“As fearless as a futuristic Game of Thrones.”— MARGARET STOHL, New York Times bestselling co-author of the Beautiful Creatures trilogy

Like many, she's heard of a mythical land simply called “the Blue.” They say it's a paradise, where the sun still shines and the waters are turquoise. More importantly, it's a place where Nat won't be persecuted, even if her darkest secret comes to light. But passage to the Blue is treacherous, if not impossible, and her only shot is to bet on a ragtag crew of mercenaries led by a cocky runner named Ryan Wesson there. Danger and deceit await on every corner, even as Nat and Wes find themselves inexorably drawn to each other. But can true love survive the lies? Fiery hearts collide in this fantastic tale of the evil men do and the awesome power within us all. Birdseye - Mark Kurlansky 2013-02-12

While working as a fur trapper in Labrador, Canada, Clarence Birdseye encountered an age-old problem: bad food and an unappealing, unhealthy diet. However, he observed that fresh vegetables wetted and left outside in the Arctic winds froze in a way that maintained their integrity after thawing. As a result, he developed his patented Birdseye freezing process and started the company that still bears his name. Birdseye forever changed the way we preserve, store, and distribute food, and the way we eat. Mark Kurlansky's vibrant and affectionate narrative reveals Clarence Birdseye as a quintessential "can-do" American inventor—his other patents include an electric sunlamp, a harpoon gun to tag finback whales, and an improved incandescent lightbulb—and shows how the greatest of changes can come from the simplest of ideas and the unlikeliest of places.

Using a realist perspective, the author concludes that there are substantial similarities in the four case studies: Russian support for minority separatist movements, conflict, Russian intervention as peacekeepers, Russian control over the diplomatic process to prevent resolution of the conflict, and a perpetuation of Russian presence in the area. The author places the conflicts in the context of international law and nationalism theory.

Geocryology - Stuart A. Harris 2017-09-28

This book provides a general survey of Geocryology, which is the study of frozen ground called permafrost. Frozen ground is the product of cold climates as well as a variety of environmental factors. Its major characteristic is the accumulation of large quantities of ice which may exceed 90% by volume. Soil water changing to ice results in ground heaving, while thawing of this ice produces ground subsidence often accompanied by soil flowage. Permafrost is very susceptible to changes in weather and climate as well as to changes in the microenvironment. Cold weather produces contraction of the ground, resulting in cracking of the soil as well as breakup of concrete, rock, etc. Thus permafrost regions have unique landforms and processes not found in warmer lands. The book is divided into three parts. Part 1 provides an introduction to the characteristics of permafrost. Four chapters deal with its definition and characteristics, the unique processes operating there, the factors affecting it, and its general distribution. Part 2 consists of seven chapters

describing the characteristic landforms unique to these areas and the processes involved in their formation. Part 3 discusses the special problems encountered by engineers in construction projects including settlements, roads and railways, the oil and gas industry, mining, and the agricultural and forest industries. The three authors represent three countries and three language groups, and together have over 120 years of experience of working in permafrost areas throughout the world. The book contains over 300 illustrations and photographs, and includes an extensive bibliography in order to introduce the interested reader to the large current literature. Finalist of the 2019 PROSE Awards.

Mysterious assaults on college students in Gothenburg's parks are carried out in the dark of the night, while during the day toddlers are abducted from their nursery schools and quickly returned, seemingly unharmed, before anyone even notices they are missing. Investigating these bizarre cases, D.C.I. Winter and his team follow their scant leads to ?the flats,? the barren prairies of rural Sweden, whose wastelands conceal crimes as sinister as the land itself. Winter must deduce the labyrinthine connections between the cases before the culprit?or is it culprits??closes in on his own family. Haunting and psychologically astute, Frozen Tracks is another triumph from the award-winning master of Swedish noir.

Fortunately for her, Agnarr doesn't know that Iduna is the Northuldra girl he saw seemingly flying on a gust of wind all those years ago, the day of the celebration turned disaster. The day Agnarr lost his father, the king. The day Agnarr himself almost died. What Agnarr does know is that Iduna is a true ally in the face of his royal responsibilities and the expectations of an overbearing council and a well-meaning regent who will rule in Agnarr's place until he turns twenty-one and assumes the Arendellian throne. As Iduna and Agnarr grow ever closer, however, friendship is no longer enough. If only falling for each other didn't mean risking their futures: Iduna's as a hidden-in-plain-sight citizen of Arendelle, and Agnarr's as imminent king. But for a chance at true love, the risk might be worth taking

The new kid on the block in Scandinavian crime! One cold morning in December, in a small rural town on the Swedish coast, Ake Melkersson is on his way to work when his car breaks down. Luckily he spots a garage nearby, but as he approaches he realises something is wrong. The owner of the garage lies dead, sprawled on the ground, his lower body crushed where a car has repeatedly driven over him. The murder investigation is led by Inspector Christian Tell who is something of a lone wolf. But he has very few clues to go on and the deceased's wife is out of the country on holiday. Ten years earlier Maya Granith is living at a college for troubled teenagers after escaping her shattered home and her neurotic mother. But when an older student takes an overbearing interest in her things begin to go wrong. Back in the present, another murder occurs when a man is shot in the head; again his body has been driven over several times. Tell is becoming increasingly involved with a female reporter but as she witness on the first case, their relationship is complicated - especially when aspects of the case remind the reporter of someone she knew who went missing ten years earlier.
