Assessing Learners'
Competence in L2 Chinese □□□
□□□□□ - Yang Lu 2022-12-30

Assessing Learners' Competence in L2 Chinese is the first book intended to answer the question on whether existing standardised and classroom-based assessments can reflect learners' competence in L2 Chinese. The Chinese language has enjoyed increasing global popularity amongst second/foreign language learners and has become one of the major modern languages for school and university curricula. However, to many teachers and researchers, it has been difficult to answer with confidence whether the existing standardised and classroom tests can reflect learners' competence in L2 Chinese. This book defines and redefines the constructs for assessing L2 Chinese competence that have been overlooked or misplaced because of the unique features of the Chinese language. The book provides theoretical backgrounds and practical methodologies for assessing competence in L2 Chinese trainees and experienced

teachers of Chinese as a second language. It will provide invaluable guidelines and ready-made workshop materials for postgraduate teacher training programmes. Researchers and academics will find innovative frameworks on the subject for further studies and debates.

study. It describes the rise of Chinese as a global language and the many challenges and opportunities associated with learning it. The collaborative, multiple-case study and cross-case analysis is presented from three distinct but complementary theoretical and analytic perspectives: linguistic, sociocultural, and narrative. The book reveals fascinating dimensions of Chinese language learning based on vivid first-person accounts (with autobiographical narratives included in the book) of adults negotiating not only their own and others' language and literacy learning, but also their identities, communities, and trajectories as users of Chinese.

Handbook on the History of Mathematics Education

Alexander Karp 2014-01-25

This is the first comprehensive International Handbook on the History of Mathematics Education, covering a wide spectrum of epochs and civilizations, countries and cultures. Until now, much of

the research into the rich and varied history of mathematics education has remained inaccessible to the vast majority of scholars, not least because it has been written in the language, and for readers, of an individual country. And yet a historical overview, however brief, has become an indispensable element of nearly every dissertation and scholarly article. This handbook provides, for the first time, a comprehensive and systematic aid for researchers around the world in finding the information they need about historical developments in mathematics education, not only in their own countries, but globally as well. Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general, as well as specialists in cultural and even social history.

Ethnic Minorities, Media and Participation in Hong Kong

- Lisa Y.M. Leung

2021-02-16

Second and third generation South and Southeast Asian minorities in Hong Kong, being marginalized from mainstream social and political affairs, have developed an ambivalent sense of belonging to their host

society. Unlike their forefathers who first settled in Hong Kong under British colonial rule, these younger generations have spent their formative years in the territory. As such, they have increasingly engaged in the public and political realms of society, partly in response to the territory's rapid political changes. Leung discusses and analyses the complex and diverse engagement of migrant and minority youths in Hong Kong - and their struggle for recognition, while desiring to 'be-long' to a place they call home. Some are joining the calls for democratic changes in the territory. In particular, she argues that much of this struggle can be seen in minorities' involvement in creative sectors of society. While it will be of especial interest to scholars with an interest in Hong Kong, this book presents a compelling case study for anyone interested in the dynamics of migrant and minority engagement in the creative sector as a strategy for

engagement.

Learning Chinese, Turning Chinese - Edward McDonald
2013-07-03

In this book Edward McDonald takes a fresh look at issues of language in Chinese studies. He takes the viewpoint of the university student of Chinese with the ultimate goal of becoming 'sinophone': that is, developing a fluency and facility at operating in Chinese-language contexts comparable to their own mother tongue. While the entry point for most potential sinophones is the Chinese language classroom, the kinds of "language" and "culture" on offer there are rarely questioned, and the links between the forms of the language and the situations in which they may be used are rarely drawn. The author's explorations of Chinese studies illustrate the crucial link between becoming sinophone and developing a sinophone identity - learning Chinese and turning Chinese. Including chapters on: relating text to context in learning Chinese the social and political contexts of

language learning myths about Chinese characters language reform and nationalism in modern China critical discourse analysis of popular culture ethnicity and identity in language learning. This book will be invaluable for all Chinese language students and teachers, and those with an interest in Chinese linguistics, linguistic anthropology, critical discourse analysis, and language education. Edward McDonald is currently Lecturer in Chinese at the University of Auckland, and has taught Chinese language, music, linguistics and semiotics at universities in Australia, China, and Singapore.

