A History of the Hussite Revolution - Howard Kaminsky 2004-04-08

The religious reformation in fifteenth century Bohemia was also a social, political, and cultural revolution - the first of the great upheavals that transformed the medieval into the modern world. Beginning with a revival of evangelical pietism among the people of Prague, then coming under the leadership of the Czech intelligentsia of Prague's university, the reform movement reached its highest point under Master John Hus, who fused the fervor of pietism with the systematic political program developed by the English reformer John Wyclif. When Hus passed from the scene by submitting himself to the Council of Constance, leadership of the movement was taken up by the more radical Jakoubek of Stribro - pioneer of what was to become Hussitism's most characteristic practice, lay communion in both kinds (utraquism). At the same time, the propagation of the reform by Jakoubek's disciples among the townsmen and peasantry of the realm balanced the more conservative tendencies of the university masters and the Hussite feudality; by 1417 the Hussite movement was an uneasy coalition of religio-political tendencies ranging from extreme conservatism to Waldensian sectarianism. Out of the interplay among the Hussite parties and their various reactions to the pressures from Pope and Emperor there emerged two main types of reformation - one centered in Prague, the other in Tabor. Both were condemned by the Roman church, but the movement in Prague, less extreme, never ceased to hope for a reversal of that decision. Tabor, on the other hand, went all the way to heresy, schism, and revolution, ending with the form of the autonomous congregational community, organized as a city-state, in 'de facto' secession from the medieval order. Religious reformism, sectarian heresy of every sort, national passions, class hatreds, laicization, and anticlericalism - all the disturbing factors at work in late-medieval Europe came together in the Hussite revolution, which provided examples of virtually every form of change with which Europe would be concerned for the next three centuries.

Inside the Space Ships - George Adamski 2018-03-12

What has happened to George Adamski since he wrote the famous incidents in Flying Saucers Have Landed? Since the memorable November 20, 1952, when he first made personal contact with a man from another world? Since December 13, 1952 when he was able to make photographs within 100 feet of the same saucer that had brought his original visitor? Inside The Space Ships is Adamski's own story of what has happened to him since then. It begins with his first meeting, a few months later, with a second man from another world—his first meeting with one who speaks to him. This second visitor brings him to a Venusian Scout (flying saucer) and this, in turn, brings him to a mother ship. Later lie is conveyed in both a Saturnian Scout and a Saturnian mother ship. Adamski tells us what transpires in these space craft and what the men and women from other worlds have told him. Adamski's photographs of flying saucers, originally published in Flying Saucers Have Landed, have since become world-famous as other witnesses in other parts of the world have succeeded in taking photographs identical with his. Now, however, in Inside The Space Ships, Adamski gives us 16 photographs and illustrations, no longer of Scouts (flying saucers) mostly, but of the great space ships from which they are launched. The main group of these photographs was taken in April, 1955, and neither the photographs nor a description of them has ever been published before.

Through Time and the City - Kristi Cheramie 2020-09-08

Through Time and the City: Notes on Rome offers a new approach to exploring cities. Using Rome as a guide, the book follows familiar sites, geographies, and characters in search of their role within a larger narrative that includes the environmental processes required to generate enough space and material for

the city, the emergent ecologies to which its buildings play host, and the social patterns its various structures help to organize. Through *Time and the City* argues that Rome is made and unmade by an endlessly evolving chorus that has, for better or worse, gained geological legitimacy; that the city absorbs and emits countless artifacts in its search for collective identity; that the city is a platform for the constant staging of negotiations between agents (humans, buildings, plants, animals, pathogens, goods, waste, water) that drive and are driven by the entanglements of climate and culture. This book provides textual and visual frameworks for identifying the material traces, emergent patterns, or speculated futures that expose a city as inseparable from its capacity to change.

Captain Swing - Eric Hobsbawm 2014-08-05

The classic social history of the Great English Agricultural Uprising of 1839 by two of the greatest historians of our age. In our increasingly mechanized age, the Swing revolts are a timely record of the relationship between technological advance, labour and poverty. With the onset of the Industrial Revolution, capitalism swept from the cities into the countryside, and tensions mounted between agricultural workers and employers. From 1830 on, a series of revolts, known as the 'Swing' shook England to its core. Landowners wanting to make their land more profitable started to use machinery to harvest crops, causing widespread misery among rural communities. Captain Swing reveals the background to that upheaval, from its rise to its fall, and shines a light on the people who tried to change the world and save their livelihoods. *Yearbook of Comparative and General Literature* - 1997

Obscurity - Philippe Jaccottet 2022-08-05

The story of an intense encounter between two men who were once very close and now must grapple with the fractured ideals that separate them. After several years abroad, a young man returns to his hometown to seek the man he calls master. This master, a brilliant philosopher, had made the young man into a disciple before sending him out into the world to put his teachings into practice. Returning three years later, the disciple finds his master has abandoned his wife and child and moved into a squalid one-room flat, cutting himself off completely from his former life. Disillusioned and reeling from the discovery, the young man spends an entire night listening to his master's bitter denunciation of the ideals they once shared. Written in 1960 during Jaccottet's period of poetic paralysis, the novel seeks to harmonize the best and worst of human nature--reconciling despair, falsehood, and lethargy of spirit with the need to remain open to beauty, truth, and the essential goodness of humankind. Translated by Tess Lewis, *Obscurity* is

Jaccottet's only work of fiction, one that will introduce new readers to the multifaceted skills of this major poet.

The Influence of Prophecy in the Later Middle Ages - Marjorie Reeves 1969

Joachim of Fiore proclaimed a philosophy of history which exercised a powerful influence in succeeding centuries. This book traces the influence of his prophecies concerning a Third Age of the Spirit to come, as later expressed in the themes of New Spiritual Men, Last World Emperor, Angelic Pope, and Renovatio Mundi. It shows that these ideas were not only the mainspring of various heterodox groups, but also engaged the attention of certain church leaders, university scholars, Renaissance thinkers, Protestant theologians, and political rulers down to the seventeenth century.
