

Mpumalanga College Of Nursing Intake

Thank you unconditionally much for downloading **Mpumalanga College Of Nursing Intake** .Most likely you have knowledge that, people have see numerous time for their favorite books considering this Mpumalanga College Of Nursing Intake , but stop occurring in harmful downloads.

Rather than enjoying a fine book in the manner of a mug of coffee in the afternoon, instead they juggled in the manner of some harmful virus inside their computer. **Mpumalanga College Of Nursing Intake** is easy to get to in our digital library an online admission to it is set as public appropriately you can download it instantly. Our digital library saves in fused countries, allowing you to get the most less latency times to download any of our books subsequently this one. Merely said, the Mpumalanga College Of Nursing Intake is universally compatible taking into account any devices to read.

Nursing Today - JoAnn Graham Zerwekh 1997

Socio-Economic Rights in South Africa - Malcolm Langford 2014

This book sets out to assess the role and impact of socio-economic strategies used by civil society actors in South Africa. Focusing on a range of socio-economic rights and national trends in law and political economy, the book's authors show how socio-economic rights have influenced the development of civil society discourse and action.

World Report on Violence and Health - World Health Organization 2002

This report is part of WHO's response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world. It is aimed largely at researchers and practitioners including health care workers, social workers, educators and law enforcement officials.

Crime, Mental Health and the Criminal Justice System in Africa - Heng Choon (Oliver) Chan 2021-08-26

This book aims to serve as a comprehensive resource for a myriad of crime and mental health topics and issues in the African criminal justice system from a psycho-criminological perspective. *Crime, Mental Health and the Criminal Justice System in Africa: A Psycho-Criminological Perspective* is an ideal primary text for courses in criminology, criminal justice, and forensic psychology, as well as a source of reference for practitioners who deal with offenders or victims. "For a long time, African historiography has been viewed and interpreted from Eurocentric perspectives. This book is a timely contribution towards infusing Afrocentric perspectives in African scholarship by indigenous scholars. The authors' interdisciplinary topical approach, covering a gamut of topics ranging from African criminology, through mental health and psychology, to criminal justice systems, has lent a decolonizing voice toward African literary pursuit and thereby laid a solid foundation for further research by other scholars. I highly recommend it to readers, academic institutions and researchers on Africa." - Emmanuel Onyeozili, Ph.D., Professor of Criminology and Criminal Justice, Department of Criminal Justice, University of Maryland Eastern Shore, USA "This edited volume by an array of experts from West and Southern Africa has given a refreshing voice to psycho-criminological narratives in the continent. In a region of the world in which there is insufficient documentation of the patterns, determinants and outcomes of criminal behaviour, this book offers a culturally competent and contemporary flavour to an ancient discourse. Its focus on new areas of concern such as online dating scams, kidnapping and the mental health of officials in the criminal justice system compellingly captures the potential reader and gives good value for time. It is warmly recommended for its breadth of coverage, the authority of its claims and the multi-disciplinary outlook of its authors." - Adegboyega Ogunwale, MBBS, FWACP, Consultant Psychiatrist, Forensic Unit, Neuropsychiatric Hospital, Aro, Ogun State, Nigeria "This collection represents a significant step in the study of mental health, crime and criminal justice in sub-Saharan Africa. The breadth of topics covered is impressive, with each contribution based on methodologically-sound empirical analyses. It deserves to become a key reference for students, researchers and policy makers interested in suicide, drug use, violence, the work of prison officers, criminal investigations, and police-community interactions." - Justice Tankebe, Ph.D., Lecturer, Institute of Criminology, University of Cambridge, UK "Mental health and criminal justice issues are growing problems facing the world today. Questions about whether mental health affects crime or whether involvement in the criminal justice system affects an individual's health have become part of national policy discussion. This nicely written book brings together eminent scholars and experts with extensive experience in their various fields to address these and other questions related to crime, mental

health, and criminal justice in Africa. The editors did well to coordinate the efforts of the contributors into a valuable piece. I highly recommend it for all who are interested in the nexus between crime, mental health, and criminal justice systems." - Francis D. Boateng, Ph.D., Assistant Professor, Department of Criminal Justice and Legal Studies, University of Mississippi, USA

Telehealth in the Developing World - Richard Wootton 2009-02-24

A new addition to the successful telehealth series, *Telehealth in the Developing World* aims to balance the relative lack of published information on successful telehealth solutions in the developing world.

