Sutasoma - Tantular (Mpu.) 2008

The 14th century Javanese epic poem, Sutasoma, relates the life of a prince, born an incarnation of the Jina-Buddha Wairocana. It follows his spiritual journey to enlightenment and his temporal journey through marriage, kingship and eventual victory over the mighty, world-threatening demon, Porusada. Kate O'Brien's new translation delivers to the reader a highly approachable and lively

rendition of this Buddhist epic, comparable in both complexity and scale to that of the Ramayana, yet significantly less known or understood.

Evaluating Art - George Dickie 1989-11-02

"Those who think they know George Dickie's views should be sure to read this book. They are in for some interesting surprises. Of course, those unfamiliar with Dickie's views will also learn a lot." --Anita Silvers, San Francisco State University In this book George Dickie presents a theory about how to judge a work of art--as opposed to a theory that explains why a particular work is defined as art. Focusing mainly on the writings of Monroe Beardsley and critically examining the views of seven other philosophers and art critics--Paul Ziff, Frank Sibley, Nelson Goodman, Nicholas Wolterstorff, David Hume, Bruce Vermazen, and J.

O. Urmson--Dickie synthesizes their insights to discover what can be derived from their theories. On this basis, he attempts to work out a theory of art evaluation--the first such book on this topic by a contemporary philosopher. Initially, the author outlines all possible theories of art evaluation, assuming that traditional evaluative notions are used. He identifies seven theory-types that fall under four general headings: imitation value theory, objective intrinsic value theories, subjective intrinsic value theory, and instrumental value theories. Dickie then discusses the historical development of the theory of art evaluation, examining the ways in which eighteenth- and nineteenth-century philosophers treated representation and other cognitive dimensions of art as artistic values. His thorough analysis of the work of other contemporary theorists argues for a theory of art evaluation derived from various strands of thought.

Heritage Tourism

Destinations - Maria D

Alvarez 2016-05-27

Heritage tourism is tied to myth making and stories; creative content that can be shared, stored, combined and manipulated, but that depends on a unique cultural or natural history. A significant section of the wider phenomenon that is cultural tourism, heritage tourism is a demand-driven industry that continues to be a subject of heated debate in academic circles. Beginning with an overview of the subject, this book considers the conservation and revitalization of heritage destinations, as well as the role local communities have in supporting an attraction. It then discusses product development and communication around the world, using new techniques such as social media and examples from food tourism and sporting events, before a final section reviews the planning and institutionalisation of heritage spaces. A valuable addition to the literature, this book is the first to bridge the gap between theory and practice, including the latest research and international case studies for researchers and practitioners in tourism and destination management.

The Thousand and One Nights - M. S. Mahdi 1995

Almost three centuries have passed since the oldest manuscript of "The Thousand and One Nights" arrived in Europe. Since then, the "Nights" have occupied the minds of scholars world-wide, in particular the questions of origin, composition, language and literary form. In this book, Muhsin Mahdi, whose critical edition of the text brought so much praise, explores the complex literary history of the "Nights," bringing to fruition the search for the archetype that constituted the core of the surviving editions, and treating the fascinating story of the growth of the collection of stories that we now know as "The Thousand and One Nights,"

collision course? From the Ayatollah Khomeini to Saddam Hussein, the image of Islam as a militant, expansionist, and rabidly anti-American religion has gripped the minds of Western governments and media. But these perceptions, John L. Esposito writes, stem from a long history of mutual distrust, criticism, and condemnation, and are far too simplistic to help us understand one of the most important political issues of our time. In this new edition of *The Islamic Threat: Myth or Reality?*, Esposito places the challenge of Islam in critical perspective. Exploring the vitality of this religion as a global force and the history of its relations with the West, Esposito demonstrates the diversity of the Islamic resurgence--and the mistakes our analysts make in assuming a hostile, monolithic Islam. This third edition has been expanded to include new material on current affairs in Turkey, Afghanistan, Palestine, and Southeast Asia, as well as a discussion of international

terrorism.

author of *The 7 Habits of Highly Effective People*. Covey, named one of Time magazine's 25 Most Influential Americans, is a renowned authority on leadership, whose insightful advice has helped millions. In his follow-up to *The 7 Habits of Highly Effective People*, he poses these fundamental questions: How do we as individuals and organizations survive and thrive amid tremendous change? Why are efforts to improve falling so short in real results? How do we unleash the creativity, talent, and energy within ourselves and others? Is it realistic to believe that balance among personal and professional life is possible? The key to dealing with the challenges that we face is to identify a principle-centered core within ourselves and our institutions. In *Principle-Centered Leadership*, Covey outlines a long-term, inside-out approach to developing people and organizations. Offering insights and guidelines on how to apply these principles both at work and at home, Covey

posits that these steps will lead not only to an increase in productivity and quality of work, but also to a new appreciation of personal and professional relationships as we strive to enjoy a more balanced, rewarding, and ultimately more effective life. "There seems to be no limit to the number of writers offering answers to the great perplexities of life. Covey, however, is the North Star in this field . . . without hesitation, strongly recommended." —Library Journal

