The Action Research Dissertation - Kathryn Herr 2014-05-06
The first edition of The Action Research Dissertation: A Guide for Students and Faculty was a first-of-its-kind reference, distilling the authors' decades of action research experience into a handy guide for graduate students. The Second Edition continues to provide an accessible roadmap that honors the complexity of action research, while providing an overview of how action research is defined, its traditions and history, and the rationale for using it. Authors Kathryn Herr and Gary L. Anderson demonstrate that action research is not only appropriate for a dissertation, but also is a deeply rewarding experience for both the researcher and participants. This practical book demonstrates how action research dissertations are different from more traditional dissertations and prepares students and their committees for the unique dilemmas they may face, such as validity, positionality, design, write-up, ethics, and dissertation defense.
How to Write a Research Proposal and Thesis - Mohamed E. Hamid 2013-03-08
This book describes meaning, stages and methods of writing a successful research project proposal and a thesis from the first draft proposal to the final version of the thesis. As a manual, this book follows a simple approach that beginners can use without complications and many terminologies and technical terms have been translated into Arabic. The book explains the structure of a thesis and proposal including title, abstract, introduction, literature review, materials and methods, results, discussion, biography and appendix (if there is any). These parts of the thesis are often mixed up without emphasizing the purpose of each part and often without limiting oneself to the specific chapter.
Cybersecurity Discussion Cases - T. Grandon Gill
Cybersecurity affects us all, every business, school, and citizen. This book, a collection of discussion case studies, presents in-depth examinations of eleven cybersecurity-related decisions facing managers and researchers. It is organized around the common cybersecurity framework: Identify, Protect, Detect, Respond, and Recover. It also includes two cases that specifically involve education. These cases place the reader in the position of the decision-maker featured in each case. None of them have a "right" answer. Instead, they are specifically designed to: 1. Serve as the basis of discussion, either in an formal educational context and as part of an industry training program 2. Help participants refine their judgment skills, allowing them to make better decisions when encountering similar contexts in their future career
Research Methods in Accounting - Professor Malcolm Smith 2003-04-24
`Malcolm Smith's Research Methods in Accounting provides a useful addition to the limited number of books on research methods that are addressed specifically to the area of accounting. For students taking DBA degrees in the area, it is probably an ideal companion' - The European Accounting Review Research in accounting is concerned with solving problems, investigating relationships and building a body of knowledge. With this in mind, this book will provide a clear and concise overview of the conduct of applied research studies in accounting. It provides the principal building blocks of how to implement research in accounting and related fields. This book provides students with: - an understanding of contemporary research ideas in accounting, so that readers can identify and define research problems and prepare strategies for their solution; -

an awareness of alternative research methods, to facilitate the selection of the most appropriate method for addressing particular research questions; - an ability to review existing research and to offer critiques of articles published in refereed journals; - an appreciation of the ethical constraints on the conduct of accounting research. This book will be essential for students and academics in the fields of accounting and management.
Researching Translation and Interpreting - Claudia V. Angelelli 2015-07-16
This volume offers a comprehensive view of current research directions in Translation and Interpreting Studies, outlining the theoretical concepts underpinning that research and presenting detailed discussions of the various methods used. Organized around three factors that are responsible for shaping the study of translation and interpreting today—post-positivist theoretical approaches, developments in the language industry, and technological innovations—this volume is divided into three parts: Part I introduces the basic concepts organizing translation and interpreting research, such as the difference between qualitative and quantitative research, between product-oriented and process-oriented studies, and between prescriptive and descriptive approaches. Part II provides a theoretical mapping of current translation and interpreting research, covering the theories underlying the current conceptualization of translation and interpreting, from queer studies to cognitive science. Part III explores the key methodological approaches to research in Translation and Interpreting Studies, including corpus-based, longitudinal, observational, and ethnographic studies, as well as survey and focus group-based studies. The international range of contributors are all leading research experts who use the methodologies in their work. They present the research aims of these methods, offer sample research questions that can—and cannot—be addressed by these methods, and discuss modes of data collection and analysis. This is an essential reference for all advanced undergraduates, postgraduates, and researchers in Translation and Interpreting Studies.

