Written in standard notation and TAB, the material can be played by students and players that master the easy to intermediate level on plectrum style jazz guitar. All titles are included on the audio download available online, as well as some play along tracks which offer a great possibility to improvise on typical gypsy chord changes and rhythms

Cello Studies - Bernhard Cossmann 2021-09-02
The Violoncello Studies by Bernhard Cossmann (1822-1910) provide specific exercises for the development of the left hand such as double stop trill studies, finger dexterity exercises, chord, scale and thumb position studies which intensively include the use of the fourth finger in particular. This is what gives these studies their special value and make them indispensable to the training as a cellist. They are aimed at the advanced pupil and student, but also at the professionally trained cellist who wants to improve and maintain the dexterity and velocity of the left-hand fingers by means of short exercises.

Bogentechnischer Anhang
Basic Guitar Tutor - Juan Antonio Muro 2005-03

In learning to play the classical guitar the left hand tends to involve most of the beginner's attention. However, the first concern in the teaching of an instrument is control of the elements that produce the sound. In the classical guitar this is mainly the task of the right hand. This method places the focus of attention on this point. Right hand technique requires the control of a great many finger combinations. The methodology used in this book is based on reducing these apparently unlimited possibilities to a few basic combinations which we shall refer to as mechanisms. These are presented so that they can be practiced separately with appropriate material composed for this purpose. Companion CD is included in this progressive method for the beginner; all presented in standard notation. In Spanish, German, French

and English.

Who Can Speak and Who Is Heard/Hurt? - Mahmoud Arghavan 2019-04-30

Ethnic diversity, race, and racism have been subject to discussion in American Studies departments at German universities for many years. It appears that especially in the past few decades, ethnic minorities and 'new immigrants' have increasingly become objects of scholarly inquiry. Such research questions focus on the U.S. and other traditionally multicultural societies that have emerged out of historical situations shaped by (settler) colonialism, slavery, and/or large-scale immigration. Paradoxically, these studies have overwhelmingly been conducted by white scholars born in Germany and holding German citizenship. Scholars with actual experience of racial discrimination have remained largely unheard. Departing from a critique of practices employed by the German branch of American Studies, the volume offers (self-)reflective approaches by scholars from different fields in the German Humanities. It thereby seeks to provide a solid basis for thorough and candid discussions of the mechanisms behind and the implications of racialized power relations in the German Humanities and German society at large.

Position Pieces for Cello is designed to give students a logical and fun way to learn their way around the fingerboard. Each hand position is introduced with exercises called "Target Practice," "Geography Quiz," and "Names and Numbers." Following these exercises are tuneful cello duets which have been specifically composed to require students to play in that hand position. In this way, students gain a thorough knowledge of how to find the hand positions and, once there, which notes are possible to play. Using these pieces (with names like "I Was a Teenage Monster," "The Irish Tenor," and "I've Got the Blues, Baby"), position study on the cello has never been so much fun!
