Miracle on the Salt River - Meredith Haley
Whiteley 2014-10-28

Following enactment of the Reclamation Act, the first federally constructed dam broke ground in Arizona's Salt River Valley in 1905. With the inauguration of Roosevelt Dam, the distant dream of an abundant life in the desert became

a reality. The dam and farmer-operated water distribution system tamed the vicious drought, created arable land and became an irrigation model for the West. With the water came farmers and families, all eager for the chance to build new lives and communities. Many were just like the Haley family, farmers from

Kentucky and Missouri who settled in the area and whose descendants still call the valley home. Follow their journey and discover a snapshot of the life and community that grew from the ditches of the valley. Author Meredith Haley Whiteley explores this story from the ordinary person's perspective, weaving valley history through drought, loss, plenty and joy.

Baseball's Longest Games - Philip J. Lowry
2010-04-23

Baseball is the only major team sport that doesn't feature a clock, and there's a familiar saying among fans that as long as outs remain, the game can, theoretically, go on forever. Every now and again, it nearly does, as author Phil Lowry demonstrates. The product of more than four decades of research, this book catalogs

baseball games from around the world and throughout history that lasted 20 or more innings, stretched five or more hours, or ended after 1:00 am. Lowry also examines probability models to predict how often games of unusual length will occur.

Mathematical Modelling in Education Research and Practice - Gloria Ann Stillman 2015-07-20
In this volume cultural, social and cognitive influences on the research and teaching of mathematical modelling are explored from a variety of theoretical and practical perspectives. The authors of the current volume are all members of the International Community of Teachers of Mathematical Modelling and Applications, the peak research body in this field. A distinctive feature of this volume is the

high number of authors from South American countries. These authors bring quite a different perspective to modelling than has been showcased in previous books in this series, in particular from a cultural point of view. As well as recent international research, there is a strong emphasis on pedagogical issues including those associated with technology and assessment, in the teaching and learning of modelling. Applications at various levels of education are exemplified. The contributions reflect common issues shared globally and represent emergent or on-going challenges.
