*Culinary Linguistics* - Cornelia Gerhardt 2013-07-04

Language and food are universal to humankind. Language accomplishes more than a pure exchange of information, and food caters for more than mere subsistence. Both represent crucial sites for socialization,

identity construction, and the everyday fabrication and perception of the world as a meaningful, orderly place. This volume on Culinary Linguistics contains an introduction to the study of food and an extensive overview of the literature focusing on its role in interplay with language. It is the only

publication fathoming the field of food and food-related studies from a linguistic perspective. The research articles assembled here encompass a number of linguistic fields, ranging from historical and ethnographic approaches to literary studies, the teaching of English as a foreign language, psycholinguistics, and the study of computer-mediated communication, making this volume compulsory reading for anyone interested in genres of food discourse and the linguistic connection between food and culture. Film Festivals - Marijke de Valck 2007

The film festival has come a long way from its relatively humble origins in Venice in 1932—when nine nations presented twenty-five feature films screened in an open-air cinema where men had to adhere to standards of formal evening attire. Hugely popular events that attract diverse lovers of cinema worldwide,

today's most famous film festivals—Cannes, Berlin, Venice, and Rotterdam—continue the story of a phenomenon that began in the midst of geopolitical disputes in war-torn Europe. *Film Festivals* shows how these festivals turned impediments into advantages and developed a successful global network that addresses issues as diverse as programming and prizes, national legitimation, city marketing, cinephilia, glamour, and audience. Discussing the festival as a media event and looking closer at various festival visitors, this volume also questions whether “successful” is in fact the appropriate term for understanding developments that could be considered dogmatic in their insistence on framing filmmakers as auteurs and films as belonging to “new waves.” An essential title for everyone interested in the culture, politics, and history that surround the celebration of cinema, *Film Festivals* proves that the movies are still our greatest—and most

In the sciences, the experimental approach has proved its worth in generating what subsequently requires understanding. Can the emergent field of artistic research be inspired by recent thinking about the history and workings of science?

**Classic Malt Whisky** - Ian

Wisniewski 2001

Revered by connoisseurs, malt whisky is considered by many to be the finest alcoholic drink ever created. Now *Classic Malt Whisky* tells you all you need to know about this celebrated drink, from the process of making it to the customs of imbibing it. Although, in a sense, the basic production is straightforward, Ian Wisniewski shows that every step of the process offers options that have a profound influence on the whisky, from the source of water to the types of barley and barrels used. Equally fascinating is the examination of the role malt whisky has played in Scottish

culture, including celebrations, sporting events, wedding rituals, and the traditions of the distilleries themselves.

Complete with an A-Z of brands, including brief histories and tasting notes, advice on how to serve malt scotch, and a wealth of color photos and illustrations, this is a superb companion for anyone who enjoys a wee dram or two.

*China In World History* - S. A.

M. Adshead 2016-01-13

A novel approach to Chinese history is adopted here, in that the theme of the book is China's relations with the non-Chinese world, not only political and economic, but cultural, social and technological as well. It seeks to show that China's history is part of everyone's history. In particular it traces China's relationship since the

thirteenth century to the emergent world order and the various world institutions of which that order is composed. Each chapter discusses China's comparative place in the world, the avenues of contact between China and other civilizations, and who and what passed along these channels.

**Shastra Vidya** - Harjit Sagoo  
2017-04-28

Shastra vidya is the name of the ancient North Indian martial art of the Kshatriyas - Hindus of the Vedic warrior class. This work, which is the result of many years of devoted research, looks at Shastra vidya's history, philosophy and technique. With textual evidence extracted from ancient Hindu scriptures, epics and treatises, this book presents the Kshatriya's art of armed and unarmed combat which includes punches, palm slaps, finger jabs, kicks, elbow attacks, knee strikes, head-butts, chokes, strangles, body throws, ground-fighting moves, sword strikes, mace blows, trident thrusts, lasso hurls, discus throws, archery

techniques and mantras for operating divine missiles - all accompanied by nearly 120 line drawings. Also included: the connection between Hindu gods and martial arts, the life and fighting skills of renowned ancient Hindu warriors, weapon worship, animal sacrifice, Dharmic rules of warfare, the four enemy-defeating remedies, formidable fortification, training of war elephants, horses, chariots and infantry, pre-battle goddess worship, battle arrays, battle spells, espionage, assassination methods, martyrdom and more...