The Bronze-Iron Age of Indonesia - H.R. Heekeren
2013-11-11

The art of metal casting was imported into Indonesia, but its peoples mastered the secrets of metallurgy, and applied these, in ways often original and unique, to create their own distinctive civilisation of the Bronze-Iron Age. In this handbook, which is a sequel to my *The Stone Age of Indonesia*, I have endeavoured to assemble a comprehensive picture of the Indonesian Bronze-Iron Age from the results of excavations, innumerable stray finds in museums, and various studies scattered among numerous scientific journals and periodicals (often difficult to obtain). The resulting picture can, of course, be a tentative one only, valid until many more scientific excavations have taken place. I have added a bibliography, as complete as it was possible to assemble. The completion of this summary of

the Prehistory of Indonesia has been assisted by a grant-in-aid from the Wenner Gren Foundation "The Viking Fund", New York. I am grateful to Mr. Basoeki and Mr. Soebokastowo for the drawings of Figures 1, 11, 12, 13, 22 and 16, 23, 24, 25 respectively. Figures 2-10 and 15 were drawn by the well-known artist, the late Mas Pirngadie, and are here published for the first time, with the generous permission of the Board of Directors of the "Bataviaasch Genootschap van Kunsten en Wetenschappen", Djakarta. I am deeply grateful to my brother-in-law, Mr. J. H. Reiseger of Kempston, Bedfordshire, for so willingly undertaking the translation of the Dutch text into English.

The Social Production of Art -

Janet Wolff 1981

Pantun mélayu - Richard James Wilkinson 1914

Law, Religion and Tradition - Jessica Giles 2018-09-27

This book explores different theories of law, religion, and tradition, from both a secular and a religious perspective. It reflects on how tradition and change can affect religious and secular legal reasoning, identifying the patterns of legal evolution within religious and secular traditions. It is often taken for granted that, even in law, change corresponds and correlates to progress - that things ought to be changed and they will necessarily get better. There is no doubt that legal changes over the centuries have made it possible to enhance the protection of individual rights and to somewhat contain the possibility of tyranny and despotism. But progress is not everything in law: stability and certainty lie at the core of the rule of law. Similarly, religions and religious laws could not

survive without traditions; and yet, they still evolve, and their evolution is often intermingled with secular law. The book asks (and in some ways answers) the questions: What is the role of tradition within religions and religious laws? What is the impact of religious traditions on secular laws, and vice-versa? How are the elements of tradition to be identified? Are they the same within the secular and the religious realm? Do secular law and religious law follow comparable patterns of change? Do their levels of resilience differ significantly? How does the history of religion and law affect changes within religious traditions and legal systems? The overall focus of the book addresses the extent to which tradition plays a role in shaping and re-shaping secular and religious laws, as well as their mutual boundaries.

The Measurement of Modernism - Joseph A. Kahl
2014-11-06

One of the most interesting questions that can be raised about the twentieth century world concerns the degree to which industrialization created a common culture for all peoples. Reported here are the results of an empirical investigation designed to produce instruments to measure those personal values that have been central variables in the theory of modernization of societies. The purpose of Joseph Kahl's research is primarily methodological: to advance the description and measurement of those value orientations used by men to organize their occupational careers. It seeks to delineate and measure a set of values that represents a "modern" view of work and life. The working laboratory was Brazil and Mexico, two

countries undergoing rapid industrialization. More than six hundred men in Brazil and more than seven hundred in Mexico responded to questionnaires. In addition, over twenty-five men in each country were asked to sit beside a tape recorder and talk freely of their worldviews. The respondents were divided between inhabitants of the cities of Rio de Janeiro and Mexico City and those who lived in provincial towns of fewer than ten thousand inhabitants. The samples included manual and nonmanual employees. The results showed that the main variable predicting whether or not a man would tend toward modernism was his social-class position. Middle-class men were much more modern in outlook than working-class men. Residence in a metropolis rather than in a small town also increased modernism, though to a lesser extent. Differences between Brazil and Mexico (and, indeed, the United States) were found to be surprisingly small, of

considerably less weight than position in the social structure in predicting value orientations. The author addresses himself primarily to sociologists and their students who are themselves studying aspects of socio-economic development. His findings, however, cannot fail to be of interest and benefit to social scientists of various disciplines and to all who are concerned with the process of development—planners at the national and local levels, demographers, and businesspeople.

The Creative Economy - John Howkins 2002-06-27

Britain makes more money from music than from its car industry. In the United States the core copyright industries achieved foreign sales and exports of \$60.18 billion - a figure which surpasses, for the first time, every other export sector, including automobiles, agriculture and aircraft. Howkins sets out to explore how we can harness creativity and the industry it sustains to our common interests. This book is not about information and the information society. It is about more basic matters, what we humans want and what we are good at.