Teaching Chinese as a Second Language - Jane Orton
2019-01-21

Grounded in analysis of Chinese and international educational concepts and classroom techniques currently used to teach Chinese as a Second Language, and a thorough review of recent research in the field, this volume identifies the learning challenges of the language for

native English speakers. Orton and Scrimgeour assess the gap in knowledge and skills between learners' initial and future proficiency levels as L2 Chinese speakers, map their needs as learners towards achieving a high language proficiency, and set out an informed, integrated teaching orientation and practice for the Chinese classroom that responds to those needs. Chapters in the volume address curriculum design, teaching diverse learners and levels, the learning challenges of Chinese oral and literacy skills, grammar and vocabulary, discourse development, cultural understanding, and the affordances of a visit to China. Filled with original and engaging teaching and learning tools and techniques, this book is an essential and rich content resource for primary and secondary teachers, and teacher candidates and educators in Chinese as a Second Language education.

Identity of Chinese Heritage Language Learners in a

Global Era - Zhen Li

2022-09-30

Identity of Chinese Heritage Language Learners in a Global Era enriches the current research on heritage language (HL) learner identity by examining how identity is constructed, negotiated, and performed in the narratives of university Chinese HL (CHL) learners in Hong Kong. This monograph has identified three sub-categories of CHL learners: domestic-born Chinese, 'third culture' Chinese, and overseas Chinese sojourners. Through systematically examining these CHL learners' life-history narratives about language learning, language use, and social experiences from early childhood to university time, this monograph shows how CHL learner identity is dynamically constructed and changed through self and social positioning across a wide range of spatio-temporal contexts. It also adopts investment, agency, and imagined communities to examine the shared discourses

which reflect the relationship between identity and the larger social processes that involve transnational or postcolonial encounters. This monograph contributes to reflections on the emerging discourses of HL learner identity in the context of multilingualism and transnational migration. It challenges the stigmatised image of CHL learners as 'diasporic subjects' or 'language minority students' in the literature and conceptualises CHL learners as transformative linguistic and social actors in processes of transnational migration and institutional change. This monograph is targeted toward educators, researchers, and professionals working in the fields of heritage language, overseas Chinese studies, migrant studies, and intercultural studies.

Come with us now to the first

day of class to teach English in China. Both students and teacher's hearts pound with anticipation as students file into the room, chatting and pretending not to notice the foreign teacher standing behind his desk. But they can't help glancing at him anyway for a first look. Laughter mingles with the sound of books and chairs clanking together. A buzzer sounds in the hall, and Bill Burkett, affectionately known in China by his students as "Mr. Bill," begins. A Manual for Teaching English in China takes us from the first day's buzzer through the first weeks, months, and semesters of teaching English in China, sharing numerous stories, laughs, interesting facts, and many effective ways of teaching ESL. A Manual for Teaching English in China is packed with Bill Burkett's practical ideas, methods, and teaching techniques that can actually be used to teach ESL anywhere. Bill Burkett recently returned from a seven year stint of teaching English in the universities and training

schools of Henan, China. An internationally renowned public speaker, Burkett has lived in 46 nations in the last 43 years. He developed a strong interest in linguistics which was fueled by his close association with interpreters. In Chinese classrooms where he taught English, he conducted active research, experimenting and taking student polls. He concentrated on eliminating speech impediments and strong accents. His education, experiences, and research shaped his philosophy of teaching English as a Second Language and formed the basis of his first ESL book, A Manual for Teaching English in China. Following the manual is Secrets to Better English which reveals a proven method of teaching ESL without accent. Although Burkett's doctorate is in philosophy, his love is making a difference in his students' lives by teaching diction and the skills of speech.
