Bridging the fields of conservation, art history, and

museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators

worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam.

Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of

painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

*Human Resources Management for Public and Nonprofit Organizations* - Joan E. Pynes 2004-07-29

In this thoroughly revised and updated second edition of *Human Resources Management for Public and Nonprofit Organizations*, Joan E. Pynes--a respected authority in public administration--demonstrates how strategic human resources management is essential for proactively managing change in an environment of tighter budgets, competition from private organizations, the need to maintain and train a more diverse workforce, and job obsolescence brought about by

shifts in technology. Complete with a free online instructor's manual, this new edition offers current compensation and budgetary guidance and helps practitioners navigate the newest legal and technological challenges and opportunities in human resource management. **The New Reference Atlas of the World** - C.S. Brief Encounters with Che Guevara - Ben Fountain 2009-10-13

maelstrom of political and social upheaval surrounding them. In "Near-Extinct Birds of the Central Cordillera," an ornithologist being held hostage in the Colombian rain forest finds that he respects his captors for their commitment to a cause, until he realizes that the Revolution looks a lot like big business. In "The Good Ones Are Already Taken," the wife of a Special Forces officer battles a Haitian voodoo goddess with whom her husband is carrying on a not-entirely-spiritual relationship. And in "The Lion's Mouth," a disillusioned aid worker makes a Faustian bargain to become a diamond smuggler for the greater good. With masterful pacing and a robust sense of the absurd, each story in *Brief Encounters with Che Guevara* is a self-contained adventure, steeped in the heady mix of tragedy and danger, excitement and hope, that characterizes countries in transition. Through Fountain's rounded and novelistic prose, these intelligent and keenly observed stories are painted in

provocative and vibrant detail across a global canvas. *Brief Encounters with Che Guevara* marks the arrival of a striking and resonant new voice that speaks adeptly to the intimate connection between the foreign, the familiar, and the inescapably human.

*Ptolemy's Almagest* is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the

### **Assessing and Responding to the Growth of Computer Science Undergraduate**

**Enrollments** - National Academies of Sciences, Engineering, and Medicine  
2018-04-28

The field of computer science (CS) is currently experiencing a surge in undergraduate degree production and course enrollments, which is straining program resources at many institutions and causing concern among faculty and administrators about how best to respond to the rapidly growing demand. There is also significant interest about what this growth will mean for the future of CS programs, the role of computer science in academic institutions, the field as a whole, and U.S. society more broadly. Assessing and Responding to the Growth of

Computer Science Undergraduate Enrollments seeks to provide a better understanding of the current trends in computing enrollments in the context of past trends. It examines drivers of the current enrollment surge, relationships between the surge and current and potential gains in diversity in the field, and the potential impacts of responses to the increased demand for computing in higher education, and it considers the likely effects of those responses on students, faculty, and institutions. This report provides recommendations for what institutions of higher education, government agencies, and the private sector can do to respond to the surge and plan for a strong and sustainable future for the field of CS in general, the health of the institutions of higher education, and the prosperity of the nation.

Autisme et Approche  
Comportementale "Cachun son  
tour" - Laurence et Vincent  
Lecot 2017-09-04

Nos enfants autistes sont des êtres doués d'une sensibilité exceptionnelle. La compréhension différente qu'ils ont de la vie, est à même d'apporter une immense richesse à notre. Je suis la maman d'un enfant TSA et à travers ce livre je vous propose le parcours d'un petit garçon autiste avec des exemples de solutions adaptées pour

atteindre un unique objectif : amener l'enfant autiste vers sa propre autonomie. C'est possible ! Les solutions existent selon différentes approches et notamment l'approche comportementale ABA. Je partage, ici, mes recherches personnelles et mes connaissances sur ce sujet. Je joins également des témoignages d'enseignants, d'intervenants ainsi que de parents d'enfants autistes à travers la France et à travers différents pays avec qui j'ai pu échanger sur les problèmes liés à l'autisme mais aussi sur les réussites. L'inclusion naturelle et l'adaptation à l'autre ne doivent pas stigmatiser nos enfants. L'inclusion, osons la vivre ! Leur place est parmi nous.