Deep Green Resistance -  
Derrick Jensen 2011-01-04  
For years, Derrick Jensen has asked his audiences, "Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life?" No one ever says yes. Deep Green Resistance starts where the environmental movement leaves off: industrial civilization is incompatible with life. Technology can't fix it, and shopping—no matter how green—won't stop it. To save

this planet, we need a serious resistance movement that can bring down the industrial economy. Deep Green Resistance evaluates strategic options for resistance, from nonviolence to guerrilla warfare, and the conditions required for those options to be successful. It provides an exploration of organizational structures, recruitment, security, and target selection for both aboveground and underground action. Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play. Deep Green Resistance is a plan of action for anyone determined to fight for this planet—and win.

Alcohol: No Ordinary

Commodity - Thomas F. Babor  
2010-02-25

From a public health perspective, alcohol is a major contributor to morbidity and mortality, and impacts on many aspects of social life. This text describes advances in alcohol research with direct relevance to the development of effective policies at local, national and international level.

**Coffee Situation** - Leslie Cabell Hurt 1963

**This Naked Mind** - Annie Grace 2018-01-02

This Naked Mind has ignited a movement across the country, helping thousands of people forever change their relationship with alcohol. Many people question whether drinking has become too big a part of their lives, and worry that it may even be affecting their health. But, they resist change because they fear losing the pleasure and stress-relief associated with alcohol,

and assume giving it up will involve deprivation and misery. This Naked Mind offers a new, positive solution. Here, Annie Grace clearly presents the psychological and neurological components of alcohol use based on the latest science, and reveals the cultural, social, and industry factors that support alcohol dependence in all of us. Packed with surprising insight into the reasons we drink, this book will open your eyes to the startling role of alcohol in our culture, and how the stigma of alcoholism and recovery keeps people from getting the help they need. With Annie's own extraordinary and candid personal story at its heart, this book is a must-read for anyone who drinks. This Naked Mind will give you freedom from alcohol. It removes the psychological dependence so that you will not crave alcohol, allowing you to easily drink less (or stop drinking). With clarity, humor, and a unique blend of science and storytelling, This Naked Mind will open the door to the life

you have been waiting for.  
"You have given me my live back." —Katy F., Albuquerque, New Mexico "This is an inspiring and groundbreaking must-read. I am forever inspired and changed." —Kate S., Los Angeles, California "The most selfless and amazing book that I have ever read." —Bernie M., Dublin, Ireland  
The Death Penalty - BRANDON. KOVARSKY GARRETT (LEE.) 2018-06-09  
The death penalty is contested across modern social, political, academic, and legal institutions, and this interdisciplinary text helps readers analyze that debate. It begins with *Furman v. Georgia*, which doubles as the Supreme Court's only decision striking down the death penalty and as the origin of the modern American death penalty. The text explores the legal rules and moral reasoning behind the principle that the death penalty be reserved for the worst offenders, as well as the most uncomfortable realities of American capital punishment--the likelihood of wrongful

executions and the undeniable influence of race on death penalty practice. Discussion of law and theory is always supplemented with appropriate empirical studies, and is connected to the practice of lawyers on the ground. The text concludes with a glimpse to the future of the death penalty, and situates the increasingly exceptional American experience in an international context. This legal material is carefully presented so as to remain accessible to non-lawyers, and it is intended for anyone with an interest in capital punishment.

*Global Strategy to Reduce the Harmful Use of Alcohol* - World

Health Organization 2010

Every year, the harmful use of alcohol kills 2.5 million people, including 320,000 young people between 15 and 29 years of age. It is the eighth leading risk factor for deaths globally, and harmful use of alcohol was responsible for almost 4% of all deaths in the world, according to the estimates for 2004. In addition to the resolution, a global strategy developed by WHO in close collaboration with Member States provides a portfolio of policy options and interventions for implementation at the national level with the goal to reduce the harmful use of alcohol worldwide. Ten recommended target areas for policy options include health services' responses, community action, pricing policies and reducing the public health impact of illicit alcohol and informally produced alcohol. WHO was also requested to support countries in implementing the strategy and monitor progress at global, regional and national levels.

