Curriculum Development in Vocational and Technical Education - Curtis R. Finch 1979

A Kiss Remembered - Sandra Brown 2008-11-16

After leaving her disastrous marriage behind, Shelley Browning goes back to college to get her degree and comes face-to-face with an unforgettable man from her past. Grant Chapman had briefly taught her in high school ten years earlier. There teacher and student had shared a single, scorching, unplanned kiss that still haunts Shelley's dreams. Now, as irresistible as ever, Grant has just returned to teaching after a stint as a congressional aide in Washington...and sees no imporopriety in asking Shelley out. Isn't this what she secretly longs for? Never has Shelley felt more confused about what she really wants or what is best for them both. But a stunning accusation is about to change all that and force Shelley Browning to either take some dangerous risks -- or spend the rest of her life regretting what could have been.

India: Preparation for the World of Work - Matthias Pilz 2016-02-10

This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market - because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research. Handbook of Technical and Vocational Education and Training Research - Felix Rauner 2008-12-16

Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

All Roads Lead to Ganga - Ruskin Bond 2007

Travel memoirs of the author.

Malevolence - Tales From Beyond the Veil - J Scott-Marryat 2014-11-17

My name is Isambard Roxton-Smyth, I am the Minister for Ghosts and I bring you twenty two tales of malevolence; distilled into an impure essence, reeking of wrongdoing, and ready to escape from these pages into your mind. Published authors and newcomers are channelled by me in the laboratory of ill-intent, all with one disturbing aim: to bring forth malevolence in all its forms. Don't read this book late at night.

Handbook of Career Development - Gideon Arulmani 2014-02-08

This book is focused on work, occupation and career development: themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development, counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies, some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and

economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing, research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

The Rupa Book of Great Animal Stories - Ruskin Bond 2003

The Change Book - Mikael Krogerus 2013-01-03

How do you make your way in a world that is changing at an unprecedented rate? Why do we have less and less time? Why are some people unfaithful? How can our government act against threats before they happen? This book is about change - from the small and seemingly insignificant transitions in our day-to-day lives, to the big and almost incomprehensible shifts in human history. Drawing on expert advice and often complex theories, the authors of the bestselling *The Decision Book* present fifty simple and effective models to help us make sense of change in our world. Change is happening all around us, in every sphere from the personal and political to economics and the environment. In *The Change Book* you'll find models explaining the financial crisis, why biotechnology is the industry of the future and why cities are the new nations. Whether you're buying a new car, deciding who to vote for, or making an investment, this little black book will offer surprisingly simple explanations of our complicated world - and radically challenge some of your preconceived ideas.

Sins and Scarlet Lace - Liliana Hart 2019-01-20

Elements of Dynamic Optimization - Alpha C. Chiang 1999-12-22

In this text, Dr. Chiang introduces students to the most important methods of dynamic optimization used in economics. The classical calculus of variations, optimal control theory, and dynamic programming in its discrete form are explained in the usual Chiang fashion, with patience and thoroughness. The economic examples, selected from both classical and recent literature, serve not only to illustrate applications of the mathematical methods, but also to provide a useful glimpse of the development of thinking in several areas of economics.

The Adventures of Rusty - Ruskin Bond 2017-11-28

Rusty, the boy whose stories have charmed and entertained children for

years, brings together his best adventures in one volume! From the time he was a boy living with his grandparents in Dehra, surrounded by an assortment of odd animals, people and relatives, to when he gets sent away to school, then makes his way to London and becomes a writer, Rusty's had more adventures than we can count. This omnibus edition contains his best, funniest, most exciting escapades. In these pages, there's Toto, the monkey that travelled in a bag on a train; an encounter with a leopard; life as a young writer in faraway London; and the return home to roots that were always loved and never forgotten. An evergreen classic of children's writing in India, *The Adventures of Rusty* will be enjoyed like never before.

Funny Side Up - Ruskin Bond 2006

I have lived to see Bombay become Mumbai, Calcutta become Kolkata, and Madras become Chennai. Times change, names change, and if Bond becomes Bonda I won't object.' With these lines, begins another brilliant collection of essays, stories and poems by writer par excellence, Ruskin Bond. With an ability to look at ordinary situations with unique wit and acuity, Ruskin Bond invites us into his home, his countryside, his life. Peopled with monkeys, wild boars, an aunt with a phobia of flowers, an eccentric cousin who thinks he is the great cricket player Ranji, the wise seven-year-old Gautam, this collection is an absorbing read for readers of all ages.

Vocational Education and Training in Times of Economic Crisis - Matthias Pilz 2016-12-20

This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.
