### *We Need to Talk About Kevin* - Lionel Shriver 2011-05-01

The inspiration for the film starring Tilda Swinton and John C. Reilly, this resonant story of a mother's unsettling quest to understand her teenage son's deadly violence, her own ambivalence toward motherhood, and the explosive link between them remains terrifyingly prescient. Eva never really wanted to be a mother. And certainly not the mother of a boy who murdered seven of his fellow high school students, a cafeteria worker, and a much-adored teacher in a school shooting two days before his sixteenth birthday. Neither nature nor nurture exclusively shapes a child's character. But Eva was always uneasy with the sacrifices and social demotion of motherhood. Did her internalized dislike for her own son shape him into the killer he's become? How much is her fault? Now, two years later, it is time for her to come to terms with Kevin's horrific rampage, all in a series of startlingly direct correspondences with her estranged husband, Franklin. A piercing, unforgettable, and penetrating exploration of violence and responsibility, a book that the Boston Globe describes as "impossible to put down," is a stunning examination of how tragedy affects a town, a marriage, and a family.

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of The Daily Show's most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics—a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

The development of agriculture has often been described as the most important change in all of human history. Volume 2 of the Cambridge World History series explores the origins and impact of agriculture and agricultural communities, and also discusses issues associated with pastoralism and hunter-fisher-gatherer economies. To capture the patterns of this key change across the globe, the volume uses an expanded timeframe from 12,000 BCE-500 CE, beginning with the Neolithic and continuing into later periods. Scholars from a range of disciplines, including archaeology, historical linguistics, biology, anthropology, and history, trace common developments in the more complex social structures and cultural forms that agriculture enabled, such as sedentary villages and more elaborate foodways, and then present a series of regional overviews accompanied by detailed case studies from many different parts of the world, including Southwest Asia, South Asia, China, Japan, Southeast Asia and the Pacific, sub-Saharan Africa, the Americas, and Europe.

**The Thinking Past** - Adrian Cole 2014-08-26

"This book takes an analytical approach to world history. Instead of proceeding through history descriptively, it looks at several major questions and ideas, such as the role of technology, the development of universal religions, global trade, or participatory politics. If this sounds thematic, it is. But it also progresses chronologically, analyzing these themes as they apply in certain eras. We use both primary sources in-text, and the latest scholarship as secondary source. These we use frequently in each chapter both to employ the voices of scholars where they say things better than we could, and footnote them for students' reference. We also hope to convey the sense that all this content is part of an ongoing debate amongst historians—and scholars from different disciplines. Finally we attempt to keep the text accessible by focusing on narrative elements of history, and keeping in mind that the readers are undergraduates, often with little exposure to the subject matter. However, the level of ideas remains high"—Provided by publisher.

**Unsettled** - Ryan Hampton 2021-10-05

A shocking inside account of reckless capitalism and injustice in the Purdue Pharma bankruptcy case. In September 2019, Purdue Pharma—the maker of OxyContin and a company controlled by the infamous billionaire Sackler family—filed for bankruptcy to protect itself from 2,600 lawsuits for its role in fueling the U.S. overdose crisis. Author and activist Ryan Hampton served as co-chair of the official creditors committee that acted as a watchdog during the process, one of only four victims appointed among representatives of big insurance companies, hospitals, and pharmacies. He entered the case believing that exposing the Sacklers and mobilizing against Purdue would be enough to right the scales of justice. But he soon learned that behind closed doors, justice had plenty of other competition—and it came with a hefty price tag. *Unsettled* is the inside story of Purdue's excruciating Chapter 11 bankruptcy proceedings, the company's eventual restructuring, and the Sackler family's evasion of any true accountability. It's also the untold story of how a group of determined ordinary people tried to see justice done against the odds—and in the face of brutal opposition from powerful institutions and even government representatives. Although America was envisioned as an equitable place, where the vulnerable are protected from the greed of the powerful, the corporate-bankruptcy process betrays those values. In its heart of hearts, this system is built to shield the ultra-wealthy, exploit loopholes for political power, promote gross wealth inequality, and allow companies such as Purdue Pharma to run amok. The real story of the Purdue bankruptcy wasn't that the billion-dollar corporation was a villain, a serial federal offender. No matter what the media said, Purdue didn't do this alone. They were aided and abetted by the very systems and institutions that were supposed to protect Americans. Even on-your-side elected officials worked against Purdue's victims—maintaining the status quo at all costs. Americans deserve to know exactly who is responsible for failing to protect people over profits—and what a human life is worth to corporations, billionaires, and lawmakers. *Unsettled* is what happened behind closed doors—the story of a sick, broken system that destroyed millions of lives and let the Sacklers off almost scot-free.