Developing Effective Research Proposals - Keith F Punch 2006-10-02
Successful research requires effective and thorough preparation. In this expanded and updated Second Edition of Developing Effective Research Proposals Keith Punch offers an indispensable guide to the issues involved in proposal development and in presenting a well-considered plan for the execution of research. Dealing with both qualitative and quantitative approaches to empirical research across the social sciences, the Second Edition comprehensively covers the topics and concerns relevant to the subject and is organized around three central themes: What is a research proposal, who reads proposals and why? How can we go about developing a proposal? and What might a finished proposal look like? New features of this edition include: -Expanded sections covering research strategy, research planning and academic writing -Examples of successful research proposals from across the social science disciplines - A more comprehensive discussion of ethics -A brand new glossary and chapter summaries The Second Edition will be welcomed by all those preparing or evaluating research proposals, and will be invaluable across all areas of social science, both basic and applied, and for students undertaking quantitative, qualitative and mixed-method studies.
Encyclopedia of Information Science and Technology, Fourth Edition - Khosrow-Pour, D.B.A., Mehdi 2017-06-20
In recent years, our world has experienced a profound shift and progression in available computing and knowledge sharing innovations. These emerging advancements have developed at a rapid pace, disseminating into and affecting numerous aspects of contemporary society. This has created a pivotal need for an innovative compendium encompassing the latest trends, concepts, and issues surrounding this

relevant discipline area. During the past 15 years, the Encyclopedia of Information Science and Technology has become recognized as one of the landmark sources of the latest knowledge and discoveries in this discipline. The Encyclopedia of Information Science and Technology, Fourth Edition is a 10-volume set which includes 705 original and previously unpublished research articles covering a full range of perspectives, applications, and techniques contributed by thousands of experts and researchers from around the globe. This authoritative encyclopedia is an all-encompassing, well-established reference source that is ideally designed to disseminate the most forward-thinking and diverse research findings. With critical perspectives on the impact of information science management and new technologies in modern settings, including but not limited to computer science, education, healthcare, government, engineering, business, and natural and physical sciences, it is a pivotal and relevant source of knowledge that will benefit every professional within the field of information science and technology and is an invaluable addition to every academic and corporate library.

Authoring a PhD - Patrick Dunleavy 2017-04-28
This engaging and highly regarded book takes readers through the key stages of their PhD research journey, from the initial ideas through to successful completion and publication. It gives helpful guidance on forming research questions, organising ideas, pulling together a final draft, handling the viva and getting published. Each chapter contains a wealth of practical suggestions and tips for readers to try out and adapt to their own research needs and disciplinary style. This text will be essential reading for PhD students and their supervisors in humanities, arts, social sciences, business, law, health and related disciplines.

Measuring Entrepreneurial Businesses - John Haltiwanger 2017-09-21
Measuring Entrepreneurial Businesses: Current Knowledge and Challenges brings together and unprecedented group of economists, data providers, and data analysts to discuss research on the state of entrepreneurship and to address the challenges in understanding this dynamic part of the economy. Each chapter addresses the challenges of measuring entrepreneurship and how entrepreneurial firms contribute to economies and standards of living. The book also investigates heterogeneity in entrepreneurs, challenges experienced by entrepreneurs over time, and how much less we know than we think about entrepreneurship given data limitations. This volume will be a groundbreaking first serious look into entrepreneurship in the NBER's Income and Wealth series.

An Introduction to Evaluation - Chris Fox 2016-10-18
Both practical and theoretical in approach, this book is the perfect companion for student researchers and policy makers alike. It provides actionable advice for planning and implementing evaluations, while also instilling an ability to assess the evaluations of others and consider the ways in which evaluation evidence could influence policy and practice. Drawing upon a wide range of examples from policy areas like education, criminal justice, and health and social care, this book showcases how evaluation is an interdisciplinary research practice with a spectrum of applications. Each chapter contains philosophical underpinnings and applied knowledge as well as examples from published evaluations. Specific topics include how to: Choose an approach to evaluation Plan, design, and conduct evaluations Approach evaluations using theories of change Differentiate between process, impact, and economic evaluations

Understand the role of quantitative and qualitative methods in data collection Use systematic reviews and other tools to assess and disseminate evaluation findings From getting started in the field to turning evidence into policy, this book will guide you through every step of the evaluation process.

Assessing Research-Doctorate Programs - National Research Council 2003-12-19
How should we assess and present information about the quality of research-doctorate programs? In recommending that the 1995 NRC rankings in Assessing the Quality of Research-Doctorate Programs: Continuity and Change be updated as soon as possible, this study presents an improved approach to doctoral program assessment which will be useful to administrators, faculty, and others with an interest in improving the education of Ph.D.s in the United States. It reviews the methodology of the 1995 NRC rankings and recommends changes, including the collection of new data about Ph.D. students, additional data about faculty, and new techniques to present data on the qualitative assessment of doctoral program reputation. It also recommends revision of the taxonomy of fields from that used in the 1995 rankings.

