind the men whose creativity, ingenuity, and determination created one of our country's most beloved pastimes. In *Battle for the Big Top*, New York Times bestselling author Les Standiford brings to life a remarkable era when three circus kings—James Bailey, P. T. Barnum, and John Ringling—all vied for control of the vastly profitable and influential American Circus. Ultimately, the rivalry of these three men resulted in the creation of an institution that would surpass all intentions and, for 147 years, hold a nation spellbound. Filled with details of their ever-evolving showmanship, business acumen, and personal magnetism, this Ragtime-like narrative will delight and enchant circus-lovers and anyone fascinated by the American experience.

CRC Handbook of Viruses Infecting Legumes - John R. Edwardson 2018-01-18

This interesting handbook discusses 145 plant viruses in 27 groups and 31 unclassified viruses in naturally

infected legumes. The viruses were observed in field infections of 281 species in 64 genera of the Leguminosae. The book presents information regarding resistance sources and resistance-breeding, vectors, seed transmission, and host ranges. Measurements of virus properties are organized in tabular form for particle dimensions, serological relationships, nucleic acid percentages, sedimentation coefficients of particles and nucleic acids, molecular weights of nucleic acids and coat proteins, optical density, and buoyant density. Handbook of Viruses Infecting Legumes is unique in that it relates inclusion cytology to plant virus detection, identification, and classification. Light and electron micrographs illustrate morphology, location, and staining reactions of inclusions. Of the 27 groups that contain viruses infecting legumes in nature, inclusions are diagnostic at the group level in 15 of these groups. Plant breeders, diagnosticians, plant virologists, and students of plant virology will find this an indispensable guide to legume viruses.

Urban Forms and Colonial Confrontations - Zeynep Çelik 1997

During its long history as the French colonial city par excellence, Algiers was the site of recurrent conflicts between colonizer and colonized. Through architecture and urban forms confrontations were crystallized, cultural identities were defined, and social engineering programs were shaped and challenged. In this pathbreaking book, Zeynep elik reads the city of Algiers as the site of social, political, and cultural conflicts during the 132 years of French occupation and argues that architecture and urban forms are integral components of the colonial discourse. Algiers' city planning, based on what elik calls "the trial-and-error" model of French colonial urbanism, included the fragmentation of the casbah, ambitious Beaux Arts schemes to create European forms of housing, master plans inspired by high modernism, and comprehensive regional plans. Eventually a dramatic housing shortage led all planning efforts to be centered on the construction of large-scale residential enclaves. French architects based their designs for domestic space on the concept of the "traditional house," itself an interdisciplinary colonial concept intertwined with the discourse on Algerian women. Housing also offered the French colonizers a powerful presence in a country where periodic resistance to the occupation eventually culminated in a seven-year war of liberation and an end to French rule. Extensively illustrated with photographs, maps, and housing plans, elik's book presents a fascinating example of colonial urban planning. Algiers comes alive as a city that reflected all the conflicts of colonialism while embracing innovation. Starfishes from the Caribbean and the Gulf of Mexico - Maureen E. Downey 1973

Introduction to Information Visualization - Riccardo Mazza 2009-02-28

Information Visualization is a relatively young field that is acquiring more and more consensus in both academic and industrial environments. 'Information Visualization' explores the use of computer-supported interactive graphical representations to explain data and amplify cognition. It provides a means to communicate ideas or facts about the data, to validate hypotheses, and facilitates the discovery of new facts via exploration. This book introduces the concepts and methods of Information Visualization in an easy-to-understand way, illustrating how to pictorially represent structured and unstructured data, making it easier to comprehend and interpret. Riccardo Mazza focuses on the human aspects of the process of visualization rather than the algorithmic or graphic design aspects.

Marginal Europe - Sidney Pollard 1997

The momentum of the British industrial revolution arose mostly in regions poorly endowed by nature, badly located and considered backward and poor by contemporaries. Sidney Pollard examines the initially surprising contribution made by the population of these and other 'marginal areas' (mountains, forests and marshes) to the economic development of Europe since the Middle Ages. He provides case studies of periods in which marginal areas took the lead in economic development, such as the Dutch economy in its Golden Age, and in the British industrial revolution. The traditional perception of the populations inhabiting these regions was that they were poor, backward, and intellectually inferior; but Sidney Pollard shows how they also had certain peculiar qualities which predisposed them to initiate progress. Healthy living, freedom, a martial spirit, and the hardiness to survive in harsh conditions enabled them to contribute a unique pioneering ability to pivotal economic periods; illustrating some of the effects of geography upon the development of societies.

The Language of Food: A Linguist Reads the Menu - Dan Jurafsky 2014-09-15

A 2015 James Beard Award Finalist: "Eye-opening, insightful, and huge fun to read." —Bee Wilson, author of *Consider the Fork* Why do we eat toast for breakfast, and then toast to good health at dinner? What does the turkey we eat on Thanksgiving have to do with the country on the eastern Mediterranean? Can you figure out how much your dinner will cost by counting the words on the menu? In *The Language of Food*, Stanford University professor and MacArthur Fellow Dan Jurafsky peels away the mysteries from the foods we think we know. Thirteen chapters evoke the joy and discovery of reading a menu dotted with the sharp-eyed annotations of a linguist. Jurafsky points out the subtle meanings hidden in filler words like "rich" and "crispy," zeroes in on the metaphors and storytelling tropes we rely on in restaurant reviews, and charts a microuniverse of marketing language on the back of a bag of potato chips. The fascinating journey through *The Language of Food* uncovers a global atlas of culinary influences. With Jurafsky's insight, words like ketchup, macaron, and even salad become living fossils that contain the patterns of early global exploration that predate our modern fusion-filled world. From ancient recipes preserved in Sumerian song lyrics to colonial shipping routes that first connected East and West, Jurafsky paints a vibrant portrait of how our foods developed. A surprising history of culinary exchange—a sharing of ideas and culture as much as ingredients and flavors—lies just beneath the surface of our daily snacks, soups, and suppers. Engaging and informed, Jurafsky's unique study illuminates an extraordinary network of language, history, and food. The menu is yours to enjoy.

Made in Spain - José Andrés 2012-07-24

Americans have fallen in love with Spanish food in recent years, and no one has done more to play matchmaker than the award-winning chef José Andrés. In this irresistible companion volume to his public television show *Made in Spain*, José reminds us—in the most alluring and delicious way—that the food of his native Spain is as varied and inventive as any of the world's great cuisines. To prove it, José takes us on a flavorful tour of his beloved homeland, from Andalucía to Aragón. Along the way, he shares recipes that reflect not just local traditions but also the heart and soul of Spain's distinctive cooking. In the Basque

Country, we discover great fish dishes and the haute cuisine of some of the finest restaurants in the world. In Cantabria, famous for its dairy products, we find wonderful artisanal cheeses. In Valencia, we learn why the secret to unforgettable paella is all in the rice. And in Castilla La Mancha, José shows us the land of the great Don Quixote, where a magical flower produces precious saffron. The dishes of Made in Spain show the diversity of Spanish cooking today as it is prepared in homes and restaurants from north to south—from casual soups and sandwiches to soul-warming dishes of long-simmered beans and artfully composed salads. Many dishes showcase the fine Spanish products that are now widely available across America. Many more are prepared with the regular ingredients available in any good supermarket. With more than one hundred simple, straightforward recipes that beautifully capture the flavors and essence of Spanish cooking, Made

in Spain is an indispensable addition to any cookbook collection.