**Innate** - Kevin J. Mitchell 2020-03-31

"What makes you the way you are—and what makes each of us different from everyone else? In *Innate*, leading neuroscientist and popular science blogger Kevin Mitchell traces human diversity and individual differences to their deepest level: in the wiring of our brains. Deftly guiding us through important new research, including his own groundbreaking work, he explains how variations in the way our brains develop before birth strongly influence our psychology and behavior throughout our lives, shaping our personality, intelligence, sexuality, and even the way we perceive the world. We all share a genetic program for making a human brain, and the program for making a brain like yours is specifically encoded in your DNA. But, as Mitchell explains, the way that program plays out is affected by random processes of development that manifest uniquely in each person, even identical twins. The key insight of *Innate* is that the combination of these developmental and genetic variations creates innate differences in how our brains are wired—

differences that impact all aspects of our psychology--and this insight promises to transform the way we see the interplay of nature and nurture. Innate also explores the genetic and neural underpinnings of disorders such as autism, schizophrenia, and epilepsy, and how our understanding of these conditions is being revolutionized. In addition, the book examines the social and ethical implications of these ideas and of new technologies that may soon offer the means to predict or manipulate human traits. Compelling and original, Innate will change the way you think about why and how we are who we are."--Provided by the publisher.

The World System - Barry Gills 2014-04-04

The historic long term economic interconnections of the world are now universally accepted. The idea of the economic 'world system' advanced by Immanuel Wallerstein has set the period of linkage in the early modern period but Andre Gunder Frank and Barry K. Gills think that this date is much too late. They argue an interconnection going back as much as 5000 years. In *The World System*, leading academics examine this issue, in a debate contributed to by William H. McNeill and Immanuel Wallerstein among others.

**A Confederacy of Dunces** - John Kennedy Toole 2007-12-01

Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review *A Confederacy of Dunces* is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).

The Human Journey - Kevin Reilly 2018-05-04

The Human Journey offers a truly concise yet satisfyingly full history of the world from ancient times to the present. The book's scope, as the title implies, is the whole story of humanity, in planetary context. Its themes include not only the great questions of the humanities—nature versus nurture, the history and meaning of human variation, the sources of wealth and causes of revolution—but also the major transformations in human history: agriculture, cities, iron, writing, universal religions, global trade, industrialization, popular government, justice, and equality. In each conceptually rich chapter, leading historian Kevin Reilly concentrates on a single important period and theme, sustaining a focused narrative and analytical perspective. Chapter 2, for example, discusses the significance of bronze-age urbanization and the advent of the Iron Age. Chapter 3 examines the meaning and significance of the age of "classical" civilizations. Chapter 4 explains the spread of universal religions and new technologies in the postclassical age of Eurasian integration. But these examples also reveal a range of approaches to world history. The first chapter is an example of current "Big History," the second of history as technological transformations, the third of comparative history, the fourth the history of connections that dominates, and thus narrows, so many texts. Free of either a confined, limiting focus or a mandatory laundry list of topics, this book begins with our most important questions and searches all of our past for answers. Well-grounded in the latest scholarship, this is not a fill-in-the-blanks text, but world history in a grand humanistic tradition.