Nursing Ethics - Janie B. Butts 2019-02-05

The fifth edition of *Nursing Ethics* has been revised to reflect the most current issues in healthcare ethics including new cases, laws, and policies. The text continues to be divided into three sections: Foundational Theories, Concepts and Professional Issues; Moving Into Ethics Across the Lifespan; and Ethics Related to Special Issues focused on specific populations and nursing roles.

Social Psychology Australian & New Zealand Edition - Saul Kassin 2019-08-01

Using a balanced approach, *Social Psychology, 2e* connects social psychology theories, research methods, and basic findings to real-world applications with a current-events emphasis. Coverage of culture and diversity is integrated into every chapter in addition to strong representation throughout of regionally relevant topics such as: Indigenous perspectives; environmental psychology and conservation; community psychology; gender identity; and attraction and close relationships (including same-sex marriage in different cultures, gendered behaviours when dating, and updated data on online dating), making this visually engaging textbook useful for all social psychology students.

Shaping the Future of South Africa's Youth - Helene Perold 2012

Why solving ongoing problems with the NQF (National Qualifications Framework) matters -- The challenges unemployment imposes on youth -- The challenge of youth-to-work transitions: an international perspective -- A statistical overview of further education and training colleges -- Strengthening the capacity of FET Colleges to meet the needs of young people -- Higher education and an expanded post-school educational system -- Trends in training in South Africa -- Key issues in the assessment of South Africa's national skills development strategy -- Opening the doors of learning? Viewing the post-school education and training landscape from a youth perspective.

Higher Education Pathways - Ashwin, Paul 2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues. *Understanding Education for the Visually Impaired* - Ronél Ferreira 2020-12-31

The contribution that this book makes to scholarship is regarded as

ground-breaking, as it is based on recent research conducted with teachers on the ground-level, as well as on research and experiences of practitioners, gained over many years. In this volume, Understanding education for the visually impaired, the focus falls on understanding visual impairment within the South African context, more specifically on what the education of these learners entails. In addition to the contribution to existing literature in the fields of inclusive education and visual impairment, the publication has practical application value for teachers and practitioners who work with and support such learners. *Environmental justice small grants program emerging tools for local problemsolving*. -

South African Health Review - 1996

Educating Social Workers - Robert J. Harris 1985

Student Retention & Graduate Destination - Moeketsi Letseka 2010 Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

'Mad Mike' Hoare - Chris Hoare (Journalist) 2018

Men in Families and Family Policy in a Changing World - 2011

"The perceptions of the role of women and men in families have changed over the past few decades. Men are no longer perceived as the economic providers to families. The role of men in the family has undergone many "diverse demographic, socio-economic and cultural transformations" impacting the formation, stability and overall well-being of families. In light of this development, DESA's Division for Social Policy and Development (DSPD) launched a new publication on "Men in Families and Family Policy in a Changing World" on 17 February focusing on the shifting roles and views of men in families."--Provided by publisher.

Transforming Further Education and Training in South Africa: Qualitative findings and analysis - Andre Kraak 1999

This book contains eight papers from a detailed study of technical college provision in KwaZulu-Natal, South Africa, that raised the following four issues relevant to the transformation of technical colleges across South Africa: (1) the teaching and learning environment at technical colleges is suboptimal; (2) social relations at the technical colleges are tense, with few institutions having successfully come to terms with the rapid deracialization of student enrollments in recent years; (3) the labor market surrounding technical colleges appears totally dysfunctional, with few students obtaining employment after technical college training; and (4) the separate development policies of the past necessitate institutional restructuring. The following papers are included: "A Study of Technical Colleges in KwaZulu-Natal: A Methodological Introduction" (Andre Kraak, Graham Hall); "Problems Facing Further Education and Training" (Andre Kraak); "Planning Imperative: New Policy Framework in FET [Further Education and Training]" (Andre Kraak); "Socio-Economic and Educational Profile of KwaZulu-Natal" (Nisaar Mahomed); "Quantitative Overview of the Technical Colleges of KwaZulu-Natal" (Graham Hall); "Learning, Teaching and Management Environment: Evidence from Qualitative Studies" (Andre Kraak); "Autonomy and Responsiveness: Evidence from the Qualitative Case Studies" (Andre Kraak); and "Critical Overview: The Need for Labour Market and Institutional Reform" (Andre Kraak). The bibliography contains 52 references. (MN)

