Evaluation of FAO's contribution to building resilience to El Niño-induced drought in Southern Africa 2016-2017

Food and Agriculture Organization of the United Nations 2020-01-21

During the 2015-2016 agricultural season, Southern Africa experienced intense drought due to one of the strongest El Niño events in 50 years. With 70 percent of the population reliant on agriculture, El Niño had a direct impact on food security and caused loss of income across crop and livestock value chains. FAO activated a corporate surge support and launched its Southern Africa El Niño Response Plan,

appealing for USD 109 million to support government efforts to rebuild and fortify agricultural livelihoods, restoring agricultural production, incomes and assets and increasing household access to nutritious food. FAO country teams translated the regional plan into tailored intervention packages on the ground. But while agro-meteorological and early-warning alerts were timely, they did not trigger early action. The evaluation calls on FAO to initiate a systematic approach to adaptive programming, to conduct an in-depth analysis of the factors that slowed delivery in Southern Africa, to expand on the targeting of different groups, so as to meet the needs of farmers with varying degrees of vulnerability, and to bolster learning, information-sharing and advocacy efforts across countries.

Technological Change and Manpower

Development - D K Bhattacharyya 2008

Manpower development and HR functions are now getting highly influenced by technological changes. Successful technological change requires HR support although such support areas differ from organization to organization. This book is an attempt to discuss all the aspects of manpower development issues in technological era. This book provides a comprehensive text for HR students. It addresses the organizations' requirement to practice the technology management issues, focusing more on human resource functions. Some key areas explained in this book are- training and development, Compensation, performance management, new skill development issues, management of change, etc. The book deals with some new- age tools like Balance Scorecard, HR Scorecard, Competency Mapping and Knowledge Management Areas which are commonly used in this new-age technology era, to track, measure and develop manpower to sustain in competition. In the absence of a customised textbook in this area of study, this book has been developed to understand intricate technological change issues, especially those which influence HR functions and manpower development aspects.

MANUFACTURING PROCESSES - RAJEEV KUMAR 2014-06-01

This book is an introductory textbook on manufacturing processes that is written for the first year engineering students of various universities. Manufacturing industry is the backbone of any industrialized nation and it is, therefore, essential for all the aspiring engineers, irrespective of their area of study, to be familiar with the basic concepts of manufacturing processes as it has applications in every field of engineering and technology. The entire subject matter of the book has been organized in twelve chapters covering engineering materials and their properties, importance of manufacturing, basic processes and the tools and machines used. The book also introduces the concept of product quality and basic tools in quality enhancement. The textbook contains about 400 problems for testing the understanding of the core concepts of the subject. Keeping in mind the type of questions asked in the university examination, short answer questions and long answer type questions are provided. KEY FEATURES •

Suitable examples with short and brief definition of terms for easy understanding. • Simple language that is easier for the first year students who are not familiar with the difficult technical terms. • Plenty of figures, schematics and diagrams for better understanding of the related concepts.

Business, Society, and Government

Essentials - Robert N. Lussier 2013-08-22

Understanding the interrelationship of business, society and government is vital to working at any level in a company of any size. This text uses a case analysis approach to explore this interrelationship in today's high-tech global community. The authors crystallize the complex array of issues that business leaders, managers, and employees face in market and nonmarket environments, from balancing stakeholder interests and dealing with government regulations to managing crises and making socially responsible and ethical decisions. Technical concepts come to life through a variety of cases and case questions, thought-provoking personal and professional applications, ethical dilemmas, and practical exercises. Furthermore, an appendix offers approaches to case analysis and includes a case analysis table that serves as a model for students and professors. With its thorough coverage of relevant issues and skill-building elements to stimulate critical thinking, this text will prepare students to understand and confront real-world business concerns.

System Zoo 3 Simulation Models - Hartmut Bossel 2007

About the book: Mathematical modeling and computer simulation make it possible to understand and control the dynamic processes taking place in complex systems. Simulation provides insights into the often surprising diversity of possible behaviors, and allows identifying possibilities for intervention and options for alternative development. About one hundred simulation models from all areas of life are fully documented in the three volumes of the 'System Zoo'. They can be quickly implemented and easily operated using freely available system dynamics software. Volume 3 of the System Zoo contains simulation models of economic and social systems and global development, among them: production, stocks and orders, marketing

and consumption, competition, life planning, employment, ecotax, escalation, dependence, aggression, population and community development, debt crisis, globalization, the world models of the Club of Rome (by Forrester and the Meadows group) and examples of nonnumerical knowledge processing applied to impact assessment and decision processes. The System Zoo collection of simulation models is particularly well-suited for teaching, training, and research projects at all levels from high school to university, and for individual study. Volume 1 of the System Zoo contains simulation models of elementary systems, and of systems from the fields of physics and engineering. Volume 2 of the System Zoo presents simulation models related to climate, vegetation, ecosystems and resources. About the author: Hartmut Bossel is Professor Emeritus of environmental systems analysis. He taught for many years at the University of California in Santa Barbara and the University of Kassel, Germany, where he was director of the Center for Environmental Systems Research until his retirement. He holds an engineering degree from the Technical University of Darmstadt, and a Ph.D. degree from the University of California at Berkeley. With a background in engineering, systems science, and mathematical modeling, he has led many research projects and future studies in different countries, developing computer simulation models and decision support systems in the areas of energy supply policy, global dynamics, orientation of behavior, agricultural policy, and forest dynamics and management. He has written numerous books on modeling and simulation of dynamic systems, social change and future paths, and has published widely in the scientific literature in several fields.