*Global Nomads* - Anthony D'Andrea 2007-01-24

Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to

understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

*Saving Lives* - Sandy Summers  
2014-09-17

For millions of people worldwide, nurses are the difference between life and death, self-sufficiency and dependency, hope and despair. But a lack of understanding of what nurses really do -- one perpetuated by popular media's portrayal of nurses as simplistic archetypes -- has devalued the profession and contributed to a global shortage that constitutes a public health crisis. Today, the thin ranks of the nursing workforce contribute to

countless preventable deaths. This fully updated and expanded edition of *Saving Lives* highlights the essential roles nurses play in contemporary health care and how this role is marginalized by contemporary culture. Through engaging prose and examples drawn from television, advertising, and news coverage, the authors detail the media's role in reinforcing stereotypes that fuel the nursing shortage and devalue a highly educated sector of the contemporary workforce. Perhaps most important, the authors provide a wealth of ideas to help reinvigorate the nursing field and correct this imbalance. As American health care undergoes its greatest overhaul in decades, the practical role of nurses -- that as autonomous, highly skilled practitioners -- has never been more important. Accordingly, *Saving Lives* addresses both the sources of, and prescription for, misperceptions surrounding contemporary nursing.

### **How the Gringos Stole**

**Tequila** - Chantal Martineau

2019-07-25

Once little more than party fuel, tequila has graduated to the status of fine sipping spirit. How the Gringos Stole Tequila traces the spirit's evolution in America from frat-house firewater to luxury good. But there's more to the story than tequila as upmarket drinking trend. Author Chantal Martineau spent several years immersing herself in the world of tequila -- traveling to visit distillers and agave farmers in Mexico, meeting and tasting with leading experts and mixologists around the United States, and interviewing academics on either side of the border who have studied the spirit. The result is a book that offers readers a glimpse into the social history and ongoing impact of this one-of-a-kind drink. It addresses issues surrounding the sustainability of the limited resource that is agave, the preservation of traditional production methods,

and the agave advocacy movement that has grown up alongside the spirit's swelling popularity. In addition to discussing the culture and politics of Mexico's most popular export, this book also takes readers on a colorful tour of the country's Tequila Trail, as well as introducing them to the mother of tequila: mezcal.

**Women who Dared** - Valjean McLenighan 1979

Presents brief biographies of prominent women, including Margaret Bourke-White, Diana Nyad, Janet Guthrie, and Kitty O'Neill.

**Why We Play** - Roberte Hamayon 2016

Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national

holidays are called "Games," echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. "Playing is no 'doing' in the ordinary sense" once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?

[Moving Away from the Death Penalty](#) - Ivan Šimonović 2014  
Capital punishment is irrevocable. It prohibits the correction of mistakes by the justice system and leaves no room for human error, with the

gravest of consequences. There is no evidence of a deterrent effect of the death penalty. Those sacrificed on the altar of retributive justice are almost always the most vulnerable. This book covers a wide range of topics, from the discriminatory application of the death penalty, wrongful convictions, proven lack of deterrence effect, to legality of the capital punishment under international law and the morality of taking of human life.

*Modern Medical Toxicology* - Pillay 2012-11-30

*Viral Loads* - Lenore Manderson 2021-09-20  
Drawing upon the empirical scholarship and research expertise of contributors from all settled continents and from diverse life settings and economies, *Viral Loads* illustrates how the COVID-19 pandemic, and responses to it, lay bare and load onto people's lived realities in countries around the world. A crosscutting theme pertains to how social unevenness and

gross economic disparities are shaping global and local responses to the pandemic, and illustrate the effects of both the virus and efforts to contain it in ways that amplify these inequalities. At the same time, the contributions highlight the nature of contemporary social life, including virtual communication, the nature of communities, neoliberalism and contemporary political economies, and the shifting nature of nation states and the role of government. Over half of the world's population has been affected by restrictions of movement, with physical distancing requirements and self-isolation recommendations impacting profoundly on everyday life but also on the economy, resulting also, in turn, with dramatic shifts in the economy and in mass unemployment. By reflecting on how the pandemic has interrupted daily lives, state infrastructures and healthcare systems, the contributing authors in this volume mobilise anthropological theories and concepts to locate the

pandemic in a highly connected and exceedingly unequal world. The book is ambitious in its scope - spanning the entire globe - and daring in its insistence that medical anthropology must be a part of the growing calls to build a new world.