Cost Recovery and the Crisis of Service Delivery in South Africa - David A. McDonald 2002

There has been a dramatic shift worldwide from welfare municipalism - where the state both subsidized and provided essential municipal services - to a neoliberal vision of balanced budgets, fiscal restraint and privatization. Cost recovery is at the heart of this new municipal vision with far reaching implications for access to services, affordability and privatization. This book brings together a theoretical and empirical review of the impact of cost recovery on basic municipal services such as

water, refuse collection and electricity, with particular reference to South Africa. It describes the theory and practice of cost recovery and presents six case studies drawing on participatory and ethnographic research. The final chapter examines alternative future possibilities, reformist or equity-oriented.

Forests and Human Health - Carol J. Pierce Colfer 2006-01-01

This study has two central concerns: the state of human health in forests, and the causal links between forests and human health. Within this framework, we consider four issues related to tropical forests and human health. First, we discuss forest foods, emphasizing the forest as a food-producing habitat, human dependence on forest foods, the nutritional contributions of such foods, and nutrition-related problems that affect forest peoples. Our second topic is disease and other health problems. In addition to the major problems—HIV/AIDS, malaria, Ebola and mercury poisoning—we address some 20 other tropical diseases and health problems related to forests. The third topic is medicinal products. We review the biophysical properties of medicinal species and consider related indigenous knowledge, human uses of medicinal forest products, the serious threats to forest sustainability, and the roles of traditional healers, with a discussion of the benefits of forest medicines and conflicts over their distribution. Our fourth and final topic is the cultural interpretations of human health found among forest peoples, including holistic world views that impinge on health and indigenous knowledge. The Occasional Paper concludes with some observations about the current state of our knowledge, its utility and shortcomings, and our suggestions for future research.

Skills Beyond School - Oecd 2014

Higher level vocational education and training (VET) programmes are facing rapid change and intensifying challenges. What type of training is needed to meet the needs of changing economies? How should the programmes be funded? How should they be linked to academic and university programmes? How can employers and unions be engaged? This report synthesises the findings of the series of country reports done on skills beyond school. Chapters cover the following areas: Chapter 1. The hidden world of professional education and training; Chapter 2. Enhancing the profile of professional education and training; Chapter 3. Three key elements of high-quality post-secondary programmes; Chapter 4. Transparency in learning outcomes; Chapter 5. Clearer pathways for learners; Chapter 6. Key characteristics of effective vocational systems
South Africa, a Country Study - Harold D. Nelson 1982

WHO Recommendations on Antenatal Care for a Positive Pregnancy Experience - World Health Organization 2017-01-15

Within the continuum of reproductive health care, antenatal care provides a platform for important health-care functions, including health promotion, screening and diagnosis, and disease prevention. It has been established that, by implementing timely and appropriate evidence-based practices, antenatal care can save lives. Endorsed by the United Nations Secretary-General, this is a comprehensive WHO guideline on routine antenatal care for pregnant women and adolescent girls. It aims to complement existing WHO guidelines on the management of specific pregnancy-related complications. The guidance captures the complex nature of the antenatal care issues surrounding healthcare practices and delivery, and prioritizes person-centered health and well-being --- not only the prevention of death and morbidity --- in accordance with a human rights-based approach.