Research and Knowledge at Work - John Garrick 2002-09-11
This fascinating and controversial text makes sense of the complexities of research in the workplace and how 'working' knowledge is constructed. Featuring experts from Britain, Japan, North America and Australia, it is an outstanding contribution to the literature of Human Resource Management (HRM). It's interdisciplinary approach addresses key issues and debates such as: * the influences of new technology, language, power, culture and gender upon the 'construction' of knowledge * the impact of globalization * working knowledge into the 21st century * practice and performance implications. It's outlook, geared towards the 21st century, makes it essential reading for researchers, teachers and students within HRM, policy-makers and all those concerned with professional development.

Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics - Khosrow-Pour, D.B.A., Mehdi 2018-10-19
From cloud computing to data analytics, society stores vast supplies of information through wireless networks and mobile computing. As organizations are becoming increasingly more wireless, ensuring the security and seamless function of electronic gadgets while creating a strong network is imperative. Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics highlights the challenges associated with creating a strong network architecture in a perpetually online society. Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data. This book is an important resource for information technology professionals, software developers, data analysts, graduate-level students, researchers, computer engineers, and IT specialists seeking modern information on emerging methods in data mining, information technology, and wireless networks.

The DBA Thesis Project in Practice - Paul Beaulieu 2020-10-05
The thesis written in the course of a Doctorate of Business Administration (or DBA) raises many questions for future DBA candidates concerning its specific orientation, content and scope. Given the central role of the thesis project in the process of educating DBA candidates, who will hold a practice-oriented doctoral degree in management, it appeared to be the perfect time to stimulate a collective reflection process on this crucial phase of work on a doctoral thesis: the development of the DBA thesis proposal and project. This book is the latest in the series of publications launched in 2015 by the Business Science Institute in partnership with the publisher EMS, with the aim of producing a set of books that will guide the academic work of doctoral candidates on the threshold of the scientific education process that culminates in a DBA. The collection published in 2015, La création de connaissance par les managers, was intended to establish the main benchmarks for the new role managers are assuming in their practice: producer of new scientific knowledge. Then the imposing Research Methods for the DBA (published 2019) presented a diversified set of methodological approaches and tools new researchers can use to conduct their DBA research. The articles collected in this book are written mainly for candidates who need guidance and orientation as they start to formulate their thesis research project. Among other things, it presents the various steps in the process of developing a detailed thesis proposal, describes the factors that ensure a high-quality thesis project statement, and clarifies the roles and expectations candidates must handle as they initiate their research projects. With contributions by:

Paul BEAULIEU, Pierre-Jean BENGHOZI, Marc BONNET, Françoise CHEVALIER, L. Martin CLOUTIER, Emmanuel JOSSERAND, Michel KALIKA, Sébastien LIARTE, Jean MOSCAROLA, Vincent MOTTET, Isabelle WALSH.

Introduction to Business Research 1 - Alexander Roberts 2003-01-01

Contemporary Ergonomics 2002 - Paul T. McCabe 2003-09-02
The broad and developing scope of ergonomics, the application of scientific knowledge to improve people's interaction with products, systems and environments, has been illustrated over the past sixteen years by the books that make up the Contemporary Ergonomics series. Presenting the proceedings of the Ergonomics Society's Annual Conference, the series embraces the wide range of topics covered by ergonomics. Chapters provide an insight into the current practice, present new research findings and form an invaluable reference source. Among the most interesting topics covered in this volume are rail safety, the development and applications of virtual reality and hospital ergonomics. Contemporary Ergonomics 2002 will appeal to all those who have an interest in people's interactions with their working and leisure environment, including designers, manufacturing and production engineers, health and safety specialists, occupational, applied and industrial psychologists, and applied physiologists.

Management Research by Practitioners - Reno Symmank 2018-05-23
This handbook focus on management research by practitioners. The book would not have been possible without the German cohort 6, who set the forum for lively discussions and supported all researchers on their journey to its doctorate. The book is set up in three chapters. Chapter I"One of the main triggers for this thesis was my direct experience of the financial crisis, as it showed that many principles and assumptions that were believed to be "carved in stone" were challenged overnight. Investors lost confidence as Corporate Governance turned out to be very poor in reality, although companies consistently declared in their disclosures that they followed good Corporate governance guidelines". This section develops a Corporate governance reporting taxonomy, which can be used for electronic reporting and is the basis for the digitalisation in accounting. A mixed-method approach s applied which combines qualitative and quantitative research methods. Chapter II deals with an analysis of marketing process governance in multinational enterprises and is based on an empirical analysis of FT500 index corporations. The literature showed, that there is currently little substantial understanding of how activities and processes in marketing can be sourced and geographically relocated. However, there is substantial evidence in scholarly and managerial literature that marketing process reallocation is a subject of increasing attention for the last five years. Chapter III focus on out of stock situations (OOS) in retail stores. One of the major advantages of store-based retail formats is the availability of products. The unavailability of products is a major threat for store-based retail formats as OOS situations are considered to be some of the most displeasing occurrences for consumers, resulting in dissatisfaction. As avoiding or recovering from OOS situations are matters of allocating limited resources (e.g. staff, money) wherever they are most effective, this work recommends actions that retailers can take to manage OOS occurrences at store-based retail formats to increase consumer satisfaction. All three researcher describe in their reflexive diaries how thy managed to be sucessfull on their long jounrney to the finalisation of their thesis. We all three would also like to thank our supervisors and all of our contributors. Let the words speak for themselves.

