Plastic - Susan Freinkel 2011-04-18

"This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics" (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer

Out of School and Into Nature - Suzanne Slade 2017-03-15

This picture book biography examines the life and career of naturalist and artist Anna Comstock (1854-1930), who defied social conventions and pursued the study of science. From the time she was a young girl, Anna Comstock was fascinated by the natural world. She loved exploring outdoors, examining wildlife and learning nature's secrets. From watching the teamwork of marching ants to following the constellations in the sky, Anna observed it all. And her interest only increased as she grew older and went to college at Cornell University. There she continued her studies, pushing back against those social conventions that implied science was a man's pursuit. Eventually Anna became known as a nature expert, pioneering a movement to encourage schools to conduct science and nature classes for children outdoors, thereby increasing students' interest in nature. In following her passion, this remarkable woman blazed a trail for female scientists today.

Kola Wars - Dennis Smith 2016-02-28

For the first decade of the 20th century more Coca-Cola was consumed in Atlanta than any other city. It was the city's most famous product and made Atlanta known around the world in just a few years' time. The first sky scraper in the south was the Candler Building designed as the home for the Coca-Cola Company. Atlanta citizens acknowledged this fact when they wanted a glass of Coca-Cola by asking the dispenser for "a brick in the Candler Building." But the citizens of Atlanta were drinking more than Coca-Cola - they were also drinking Afri-Kola and Koca Nola, Celery=Cola and Capacola, Fan-Taz and Pep-To-Lac, Dope and Koke, Jit-A-Cola and Ko-Nut, Nova-Kola and Rye-Ola. In addition to Asa Candler's Coca-Cola they were drinking Daniel's Koko-Kolo, Venable's Coca-Kola, and Standard Coca-Cola. Lee Hagan claimed to sell ten thousand drinks of his Red Rock Ginger Ale in Atlanta every day. There were dozens of brand name and proprietary soft drinks sold in the city of Atlanta in the first part of the 20th century. Many of these drinks were local in origin yet advertised nationally. Afri-Kola was bottled as far west as Texas, Koca Nola as far north as Maine and west to Washington state, and Nova-Kola as far away as Illinois. Others found markets regionally in Georgia, Tennessee, Florida, and other nearby states. Some of these beverages were intended to ride on the successful coattails of Coca-Cola and found themselves in court as a result. Whether selecting a similar name such as 'Venable's Coca-Kola' or substituting their own drink on calls for the original, these imitators found the Coca-Cola Company ready to protect its trademark and business. Here is the story of Atlanta's Kola Wars for the first fifty years.

The Real Coke, the Real Story - Thomas Oliver 2013-10-09

"Examines why the set-in-its-ways Coca Cola Company tampered with a drink that had become an American institution—and blundered into one of the greatest marketing triumphs of all time."—New York On April 23, 1985, the top executives of the Coca-Cola Company held a press conference in New York City. News had leaked out that Coke, the king of soft drinks, would no longer be produced. In its place the Coca-Cola Company would offer a new drink with a new taste and would dare call it by the old name, Coca-Cola. The new Coke was launched—and the reaction of the American people was immediate and violent: three months of unrelenting protest against the loss of Coke. So fierce was the reaction across the country that it forced a response from the Coca-Cola Company. Stunned Coca-Cola executives stepped up to the microphone and publicly apologized to the American people. They announced that the company would reissue the original Coca-Cola formula under a new name, Coke Classic. The Real Coke, the Real Story is the behind-the-scenes account of what prompted Coca-Cola to change the taste of its flagship brand—and how consumers persuaded a corporate giant to bring back America's old friend.

Desire Street - Jed Horne 2005-02-03

A searing anatomy of a New Orleans murder trial and a system of justice gone wrong. In a New Orleans supermarket parking lot in the fall of 1984 ,two disparate lives become inextricably bound for the next fourteen years. The first, the life of Delores Dye, a white housewife and grandmother. The second, a young black man with a gun in hand. Moments following their maybe not so chance encounter, Mrs. Dye lay dead on the sunbaked macadam, and the killer had made off with her purse, her groceries, and her car. Four days later, following a tip, authorities arrested a known drug dealer and father of five named Curtis

Kyles. Kyles would then be tried for Mrs. Dye's murder an unprecedented five times, though he maintained his innocence throughout each trial. Convicted and sentenced to death in his second trial, he would spend fourteen years on death row. After a fifth jury was unable to reach a verdict, New Orleans Parish District Attorney Harry Connick, Sr., finally conceded defeat and dropped the murder charge. But the case slowly yielded a deeper drama: The crime turned out to have been the side effect of an intricately plotted act of revenge. That police and prosecutors may have been complicit in the vengeance that framed Kyles cuts to the heart of a system of justice for Southern blacks in the era since lynch mobs were shamed into obsolescence. A compellingly written legal drama that has at its heart passionate intrigue and justice gone awry. *Desire Street* is a 2006 Edgar Award Nominee for Best Fact Crime.

These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. Citizen Coke: The Making of Coca-Cola Capitalism - Bartow J. Elmore 2014-11-03

"Citizen Coke demonstrate[s] a complete lack of understanding about . . . the Coca-Cola system—past and present." —Ted Ryan, the Coca-Cola Company How did Coca-Cola build a global empire by selling a low-price concoction of mostly sugar, water, and caffeine? The easy answer is advertising, but the real formula to Coke's success was its strategy, from the start, to offload costs and risks onto suppliers, franchisees, and the government. For most of its history the company owned no bottling plants, water sources, cane- or cornfields. A lean operation, it benefited from public goods like cheap municipal water and curbside recycling programs. Its huge appetite for ingredients gave it outsized influence on suppliers and congressional committees. This was Coca-Cola capitalism. In this new history Bartow J. Elmore explores Coke through its

ingredients, showing how the company secured massive quantities of coca leaf, caffeine, sugar, and other inputs. Its growth was driven by shrewd leaders such as Asa Candler, who scaled an Atlanta soda-fountain operation into a national empire, and “boss” Robert Woodruff, who nurtured partnerships with companies like Hershey and Monsanto. These men, and the company they helped build, were seen as responsible citizens, bringing jobs and development to every corner of the globe. But as Elmore shows, Coke was usually getting the sweet end of the deal. It continues to do so. Alongside Coke’s recent public investments in water purification infrastructure, especially in Africa, it has also built—less publicly—a rash of bottling plants in dangerously arid regions. Looking past its message of corporate citizenship, Elmore finds a strategy of relentless growth. The costs shed by Coke have fallen on the public at large. Its annual use of many billions of gallons of water has strained an increasingly scarce global resource. Its copious servings of high-fructose corn syrup have threatened public health. Citizen Coke became a giant in a world of abundance. In a world of scarcity it is a strain on resources and all who depend on them.