Ageing and Nutrition through Lifespan - Stefanos Tyrovolas 2020-12-29

Population is ageing at an unprecedented speed globally. As concept, ageing is considered a continuous process starting from birth and is accompanied by various physiological changes and a number of chronic diseases that affect health and quality of life. Ageing as a continuous process is depending on life course exposures to health risks, lifestyle and nutrition, socioeconomic background, and other factors. There is considerable interest among scientists regarding the direct and indirect effect of nutrition in optimal ageing. Nutrition has a beneficial effect in a variety of chronic disease that impact the process of ageing. Given the importance of this issue, the journal *Nutrients* is planning a Special Issue on "Ageing and Nutrition through Lifespan" with the aim of providing a source for accurate, up-to-date scientific information on this topic. We invite you and your co-workers to consider submission of your original research findings or a review article on the topic. Manuscripts should focus on the direct impact of specific food components, dietary patterns, energy intake, macro-, micro- nutrients, alcohol intake, food insecurity as well as malnourishment and appetite to the ageing process (healthy, active, successful ageing, frailty and other similar indices) across

lifespan. In a similar way, we also welcome manuscripts that focus on the indirect effect of nutrition to the ageing process throughout the pathway of chronic disease (i.e., obesity, diabetes, depression and mental diseases).

Tea in Health and Disease Prevention - Victor R. Preedy 2012-10-01

While there have been many claims of the benefits of teas through the years, and while there is nearly universal agreement that drinking tea can benefit health, there is still a concern over whether the lab-generated results are representative of real-life benefit, what the risk of toxicity might be, and what the effective-level thresholds are for various purposes. Clearly there are still questions about the efficacy and use of tea for health benefit. This book presents a comprehensive look at the compounds in black, green, and white teas, their reported benefits (or toxicity risks) and also explores them on a health-condition specific level, providing researchers and academics with a single-volume resource to help in identifying potential treatment uses. No other book on the market considers all the varieties of teas in one volume, or takes the disease-focused approach that will assist in directing further research and studies. Interdisciplinary presentation of material assists in identifying potential cross-over benefits and similarities between tea sources and diseases Assists in identifying therapeutic benefits for new product development Includes coverage and comparison of the most important types of tea - green, black and white

Walking with Giants - Sindiso Mfenyana 2017

The autobiography has as its primary focus political history, in particular the history of the ANC in South Africa and in exile. The author records in a refreshingly straightforward way how he and his peers experienced life in South Africa in the 1950's. His politicization in Cradock through such events as the 1952 Defiance Campaign and later at the University of Fort Hare give the background for his recruitment into the ANC underground. A true non-racialist with a broad view of the world, he reflects a generation of South Africans who were educated in the East European socialist countries. He was widely read and knowledgeable about global affairs; he understood the politics of most African countries and hoped to contribute to the building of a new South Africa.

Submerged Landscapes of the European Continental Shelf - Nicholas C. Flemming 2017-08-07

Quaternary Paleoenvironments examines the drowned landscapes exposed as extensive and attractive territory for prehistoric human settlement during the Ice Ages of the Pleistocene, when sea levels dropped to 120m-135m below their current levels. This volume provides an overview of the geological, geomorphological, climatic and sea-level history of the European continental shelf as a whole, as well as a series of detailed regional reviews for each of the major sea basins. The nature and variable attractions of the landscapes and resources available for human exploitation are examined, as are the conditions under which archaeological sites and landscape features are likely to have been preserved, destroyed or buried by sediment during sea-level rise. The authors also discuss the extent to which we can predict where to look for drowned landscapes with the greatest chance of success, with frequent reference to examples of preserved prehistoric sites in different submerged environments. Quaternary Paleoenvironments will be of interest to archaeologists, geologists, marine scientists, palaeoanthropologists, cultural heritage managers, geographers, and all those with an interest in the drowned landscapes of the continental shelf.

Consolidated Guidelines on the Use of Antiretroviral Drugs for Treating and Preventing HIV Infection - World Health Organization 2016

These guidelines provide guidance on the diagnosis of human immunodeficiency virus (HIV) infection, the use of antiretroviral (ARV) drugs for treating and preventing HIV infection and the care of people living with HIV. They are structured along the continuum of HIV testing, prevention, treatment and care. This edition updates the 2013 consolidated guidelines on the use of antiretroviral drugs following an extensive review of evidence and consultations in mid-2015, shared at the end of 2015, and now published in full in 2016. It is being published in a changing global context for HIV and for health more broadly.