Doing a Literature Review - Chris Hart 2018-01-01
The ultimate guide to the 'what', 'how' and 'why' of literature reviewing, the second edition of the classic text shows how the literature review will unlock the full potential of one's research with: A thorough exploration of the literature review process from start to finish Two brand new chapters explaining the different types of review and evidence and evaluation Extended examples that show you how to apply key techniques and procedures A new 'core skills' framework to help you turn your research experience into employability A critical thinking focus that will help you construct convincing arguments and improve your research decisions In combining a critical, philosophical approach with an expertly selected body of practical examples, the Second Edition of Chris Hart's landmark text provides both the intellectual understanding and the technical skills required to produce sophisticated, robust literature reviews of the very highest standard. A Step-by-Step Guide on Writing the Dissertation - Amanfi 2019-08-15
This book is a significant step towards helping doctoral learners write better proposals and the final dissertation. The book walks the learner through all the sections of my dissertation and describes, paragraph-by-paragraph, how each section may be written succinctly and correctly. Although my original dissertation was a qualitative single case study, students can relate the step-by-step directions in the book to their own qualitative studies regardless of their specific research design. Although all learners pursuing qualitative studies would benefit from the book, those pursuing a case study design, or a descriptive design would benefit the most. If you are planning to use the thematic data analysis in your qualitative doctoral research, you will find this book most helpful. I also recommend that you get the 4-Step Thematic Data Analysis with MAXQDA textbook for the complete, step-by-step walk-through of how to analyze your qualitative data. In this book, Chapters 1 through 3 are aimed at those working on the Prospectus and on the Proposal whereas Chapters 4 and 5 are aimed at those working on the final Dissertation.

Action Learning and Action Research - Ortrun Zuber-Skerritt 2009-01-01
These songlines'sing' into history the personal story of Action Learning and Research (ALAR) by an ALAR founder, Ortrun Zuber-Skerritt. Revealed through a collection of interviews conducted by scholars from six countries, these engaging, informative, intimate stories record her ALAR journey to document history and, more importantly, to help develop skills and innovation in workplace/community and lifelong learning for everyone, including the disadvantaged and poorest. Reviewers comments: This book is a must read for action researchers of all stripes and experience levels. Ortrun Zuber-Skerritt, a principal architect of ALAR who has pushed the boundaries of AR conceptually and methodologically, has now created a unique book built out of orchestrated interviews that provide us with much insight into who she is, why and how to learn from her, and invitation to collaborate in further developing our practice for the benefit of everyone. Publishing from your Doctoral Research - Janet Salmons 2019-12-20 The 'Insider Guides to Success in Academia' offers support and practical advice to doctoral students and early-career researchers. Covering the topics that really matter, but which often get overlooked, this indispensable series provides practical and realistic guidance to address many of the needs and challenges of trying to operate, and remain, in academia. These neat pocket guides fill specific and significant gaps in current literature. Each book offers insider perspectives on the often implicit rules of the game – the things you need to know but usually aren't told by institutional postgraduate support, researcher development units, or supervisors – and will address a practical topic that is key to career progression. They are essential reading for doctoral students, early-career researchers, supervisors, mentors, or anyone looking to launch or maintain their career in academia. Today's researchers have many opportunities for disseminating their work, including traditional and digital publications, written articles, podcasts and other media such as zines and graphic books. But how do they decide which output is right for them, and where to start? Publishing from your Doctoral Research provides methods and tools to help assess, identify, and adapt academic work for publication to support career aspirations. Discussing what publication can achieve in career terms, this book: Explains how to audit doctoral research, and any associated materials, to assess which elements are best suited for publication Provides advice on how to determine what kind of publication is best suited to different types of research Discusses journal articles, books, self-publishing, online and social media options, and alternative methods of publishing Considers each type of publication in light of career aspirations Each chapter includes practical examples, tailored to researchers interested in working in academia, industry or business, a clinical or practical career, or self-employment. Providing key strategy and insight to secure knowledge and success, Publishing from your Doctoral Research is the ideal guide for anyone looking to develop their career through publication within or outside of academia.

