The Writing Public - Elizabeth Andrews Bond 2021-03-15

Inspired by the reading and writing habits of

citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate about the link between the Enlightenment and the political struggle that followed. Elizabeth Andrews Bond scoured France's local newspapers spanning the two decades prior to the Revolution as well as its first three years, shining a light on the letters to the editor. A form of early social media, these letters constituted a lively and ongoing conversation among readers. Bond takes us beyond the glamorous salons of the intelligentsia into the everyday worlds of the craftsmen, clergy, farmers, and women who composed these letters. As a result, we get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. *The Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the Enlightenment. Thanks to generous funding from Michigan State University and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.

Men and Bears - AA.VV. 2020-01-23

The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the

irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

More than Homer Knew - Studies on Homer and His Ancient Commentators - 2020-04-06

This book contains a collection of twenty-one essays in honour of Professor Franco Montanari by eminent specialists on Homer, ancient Homeric scholarship, and the reception of the Homeric Epics in both ancient and modern

times. It covers a wide range of important subjects, including neoanalysis and oral poetry, the Doloneia, the Homeric scholia, the theoretical premises of Aristarchean scholarship, and Homer in Sappho, Pindar, Comedy, Plato, and Hellenistic Poetry. As a whole, the contributions demonstrate the vitality of modern scholarship on Homeric poetry.

Translation and Transfer of Knowledge in Encyclopedic Compilations, 1680-1830 -

Clorinda Donato 2021-08-31

From its modern origins in seventeenth-century France, encyclopedic compilations met the need for the dissemination of information in a more flexible format, one that eschewed the limits of previous centuries of erudition. The rise of vernacular languages dovetailed with the demand for information in every sector, sparking competition among nations to establish the encyclopedic "paper empires" that became symbols of power and potential. The contributors to this edited collection evaluate the long-overlooked phenomenon of knowledge creation and transfer that occurred in hundreds of translated encyclopedic compilations over the long eighteenth century. Analysing multiple instances of translated compilations, *Translation and Transfer of Knowledge in Encyclopedic Compilations, 1680-1830* expands into the vast realm of the multilingual, encyclopedic compilation, the most tangible proof of the global enlightenment. Through the presentation of an extensive corpus of translated compilations, this volume argues that the true site of knowledge transfer resided in the transnational movement of ideas exemplified by these compendia. The encyclopedia came to represent the aspiring nation as a viable economic and political player on the world stage; the capability to tell knowledge through culture became the hallmark of a nation's cultural capital, symbolic of its might and mapping the how, why, and where of the global eighteenth century.
