Grand Dictionnaire Universel [du XIXe Siecle] Francais: A-Z 1805-76 - Pierre Larousse 1865

Corpus - Jean-Luc Nancy 2009-08-25

How have we thought “the body”? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “mystical body of Christ”—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy’s masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-

body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy’s larger project called “The deconstruction of Christianity.”

Aristotle's Animals in the Middle Ages and Renaissance - Emeritus Professor for Ancient & Medieval Philosophy Carlos Steel 1999

Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilingual approach highlights substantial aspects of Aristotle's animals.

Reconciliation, Civil Society, and the Politics of Memory - Birgit Schwelling 2014-10-31

How did civil society function as a locus for reconciliation initiatives since the beginning of the 20th century? The essays in this volume challenge the conventional understanding of reconciliation as a benign state-driven process. They explore how a range of civil society actors - from Turkish intellectuals apologizing for the Armenian Genocide to religious organizations working towards the improvement of Franco-German relations - have confronted and coped with the past. These studies offer a critical perspective on local and transnational reconciliation acts by questioning the extent to which speech became an alternative to silence, remembrance to forgetting, engagement to oblivion.
