Viewpoints - Marc Frantz 2011-07-05

An undergraduate textbook devoted exclusively to relationships between mathematics and art, *Viewpoints* is ideally suited for math-for-liberal-arts courses and mathematics courses for fine arts majors. The textbook contains a wide variety of classroom-tested activities and problems, a series of essays by contemporary artists written especially for the book, and a plethora of pedagogical and learning opportunities for instructors and students. *Viewpoints* focuses on two mathematical areas: perspective related to drawing man-made forms and fractal geometry related to drawing natural forms. Investigating facets of the three-dimensional world in order to understand mathematical concepts behind the art, the textbook explores art topics including comic, anamorphic, and classical art, as well as photography, while presenting such mathematical ideas as proportion, ratio, self-similarity, exponents, and logarithms. Straightforward problems and rewarding solutions empower students to make accurate, sophisticated drawings. Personal essays and short biographies by contemporary artists are interspersed between chapters and are accompanied by images of their work. These fine artists--who include mathematicians and scientists--examine how mathematics influences their art. Accessible to students of all levels, *Viewpoints* encourages experimentation and collaboration, and captures the essence of artistic and mathematical creation and discovery. Classroom-tested activities and problem solving Accessible problems that move beyond regular art school curriculum Multiple solutions of varying difficulty and applicability Appropriate for students of all mathematics and art levels Original and exclusive essays by contemporary artists Forthcoming: Instructor's manual (available only to teachers)

The Inner Sanctum - Stephen W. Frey 2020-03-24

From the New York Times bestselling author of *The Takeover* comes a terrifying thriller of corruption and greed at the highest levels of government. . . . David Mitchell, fast-rising portfolio manager at the exclusive Sagamore Investment Managing Group, has just been handed his future on a golden platter. If all goes according to plan, a struggling plane-manufacturing company will win a coveted government defense contract . . . and David himself will become very, very rich. Gaining the trust of IRS agent Jesse Hayes is a crucial part of the scheme. But the unwitting recruit has troubles of her own. Her boss has been found dead, and incriminating tax files level suspicion at a high-profile senatorial candidate. As the pieces of an explosive puzzle fall into place, David and Jesse realize they are pawns in a top-secret billion-dollar conspiracy stretching from the frenzy of Wall Street to the darkest corridors of Washington D.C., where a shocking military secret lies hidden. With tensions mounting, the lines between money and politics, and life and death, become razor-thin. . . .

[Escape from the Central Bank Trap, Second Edition](#) - Daniel Lacalle 2019-09-11

This book is about realistic solutions for the threat of zero-interest rates and excessive liquidity. Central banks do not print growth. The financial crisis was much more than the result of an excess of risk. The same policies that created each subsequent bust are the ones that have been implemented in recent years. This book is about realistic solutions for the threat of zero-interest rates and excessive liquidity. The United States needs to take the first step, defending sound money and a balanced budget, recovering the middle-class by focusing on increasing disposable income. The rest will follow. Our future should not be low growth and high debt. Cheap money becomes very expensive in the long run. There is an escape from the central bank trap.

Cut and Run - Rob Glastra 2014-05-14

Illegal logging and trade in timber is a major cause of forest degradation in the world today. Not only does it threaten biodiversity-rich old growth forests, it also endangers the livelihoods of the traditional communities that are dependent upon them. But controlling this global problem is not a simple matter of enacting new laws and enforcing new regulations OCo the rules already exist. If countries are to manage their forest sustainably they must implement existing laws effectively, and they must do so now! Cut and Run offers readers valuable insight on how this might be done."

When There Was No Money - Heather A. Clark 2006-03-14

The challenges in development often seem insurmountable. They overwhelm - tions and the builders of their most basic institutions. I am often asked how dev- opment finance agencies can work together to meet this challenge. In reply I invite you to read a story about cooperation in re-building one of the most basic institutions of any society -- the banking system. KfW Bankengruppe places great emphasis on financial sector development. Our experience in our own country, and beyond our borders, shows that one of the first steps is building a banking system that fuels growth through investment in enterprises. Micro, small and medium enterprises are the backbone of many economies; they are also the wealth of the people and generate their hope in the future. We believe that the depth of the financial sector is related to economic growth; the growth and safety of deposits, the facility of payments, and the in- vation to develop new products and services that strengthen markets and promote investment. A strong banking system supports economic growth by attracting unproductive capital and injecting it into the economy, increasing the productivity of the country's capital base and leveraging it by attracting outside capital.
