and people management in the private sector. In these fields, organizations have increasingly adopted private-sector management techniques, such as standardized and quantitative measures of performance and an obsession with cost reductions and efficiency. These practices of "new public management" are changing the ways in which front-line workers engage with their clients, students, or patients. Using research drawn from Canada, the United States, Australia, and Denmark, the contributors expose how standardized managerial requirements are created and applied, and how they affect the practicalities of working with people whose lives and experiences are complex and unique.

In this enlightening book Emanuel Camilleri examines the key factors bearing on perceived success or failure. This book is not just about project management, it goes much deeper into the topic of project success by prescribing a project success framework. In chapters dedicated to factors such as leadership, teams, communication, information management and risk management, the author shines a light on the key behaviours in which project managers and others engage and how those behaviours predict success or failure. Practising project managers, project board members and sponsors, struggling to manage conflicting stakeholder expectations, complexity and ambiguity, will learn which factors are vital to determining successful outcomes. Lean Higher Education - William K. Balzer 2020-03-03

Lean Higher Education: Increasing the Value and Performance of University Processes, Second Edition (978-0-8153-7909-6, K339047) *Shelving Guide: Business and Management / Higher Education / Lean Implementation* In an environment of diminishing resources, growing enrollment, and increasing expectations of accountability, *Lean Higher Education: Increasing the Value and Performance of University Processes, Second Edition* provides the understanding and the tools required to return education to the consumers it was designed to serve - the students. It supplies a unifying framework for implementing and sustaining a Lean Higher Education (LHE) transformation at any institution, regardless of

size or mission. Using straightforward language, relevant examples, and step-by-step guidelines for introducing Lean interventions, this authoritative resource explains how to involve stakeholders in the delivery of quality every step of the way. The author details a flexible series of steps to help ensure stakeholders understand all critical work processes. He presents a wealth of empirical evidence that highlights successful applications of Lean concepts at major universities and provides proven methods for uncovering and eliminating activities that overburden staff yet contribute little or no added value to stakeholders. Complete with standardized methods for correctly diagnosing workplace problems and implementing appropriate solutions, this valuable reference arms you with the understanding and the tools to effectively balance the needs of all stakeholders. By implementing the Lean practices covered in these pages, your school will be better positioned to provide higher quality education, at reduced costs, with efficient processes that instill pride, maximize value, and respect the long-term interests of your students, faculty, and staff. This second edition contains a substantial update with expanded material and reflects the significant growth of LHE practices in colleges and universities worldwide. Because of advances in best practices, as well as some modest research-based evidence, this second edition includes many enhancements that provide particular value to LHE practitioners and higher education (HE) leaders. Since the initial publication of *Lean Higher Education* in 2010, the challenges of cost and affordability, competition for students and faculty, and calls for efficiency and accountability have only continued to grow, requiring colleges and universities to pursue more radical and transformative change to ensure their success. This new edition provides a model for change based on more than 50 years of application in business and industry and almost 20 years in HE. It provides the information and evidence demanded by HE leadership to understand and embrace LHE as well as best practices processes and tools for implementing LHE in targeted areas or institution-wide. This book provides a conceptual framework for redesigning any university

process, such as admitting students, paying a bill, hiring faculty, or processing a donor gift, in a way that delights the beneficiary of that process, respects the employees who support the process, and reduce the cost of the process.