Handbook of Research on Modern Educational Technologies, Applications, and Management - Khosrow-Pour D.B.A., Mehdi 2020-07-10 As technology and technological advancements become a more prevalent and essential aspect of daily and business life, educational institutions must keep pace in order to maintain relevance and retain their ability to adequately prepare students for their lives beyond education. Such institutions and their leaders are seeking relevant strategies for the implementation and effective use of new and upcoming technologies and leadership strategies to best serve students and educators within educational settings. As traditional education methods become more outdated, strategies to supplement and bolster them through technology and effective management become essential to the success of institutions and programs. The Handbook of Research on Modern Educational Technologies, Applications, and Management is an all-encompassing two-volume scholarly reference comprised of 58 original and previously unpublished research articles that provide cutting-edge, multidisciplinary research and expert insights on advancing technologies used in educational settings as well as current strategies for administrative and leadership roles in education. Covering a wide range of topics including but not limited to community engagement, educational games, data management, and mobile learning, this publication provides insights into technological advancements with educational applications and examines forthcoming implementation strategies. These strategies are ideal for teachers, instructional designers, curriculum developers, educational software developers, and information technology specialists looking to promote effective learning in the classroom through cutting-edge learning technologies, new learning theories, and successful leadership tactics. Administrators, educational leaders, educational policymakers, and other education professionals will also benefit from this publication by utilizing the extensive research on managing educational institutions and providing valuable training and professional development initiatives as well as implementing the latest administrative technologies. Additionally, academicians, researchers, and students in areas that include but are not limited to educational technology, academic leadership, mentorship, learning environments, and educational support systems will benefit

from the extensive research compiled within this publication.

Developing Research Proposals - Pam Denicolo 2012-01-20 Writing a research proposal is one of the most important tasks facing academics, researchers and postgraduate students. Yet there is a good deal of misinformation and a great lack of guidance about what constitutes a good research proposal and what can be done to maximise one's chances of writing a successful research proposal. Denicolo and Becker recognise the importance of developing an effective research proposal for gaining either a place on a research degree programme or funding to support research projects and set out to explore the main factors that that proposal writers need to attend to in developing successful proposals of their own. Developing Research Proposals will help readers to understand the context within which their proposal will be read, what the reviewers are looking for and will be influenced by, while also supporting the development of relevant skills through advice and practical activities. This book: Explores the nature and purpose of different kinds of proposals Focuses on the actual research proposed Discusses how best to carry out and structure the literature review Examines the posing and phrasing of research questions and hypotheses Looks at how methods and methodology should be handled in a proposal Discusses the crucial issues of planning, strategy and timing in developing targeted proposals Denicolo and Becker draw together the key elements in the process of preparing and submitting a proposal and concludes with advice on responding to the results, successful or not, and their relevance to future proposals. The Success in Research series, from Cindy Becker and Pam Denicolo, provides short, authoritative and accessible guides on key areas of professional and research development. Avoiding jargon and cutting to the chase of what you really need to know, these practical and supportive books cover a range of areas from presenting research to achieving impact, and from publishing journal articles to developing proposals. They are essential reading for any student or researcher interested in developing their skills and broadening their professional and methodological knowledge in an academic context.

The Great Facilitator - Barry J. Babin 2019-03-18 This commemorative volume honors the contributions of Prof. Joseph F. Hair, Jr., who through his writings, leadership and mentoring has had a profound influence on marketing and other fields of business research. He is widely known for sidestepping mathematically complex ways of teaching statistical approaches with an eye toward making the tools accessible to the average behavioral researcher. Joe is also a bona fide researcher whose work has had a massive impact on marketing and business research in general. The book provides revealing insights on his works and acknowledges his role as an outstanding teacher and mentor who has shaped generations of researchers.

Design-based Research - Sasha A. Barab 2016-02-04 Over a decade ago the concept of "design experiments" was introduced because of the belief that many of questions could not be adequately addressed by laboratory-based experiments. Since then, design-based research as a term has grown in popularity and significance. The core manuscripts of this special issue respond to the questions: What constitutes design-based research? Why is it important? What are the methods to carry it out? At the end of this issue, two strong commentaries situate this work and challenge the community with new questions and issues that must be answered if design-based research is going to help advance work in ways that others judge as worthwhile and significant.
