## **This Much I Know about Mind Over Matter** - John Tomsett 2016-01-10

In This Much I Know about Mind Over Matter John Tomsett addresses, with refreshing honesty, the growing problem of the mental health issues experienced by children and young people, offering up a plan for averting a mental health crisis in our schools. Tomsett interweaves his formative and professional experience with strategies for addressing students' mental health issues and insights from his interviews with high profile thinkers on the subject including Professor Tanya Byron, Natasha Devon, Norman Lamb, Tom Bennett, Claire Fox and Dr Ken McLaughlin. The book is replete with truths about the state of children's mental wellbeing, about creating a school culture where everyone can thrive and about living in the shadow of his mother's manic depression. With his typical mixture of experience, wisdom and research-based evidence, Tomsett explains how he manages the pressure of modern day state school headship in a climate where you are only as good as your last set of examination results, a pressure which acutely affects staff and students too. He outlines his strategies for mitigating this pressure and turning the tide of students' mental health problems. The autobiographical narrative modulates between self-effacing humour and heart-wrenching stories of his mother's life, blighted by mental illness. His professional reflections are a wisdom-filled blend of evidence-based policy and decades of experience in teaching and school leadership. Tomsett writes with genuine humility. His prose is beautiful in its seeming simplicity. When you pick up one of his books you will find you have read the first fifty pages before you have even noticed: surely the hallmark of truly great writing. Topics covered include: the real state of the nation's mental health, the perfect storm that is precipitating a mental health crisis in schools, the problems of loose terminology - what do we really mean when we talk about a mental health epidemic? - and poor understanding of mental health problems and mental illness, the disparity between mental and physical health in public discourse, treatment and funding, beginning the conversation about mental health, the philosophical and psychological principles underpinning the debate, strategies to support students in managing their own mental health better, resilience, growth mindset, mindfulness, grit, failure and mistakes, coping with pressure, York's school wellbeing workers project, evidence-based strategies that have worked in Huntington School, metacognitive strategies for improving exam performance, interviews with professionals in the field, the reality of living with a parent with a serious mental illness, self-concept and achievement, perfectionism, the relationship between academic rigour and therapeutic education and, significantly, what the research says, what the experts say and what Tomsett's experience says about averting a mental health crisis in schools. Suitable for teachers, leaders and anyone with an interest in mental health in schools.

*The Writing Revolution* - Judith C. Hochman 2017-08-07

Why you need a writing revolution in your classroom and how to lead it *The Writing Revolution* (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, *The Writing Revolution* can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities *The Writing Revolution* is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

**Teaching the Content Areas to English Language Learners in Secondary Schools** - Luciana C. de Oliveira 2019-01-17

This practitioner-based book provides different approaches for reaching an increasing population in today's schools - English language learners (ELLs). The recent development and adoption of the Common Core State Standards for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects (CCSS-ELA/Literacy), the Common Core State Standards for Mathematics, the C3 Framework, and the Next Generation Science Standards (NGSS) highlight the role that teachers have in developing discipline-specific competencies. This requires new and innovative approaches for teaching the content areas to all students. The book begins with an introduction that contextualizes the chapters in which the editors highlight transdisciplinary theories and approaches that cut across content areas. In addition, the editors include a table that provides a matrix of how strategies and theories map across the chapters. The four sections of the book represent the following content areas: English language arts, mathematics, science, and social studies. This book offers practical guidance that is grounded in relevant theory and research and offers teachers suggestions on how to use the approaches described.

**Middle Grounds: Essays on Midlife Mothering** - Kathy Mantas 2018-06-01

Although motherhood writings are rich and emerging, the available literature on midlife motherhood and mothering is incomplete and often presented from a narrow perspective. Middle Grounds: Essays on Midlife Mothering fills this gap, widening the lens on a sociological phenomenon that is expanding in the twenty first century. It brings together scholarly and creative essays from diverse disciplines and cultural perspectives to reflect a more contemporary viewpoint — that motherhood and mothering is not limited by the stages of life or chronological age. It echoes distinct voices speaking about experiences that represent a global reality for midlife mothering practices. In essence, this collection demonstrates that everything can transpire in the middle period of a woman's life. Thus, in midlife, we encounter a broad range of mothering experiences and practices, and ways of re-resenting and expressing them

*Teaching Writing in English as a Foreign Language* - Huan Zhao 2022-05-30

This book explores teachers' cognitions about the teaching of writing in English as a foreign language (EFL) and their teaching practice, as well as factors influencing the formation and reformation process of

their cognition. Taking stock of Bakhtin's dialogism as the theoretical framework, the authors argue that the formation and reformation of teacher cognition is a dialogic process. A systematic analysis of participating teachers' cognition formation and re-formation process suggests the highly individual nature of teachers' cognitions. EFL researchers and teachers, teacher educators, teacher education policymakers, university administrators and EFL textbook writers could draw on the findings of the study to provide better resources to implement the teaching of EFL writing more effectively. The study has adopted a mixed-methods approach, whose quantitative results show the patterns and differences of teacher cognition among teachers of different backgrounds and with different schooling, education and working experiences. The qualitative findings show in detail teachers' cognition formation and reformation processes and the factors contributing to such processes, revealing convergence and divergence of teachers' stated cognitions, with a focus on the discrepancy between teacher cognition and teaching practice. These are useful lenses through which researchers and teachers will find significant implications for offering EFL writing instruction more effectively.