Postwar Productivity Growth in the United States - Kenneth G. Van Auken 1957

Industrial Management (For GBTU & MMTU), 2nd Edition - Bhattacharyya D.K. Industrial Management has been specifically written and designed for BTech students with special emphasis on Gautam Buddha Technical University (GBTU) and Mahamaya Technical University (MMTU). The book addresses the core theories of industrial management to help

students apply their knowledge in future managerial decision making. The presentation of this book has been kept simple and lucid so that theories and their possible applications are easily comprehensible to the students. Adequate industry examples make this an enjoyable read. Human Resource Planning - D K Bhattacharyya 2009

Human Resource Planning has globally become a much discussed issue. Throughout the world, manpower redundancy has become so common that it is no more catching the attention of media, India is also no exception to this. Many management institutions and universities have now included HRP as a core paper for their MBA curriculum. We really do not have adequate literature in HRP more specifically to Indian situations. Apart from this, corporate practitioners also like to get some insight to the nitty-gritty of HRP. Keeping all these factors in view, the present book has been developed by the author considering the different aspects of HRP. The book aims to fulfill the need for MBA course on HRP and also for the practitioners as a reference manual to help successful HRP practice in organizations.

Cambridge IGCSE® Business Studies Coursebook with CD-ROM - Mark Fisher 2014-05-29

Industrial Management - Bhattacharyya D.K.

In today's complex business environment, engineering and management issues cannot be

segregated. Integration of Industrial Management with the technicalities of engineering functions yields better results. In keeping with the needs of engineering degree and diploma students, Industrial Management studies the basic concepts of management and all other management-related aspects, which are considered valuable for engineering students. The book would certainly be the most effective one in the coverage of its content, as it was developed browsing through the syllabuses of various universities and technical institutions both in India and abroad. USP: This book with its comprehensive coverage of topics, both practical and operational, would make the would-be engineers confident of taking significant workplace/management decisions, thus enhancing their employability.

Doing the Right Things Right - Laura Stack

2016-01-18

A How-To Guide for the Modern Leader Inspired by Peter Drucker's groundbreaking book *The Effective Executive*, Laura Stack details precisely how 21st-century leaders and managers can obtain profitable, productive results by managing the intersection of two critical values: effectiveness and efficiency. Effectiveness, Stack says, is identifying and achieving the best objectives for your organization—doing the right things. Efficiency is accomplishing them with the least amount of time, effort, and cost—doing things right. If you're not clear on both, you're wasting your time. As Drucker put it, "There is nothing so useless as doing efficiently that which should not be done at all." Stack's *3T Leadership* offers twelve practices that will enable executives to be effective and efficient, grouped into three areas where leaders spend their time: Strategic Thinking, Teamwork, and Tactics. With her expert advice, you'll get scores of new ideas on how you, your team, and your organization can boost productivity.

A Modern Approach to Operations

Management - Ram Naresh Roy 2007-12

The book includes the background, the core concepts, and the models of POM. It is readable, comprehensive, and contemporary in its approach. The concepts of Operations Management have been delivered to the readers in a simple, straightforward manner, and without mincing the words to avoid dilution of the materials itself. The layout of the book has been organized to give the readers a sense of flow: (i) Beginning with fundamentals of production systems, productivity, location of plant, layout issues; (ii) Core issues of POM like forecasting, operations planning, purchasing systems and steps involved in it, Inventory models, and MRP, Quality control, TQM, Project Management; and finally (iii) the attention is focused to modern concepts on the subject like JIT, OPT, Automation, etc. This makes the book more comprehensive in nature.

ORGANIZATIONAL BEHAVIOUR, SECOND EDITION - CHITALE, AVINASH K. 2019-07-01

For creating a balance in the organizational environment, harmony amongst the employees and the employer is a prerequisite. The factors that help in determining an organizational balance are the sociology of an environment, psychology of the people working there, channels of communication along with a sound and rational management. The book highlights the fundamental concepts of organizational behaviour, and its applications in the Indian organizational scenario. The second edition of the book, maintaining the same chapters' organization as in the previous edition, comprises 28 chapters based on the fundamental concepts of organizational behaviour, and case studies from various Indian industry verticals. These case studies reveal the authors' experience in real-life scenario as consultants as well as their observations pertaining to the concepts of organizational behaviour. Besides, the text lays emphasis on some modern tools of management such as TQM, BPR and Knowledge Management, which is a unique feature of this book. The book is designed for the students of management and psychology. Moreover, it is useful for the postgraduate students of commerce as well as it is of immense use to the

personnel associated with technical, commercial and IT-based industries requiring human resource management. KEY FEATURES • Every chapter is concluded with a real-life case study.

• Appendices added to most of the chapters contain research-based questionnaire instruments. • Discussion Questions on Case studies enhance learning among students. NEW TO THE SECOND EDITION Includes three new sections on 'Case Study Method as an Important Pedagogy', 'Classification of Case Studies' and 'Steps of Solving a Case'. Incorporates 29 new short and sharp cases at the end of the book to make the reader aware of real-life situations. TARGET AUDIENCE • MBA / PGDM / BBA • BA (Hons.) Psychology • MCom