### **A Practical Approach to Cognitive Behaviour Therapy for Adolescents -**

Manju Mehta 2015-02-02

This volume discusses adolescent mental health

concerns in non-Western contexts and situations, ranging from common mental disorders to building life skills. It combines previous literature and empirical work on various disorders to provide a comprehensive account of cognitive behaviour therapy (CBT) for adolescents. The volume covers a wide spectrum of conditions, ranging from anxiety to affective disorders and other associated disorders. It gives a practical guide to the management of disorders with specific focus on case vignettes, outlining session details and specific techniques to be used throughout the intervention plan. A detailed appendix elaborating various CBT techniques is included in the volume. It presumes a basic understanding and training in mental health care and psychotherapy and is useful for professionals: psychologists, counsellors, paediatricians and other practitioners in the field of mental health. It is also useful as a text for courses in health psychology, clinical psychology, adolescent

medicine and adolescent psychology.

*India's Power Elite* - Baru Sanjaya 2021-08-15

India's Power Elite is a study of the nature of power and elitism in postcolonial India. Its point of departure is the political transition under way in twenty-first-century India, with the marginalization of the Congress Party and the staging of a cultural revolution symbolized by the rise of Hindu majoritarianism. Baru deconstructs the morphology of the Indian power elite—comprising remnants of a feudal gentry, kulaks, a metropolitan business class, the civil services and a cultural elite of opinion-makers. He also examines the role of caste, class and culture in the emergence of a 'New India'. Aimed at the socially engaged reader, this book will interest both students as well as those who wield power.

**The Equanimous Mind (2nd Edition)** - Manish Chopra, PhD  
2021-08-01

The Equanimous Mind (2nd Edition) chronicles the author's first ten-day Vipassana meditation camp experience at the end of 2010 and the life-changing impact it has had on his personal and professional life since that time. This new second edition comes at an important milestone in Manish's journey as ten years have passed since that first ten-day retreat. A new epilogue in this 10th anniversary edition has been expanded and

enriched with updates on his progress since the journey began a decade ago. The book describes a ten-day Vipassana meditation course in the tradition of S. N. Goenka from the standpoint of someone encountering meditation for the first time. It contains a detailed, journal-like narrative of the rich and complex sequence of events that unrolls during the retreat. The author's capacity to recall and sequence vivid details by the hundreds gives the book the feeling of an experience rather than merely of a recounting. The Equanimous Mind has a particular heartwarming quality because of the earnestness with which the author seeks to grow into being the best possible person he can be. Many people will benefit from this volume of clear sentences, deep feelings, and important messages.

=====  
Out of gratitude for the benefits the author has received from the practice of Vipassana meditation, he will be donating the proceeds from this book to

Machine Learning with R -

Brett Lantz 2013-10-25

Written as a tutorial to explore and understand the power of R for machine learning. This practical guide that covers all of the need to know topics in a very systematic way. For each machine learning approach, each step in the process is detailed, from preparing the data for analysis to evaluating the results. These steps will build the knowledge you need to apply them to your own data science tasks. Intended for those who want to learn how to use R's machine learning capabilities and gain insight from your data. Perhaps you already know a bit about machine learning, but have never used R; or perhaps you know a little R but are new to machine learning. In either case, this book will get you up and running quickly. It would be helpful to have a bit of familiarity with basic programming concepts, but no

prior experience is required.

**A Blizzard of Polar Bears** -

Alice Henderson 2021-11-09

Wildlife biologist Alex Carter is back, fighting for endangered species in the Canadian Arctic and battling for her life in this action-packed follow-up to *A Solitude of Wolverines*, "a true stunner of a thriller debut" (James Rollins) and "a great read" (Nevada Barr). Fresh off her wolverine study in Montana, wildlife biologist Alex Carter lands a job studying a threatened population of polar bears in the Canadian Arctic. Embedded with a small team of Arctic researchers, she tracks the majestic bears by air, following them over vast, snowy terrain, spending days leaning precariously out of a helicopter with a tranquilizer gun, until she can get down on the ice to examine them up close. But as her study

progresses, and she gathers data on the health of individual bears, things start to go awry. Her helicopter pilot quits unexpectedly, equipment goes missing, and a late-night intruder breaks into her lab and steals the samples she's collected. She realizes that someone doesn't want her to complete her study, but Alex is not easily deterred. Managing to find a replacement pilot, she

returns to the icy expanses of Hudson Bay. But the helicopter catches fire in midflight, forcing the team to land on a vast sheet of white far from civilization. Surviving on the frozen landscape is difficult enough, but as armed assailants close in on snowmobiles, Alex must rely on her skills and tenacity to survive this onslaught and carry out her mission.
