In the hospital, there is a woman. Her hair, once blond, hangs in tangles down her back. She doesn't remember why she's in such a terrible place. Just a tea party long ago, and long ears, and blood... Then, one night, a fire at the hospital gives the woman a chance to escape, tumbling out of the hole that imprisoned her, leaving her free to uncover the truth about what happened to her all those years ago. Only something else has escaped with her. Something dark. Something powerful. And to find the truth, she will have to track this beast to the very heart of the Old City, where the rabbit waits for his Alice.

Transhumanism - David Livingstone 2015-09-02

Transhumanism is a recent movement that extols man's right to shape his own evolution, by maximizing the use of scientific technologies, to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as 2001: A Space Odyssey, Blade Runner, the Terminator series, and more recently, The Matrix, Limitless, Her and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project, rooted in Rosicrucianism and Freemasonry, and derived from the Kabbalah, which asserts that humanity is evolving intellectually, towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself, in the form of living machines, or artificial intelligence.

Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK-Ultra, the CIA's "mind-control" program. MK-Ultra promoted the "mind-expanding" potential of psychedelic drugs, to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances, equated with the "apple" of the Tree of Knowledge. And, as revealed in the movie Lucy, through the use of "smart drugs," and what transhumanists call "mind uploading," man will be able to merge with the Internet, which is envisioned as the end-point of Kabbalistic evolution, the formation of a collective consciousness, or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human

knowledge, and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the "God" of occultism, or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

U.S.S. Seawolf - Patrick Robinson 2009-10-13

But then the unthinkable happens: Seawolf, collides with a Chinese destroyer and falls into enemy hands. A team of cunning Navy SEALs--the biggest Special Forces assault group assembled since Vietnam--is sent in to free the captive Seawolf, crew and bring them home. The American Eagle confronts the Chinese Dragon with the balance of world power on the line. Failure is not an option...

KulturConfusão - On German-Brazilian Interculturalities - Anke Finger 2015-07-31

The analyses of German and Brazilian cultures found in this book offer a much-needed rethinking of the intercultural paradigm for the humanities and literary and cultural studies. This collection examines cultural interactions between Germany and Brazil from the Early Modern period to the present day, especially how authors, artists and other intellectuals address the development of society, intervene in the construction and transformation of cultural identities, and observe the introduction of differing cultural elements in and beyond the limits of the nation. The contributors represent various academic disciplines, including German Studies, Luso-Afro-Brazilian Studies, Cultural Studies, Linguistics, Art History and the social sciences. Their essays cover a wide range of works and media, and the issues they address are relevant not only for each of the scholarly disciplines involved, but also in discussions of current cultural practices in connection to all forms of media. The collection thus

serves as a model for further intercultural research, since it calls into question the very terms through which we understand the relationships between cultures, as well as their products, practices, and perspectives.

The Girls of Room 28 - Hannelore Brenner 2009-09-01

From 1942 to 1944, twelve thousand children passed through the Theresienstadt internment camp, near Prague, on their way to Auschwitz. Only a few hundred of them survived the war. In *The Girls of Room 28*, ten of these children—mothers and grandmothers today in their seventies—tell us how they did it. The Jews deported to Theresienstadt from countries all over Europe were aware of the fate that awaited them, and they decided that it was the young people who had the best chance to survive. Keeping these adolescents alive, keeping them whole in body, mind, and spirit, became the priority. They were housed separately, in dormitory-like barracks, where they had a greater chance of staying healthy and better access to food, and where counselors (young men and women who had been teachers and youth workers) created a disciplined environment despite the surrounding horrors. The counselors also made available to the young people the talents of an amazing array of world-class artists, musicians, and playwrights—European Jews who were also on their way to Auschwitz. Under their instruction, the children produced art, poetry, and music, and they performed in theatrical productions, most notably *Brundibar*, the legendary “children’s opera” that celebrates the triumph of good over evil. In the mid-1990s, German journalist Hannelore Brenner met ten of these child survivors—women in their late-seventies today, who reunite every year at a resort in the Czech Republic. Weaving her interviews with the women together with excerpts from diaries that were kept secretly during the war and samples of the art, music, and poetry created at Theresienstadt, Brenner gives us an unprecedented picture of daily life there, and of the extraordinary strength, sacrifice, and indomitable will that combined—in the girls and in their caretakers—to make survival possible.

Inconsistencies in Greek and Roman Religion. 1, Ter Unus - H. S. Versnel 1990

This is the first of a two-volume collection of studies in inconsistencies in Greek and Roman religion. Their common aim is to argue for the historical relevance of various types of ambiguity and dissonance. The first volume focuses on the central paradoxes in ancient henotheism. The term 'henotheism' -- a modern formation after the stereotyped acclamation: #EIS O QEOS# ("one is the god"), common to early Christianity and contemporaneous paganism -- denotes the specific devotion to one particular god without denying the existence of, or even cultic attention to, other gods. After its prime in the twenties and thirties of this century the term fell into disuse. Nonetheless, the notion of henotheism represents one of the most remarkable and significant shifts in Graeco-Roman religion and hence deserves fresh reconsideration.

The Romances of Chretien de Troyes - Joseph J. Duggan 2008-10-01

Twelfth-century French poet Chrétien de Troyes was one of the most influential figures in Western literature, for his romantic poems on the legend of King Arthur gave rise to a tradition of storytelling that continues to this day. This important and fascinating book is a study of all of Chrétien's work. Joseph J. Duggan begins with an introduction that sets Chrétien within the social and intellectual currents of his time. He then organizes the book in chapters that focus on major issues in Chrétien's romances rather than on individual works, topics that range from the importance of kinship and genealogy to standards of secular moral responsibility and from Chrétien's art of narration to his representation of knighthood. Duggan offers new perspectives on many of these themes: in a chapter on the influence of Celtic mythology, for example, he gives special attention to the ways Chrétien integrated portrayals of motivation with mythic themes and characters, and in discussing the Grail romance, he explores the parallels between Perceval's and Gauvain's adventures.

Artificial Intelligence in Marketing - IntroBooks Team

Artificial intelligence in marketing, which is commonly known as AI Marketing, is a process of striking a chord of linkage between customer statistics and artificial intelligence hypotheses. It is basically an automated learning curve for a business house on the marketing front such that it can predict a customer's ongoing move and the next phase of action. By doing so, a business entity can easily amplify its outlook in the interests of the customer, which, in turn, displays the quality of relevant products or services in an intelligent manner to reach a larger audience. Due to the emergence of artificial intelligence marketing solutions, an

effective recourse is seen apparent in terms of bonding between scientific data points, which are amassed industriously for subsequent implementation. In other words, the erstwhile process of manual hard work of assembling and analyzing a colossal quantum of data has surely become a thing of the past.
