Jurisdiction and Arbitration Agreements in Contracts for the Carriage of Goods by Sea - Jonatan Echebarria Fernández 2021-03-09

Jurisdiction and Arbitration Agreements in Contracts for the Carriage of Goods by Sea focuses on party autonomy and its limitations in relation to jurisdiction and arbitration clauses included in contracts for the carriage of goods by sea in case of any cargo dispute. The author takes the perspective of the shipping companies and the shipowners, as these are the driving forces of the shipping industry due to their strategic importance. The book provides an analysis of the existing law on the recognition and validity of jurisdiction and arbitration clauses in the contracts for the carriage of goods by sea. The author also seeks to provide conclusions and to learn

lessons for the future of the non-recognition and the non-enforcement of the clauses in the existing fragmented legal framework at an international, European Union, and national level (England & Wales and Spain). The interface between the different legal regimes reveals the lack of international harmonisation and the existence of 'forum shopping' when a cargo interest sues the shipowner or the party to whom the shipowner charters the vessel. This concise book provides a useful overview of existing research, for students, scholars and shipping lawyers

Practical Guide to Litigation - Jonathan Leslie 2020-10-28
Against the background of Lord Woolf's interim report "Access to Justice", this text includes accounts of tactical matters and practical litigation "tips", as well as descriptions of the procedures involved. Litigation is often conducted by companies who do not have much practical experience of the processes that might be expected of them. The same applies to others who become involved in litigation without actually having to conduct the procedure as lawyers. This book is intended to give a brief, clear and comprehensive overview of litigation, arbitration and ADR in England. Intended as a comprehensive overview of litigation, arbitration and ADR in England, this guide is aimed at clients and firms who are involved in, or assist cases, who would like to understand the process better in a non-technical way but do not want

to see every statement supported by authority.

Shipping and Logistics Law -

Felix W.H. Chan 2002-09-01

The maintenance of Hong Kong as a free port and international logistics hub is crucial for its economic vitality. Rapidly expanding international trade with mainland China and Hong Kong has generated significant changes to the shipping and logistics law in both jurisdictions. This textbook provides a general framework for the basic principles of shipping and logistics law in Hong Kong. It contains illustrations from case law, extracts of the relevant legislation, and sample shipping and marine insurance documents for reference. It covers the curriculum requirements of most courses on shipping law, transport studies and logistics management. Besides, all the issues examined in this book have relevance for managers, insurers, bankers and lawyers who need to acquire a clear understanding of the key principles in a practical

context.

Shipbroking and Chartering Practice - Evi Plomaritou 2017-12-12

Now in its eighth edition, this classic text is a first point of reference for anyone looking to obtain an understanding of chartering and shipbroking practice. It provides hands-on, commercially-focused explanations of chartering business and invaluable advice on how the shipping market operates across a broad range of topics. The authors also deal expertly with the legal, financial, operational and managerial aspects of chartering, offering numerous case studies which clearly link theory to practice. This new edition has been fully revised and updated to reflect the current trends in chartering practice, legal developments

and standard forms of charterparties. New to this edition: Enriched with practical examples covering crucial aspects of chartering and shipbroking business, such as voyage estimations, freight conversions and tanker calculations. New material on day-to-day laytime principles, including "Laytime Definitions for Charterparties 2013", associated commentary and relevant examples. Shipping Marketing as a modern tool of improving chartering and shipbroking business. Expanded coverage of the economic background of chartering, including markets, vessels, cargoes, trades and fixtures. Freight rates for all vessel types from 1980 to 2015. Updated review of well-known standard charterparty documents (including NYPE 2015), together with clauses and wordings commonly applying to various charter types. Analytical glossary containing typical terms and abbreviations used in chartering negotiations. This book is an essential guide for

practitioners in private practice and in-house for shipowners and cargo houses, as well as those studying shipbroking and chartering.

Journal of International Maritime Law, January 2020

This updated edition of Transport Law in Australia

describes the main sources of transport law, jurisdiction and

courts, state immunity, and the legal role of transport intermediaries. The scope of the book is broad in that it encompasses maritime, road, rail, air, and multimodal transport law. Almost half the book is devoted to maritime and shipping law which, for an island nation with over 95% of its international trade carried by sea, is as important as it is unsurprising. Whilst works of this nature have the potential to be a 'dry' read, in this case the author has taken an approach which makes the book eminently readable and usable. The text is well supported by in-depth research and enhanced with comprehensive referencing, footnotes, tables of cases and statutes, as well as a selected bibliography. With Australian society and the economy vitally dependent on all modes of transport this book will be a valuable addition for many in the transport community. This includes transport operators, shippers and freight forwarders, transport regulators and lawyers, as well

as academics, researchers and students engaged in the study of transport. The author's practical and masterful approach to the subject should go a long way to ensuring the success of Transport Law in Australia as well as being a valuable addition to the body of literature on this important topic. Shipbroking and Chartering

Practice - Patrick Hillenius

2018-02-06

Shipbroking and Chartering Practice provides a sound knowledge of the law and economics of international shipbroking and chartering in a practical way that enables the principles described to be applied in everyday situations. The seventh edition has been thoroughly revised to take account of chartering practices, cases and standard forms that have surfaced since the last edition, providing an excellent commentary.

Energy Law - Samir

Mankabady 1990

This book brings together the rules of international conventions, national law and the contractual arrangements relating to energy. Recent events in the Middle East have confirmed the fundamental importance of this area of international law; the continual evolution of energy-related business also means that few can afford to ignore the

legislative procedures that have to be employed. Oil, natural gas and nuclear materials are vital international commodities and energy law has expanded to cover a range of legal subjects such as safety rules, financial arrangements, sale and purchase contracts, transport agreements, pipeline rules, insurance covers and the protection of the environment. This guide deals with all these important issues.

The Rotterdam Rules and International Trade Law

Ioanna Magklasi 2018-08-15

This book offers an original academic study of the Rotterdam Rules. It analyses the salient articles that will have an impact on international sale contracts governed by English law, including the most popularly used international law instruments, terms and standard sale contracts. Looking beyond the legal relationship of carrier-shipper and carrier-receiver, this book examines the important articles

of the Rotterdam Rules that affect the ability of the trading protagonists to perform their sale contract.

"Ideal for shipmasters and

agents, *Marine Claims* provides an invaluable tool to help minimise the consequences of any incident likely to result in a marine insurance claim including cargo damage, delays, injury to passengers or crew, fines, collisions and pollution. Drawing upon the expertise of nine industry specialists, this practical and comprehensive work discusses the handling of specific cargoes and specific types of claim including those most commonly encountered and how they may be avoided. Includes references to the NYPE Agreement 1993, LOF 1995, UCP 500 and the York-Antwerp Rules 1994."