Together We Will End AIDS - United Nations 2012

This new UNAIDS report, launched ahead of the International AIDS Society conference, AIDS 2012, contains the latest data on new HIV infections, those on treatment, HIV among children and AIDS-related maternal deaths. UNAIDS reports on HIV investments for the first time in detail and explores the need for greater value for money and sustainability. Discover scientific and other opportunities to end the AIDS epidemic, and review the state of human rights and gender equality and the way societies are transforming in response to AIDS. Calling for global

solidarity and shared responsibility, 'Together We Will End AIDS' includes commentaries and insights by global and community leaders, people living with HIV and those at greatest risk.

ICEL2013-Proceedings of the 8th International Conference on e-Learning - Eunice Ivala 2013-06-27

Educating People to be Emotionally Intelligent - Reuven Bar-On 2007

Brings together the foremost collection of experts writing on emotional intelligence, across areas including education, parenting, employment and neuroscience, sharing ideas on the importance of this topic and its application to increase performance in everyday life.

Violence Against Women - Lori Heise 1994

Opportunities for Dentists - 1989

Implementing Inclusive Education - Richard Rieser 2012

This revised and expanded second edition of Implementing Inclusive Education shows how Commonwealth countries are attempting to undertake inclusion in education, and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all aspects of the education system.

Bioethics, Human Rights and Health Law 2e - Ames Dhali 2020-10-13

The book is intended to be an introductory guide for healthcare practitioners, legal practitioners, healthcare students and law students who are concerned with the delivery of healthcare services in South Africa. The book emphasises the ethical and legal aspects of healthcare in the country while making references to international human rights and ethical standards applicable to healthcare services. As the book is a guide, it does not deal exhaustively with the topics discussed. Instead it aims to give healthcare and legal practitioners some general guidelines. New edition update: - an updated ethics chapter that includes a robust section on African indigenous values in the context of health care. - a chapter on universal health care coverage and the NHI. - the legislation need to be reviewed and updated. - a section on alternate dispute resolution. - the section on research also requires updating. - the case studies also need to be made more recent to include current contextually relevant issues like the Life Esidimeni Tragedy. Table of contents: Part 1: Introduction to Bioethics, Human Rights and Health Law: Principles and Practice - Background Chapter 1 Ethical concepts, theories and principles and their application to healthcare Chapter 2. Codes of healthcare ethics Chapter 3. Health and human rights Chapter 4. Health law - the basics Part 2: Specific Topics Chapter 5. Professionalism and the healthcare practitioner-patient relationship Chapter 6. Consent Chapter 7. Confidentiality Chapter 8. Medical malpractice and professional negligence Chapter 9. Reproductive health Chapter 10. Issues in genetics Chapter 11. Use of human tissue Chapter 12. End of life issues Chapter 13. HIV and AIDS Chapter 14. Resource allocation Chapter 15. Business ethics - the healthcare context Chapter 16. Human health and the environment Chapter 17. The ethics of research

Stress Management and Prevention - David D. Chen 2016-07-22

Gain a critical understanding of the nature of stress from a positive psychology framework that allows you to look beyond a simple pathology of stress-related symptoms. This new edition of Stress Management and Prevention integrates Eastern and Western concepts of stress while emphasizing an experiential approach to learning through the use of exercises, activities, and self-reflection. This student-friendly text contains chapters on conflict resolution, mindfulness meditation, time management, prevention of health risks, and cognitive restructuring. Included throughout are an emphasis on mindfulness and the neuroscience behind it, more theories, and new techniques for stress reduction and time management. An updated companion website includes even more video-based activities so students can see techniques in practice.

Writing and Learning in Cross-national Perspective - David Foster 2017-10-03

Despite the increasingly global implications of conversations about writing and learning, U.S. composition studies has devoted little attention to cross-national perspectives on student writing and its roles in wider cultural contexts. Caught up in our own concerns about how U.S. students make the transition as writers from secondary school to postsecondary education, we often overlook the fact that students around the world are undergoing the same evolution. How do the students in China, England, France, Germany, Kenya, or South Africa--the educational systems represented in this collection--write their way into the communities of their chosen disciplines? How, for instance, do

students whose mother tongue is not the language of instruction cope with the demands of academic and discipline-specific writing? And in what ways is U.S. students' development as academic writers similar to or different from that of students in other countries? With this collection, editors David Foster and David R. Russell broaden the discussion about the role of writing in various educational systems and cultures. Students' development as academic writers raises issues of student authorship and agency, as well as larger issues of educational access, institutional power relations, system goals, and students' roles in society. The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system, describe students' agency as writers, and identify contextual factors--social, economic, linguistic, cultural--that shape institutional responses to writing development. In discussions that bookend these studies of different educational structures, the editors compare U.S. postsecondary writing practices and pedagogies with those in other national systems, and suggest new perspectives for cross-national study of learning/writing issues important to all educational systems. Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations, the insights offered here and the call for further studies are especially welcome and timely.

Re-Authoring Life Narratives After Trauma: A Holistic Narrative Model of Care - Charles B. Manda 2019-12-12

Re-authoring Life Narratives after Trauma is an interdisciplinary, specialist resource for traumatic stress researchers, practitioners and frontline workers who focus their research and work on communities from diverse religious backgrounds that are confronted with trauma, death, illness and other existential crises. This book aims to argue that the biopsychosocial approach is limited in scope when it comes to reaching a holistic model of assessing and treating individuals and communities that are exposed to trauma. The holistic model must integrate an understanding of and respect for the many forms of religion and spirituality that clients might have (Pargament 2011). It will not only bring a spiritual perspective into the psychotherapeutic dialogue, but it will also assist in dealing with the different demands in pastoral ministry as related to clinical and post-traumatic settings. The book makes several contributions to scholarship in the disciplines of, although not limited to, traumatic stress studies, pastoral care and counselling, psychology and psychiatry. Firstly, the book brings spirituality into the psychotherapeutic dialogue; traditionally, religious and spiritual topics have not been a welcome part of the psychotherapeutic dialogue. Secondly, it underscores the significance of documenting literary narratives as a means of healing trauma; writing about our traumas

enables us to express things that cannot be conveyed in words, and to bring to light what has been suppressed and imagine new possibilities of living meaningfully in a changed world. Thirdly, it proposes an extension to the five-stage model of trauma and recovery coined by Judith Herman.

Food, Nutrition, and Health - Linda Tapsell 2019-05-09

Food, Nutrition and Health is an introductory text for all students of food and nutrition. It covers a knowledge matrix that reflects recognised principles and practices, from the basic chemistry of nutrients in foods, to the nature of the food supply and the impact of food consumption on health. This second edition includes more on nutrients and metabolism and introduces important areas in Indigenous food security, social connections with food, and aspects of food science. Fully updated with the inclusion of new chapters, Food, Nutrition and Health sees nutrition as predicated on a scientific knowledge base with specific applications to health within the context of the human life course. With its clear and engaging structure, this second edition equips students with the means to think more holistically about the relationships between nutrition science, and social and environmental issues.

Implementation and Scale Up of Point of Care (POC) Diagnostics in Resource-Limited Settings - Tivani Mashamba-Thompson 2020-10-13

Scale up and implementation of new point-of-care (POC) diagnostics is a global health priority to enable the adoption of new evidence-based POC diagnostics and to replicate and extend the reach of POC diagnostics. Global private and public sector agencies have significantly increased their investment in the development of POC diagnostics to meet the unmet needs of patients in resource-limited settings, particularly disease burdened settings with limited access to laboratory infrastructure. However, previous research has demonstrated that the availability of health technologies in these settings does not always guarantee patient-centered outcomes. The applicability, effectiveness and sustainability of diagnostic technologies is affected by the involvement of all stakeholders during planning and implementation, which must be relevant to each specific context and sensitive to local culture. Factors such as infrastructure, resources, values and characteristics of participants can influence the implementation, scalability and sustainability of health interventions such as POC diagnostics. This book, "Implementation and Scale up of Point of Care (POC) Diagnostics in Resource-Limited Settings", presents literature reviews and primary research studies focusing on the implementation and scale up of POC diagnostics in resource-limited settings.

The Southern Campus - 1922
