Kurt Baschwitz - Jaap van Ginneken
2017-12-15

Kurt Baschwitz (1886-1968) had a lifelong fascination for 'the riddle of the mass' in both its visible and invisible forms. He was a major pioneer of communication and media studies on the European continent, an early student of the social, political, and mass psychology of crowds, publics, audiences, and public opinion, as well as a versatile social historian. Half a century after his death, however, he risks being forgotten and misunderstood, falling through the cracks of history.

Theories and Origins of the Modern Police - Clive Emsley 2017-07-05

This volume is the first of four that will provide some of the most significant, English-language articles on the historical development of the police institution. The articles included in this volume are broadly of two kinds. The first introduce some of the theoretical outlines that have been suggested for the origins and development of modern police institutions across Europe. The second explore the systems of enforcement, and the criticisms of them, that had emerged on the eve of the revolutionary upheavals which convulsed Europe and inflicted a terminal blow to the ancien rme at the close of the eighteenth century.

Ages of Anxiety - William S. Bush 2018-07-31
Six compelling histories of youth crime in the twentieth century Ages of Anxiety presents six case studies of juvenile justice policy in the twentieth century from around the world, adding context to the urgent and international conversation about youth, crime, and justice. By focusing on magistrates, social workers, probation and police officers, and youth themselves, editors William S. Bush and David S. Tanenhaus highlight the role of ordinary people as meaningful and consequential historical actors. After providing an international

perspective on the social history of ideas about how children are different from adults, the contributors explain why those differences should matter for the administration of justice. They examine how reformers used the idea of modernization to build and legitimize juvenile justice systems in Europe and Mexico, and present histories of policing and punishing youth crime. *Ages of Anxiety* introduces a new theoretical model for interpreting historical research to demonstrate the usefulness of social histories of children and youth for policy analysis and decision-making in the twenty-first century. Shedding new light on the substantive aims of the juvenile court, the book is a historically informed perspective on the critical topic of youth, crime, and justice.

[Ending the French Revolution](#) - Howard G. Brown 2006

"Filled with critical insights, Brown's revisionist study utilizes an impressive array of archival sources, some only recently cataloged, to support his thesis that the French Revolution survived until 1802 and the Consulate regime.... This volume should be a priority for all historians and serious students interested in modern French history. Summing Up: Essential."--Choice "What Brown has done is to put all historians of the French Revolution in his debt by the thoroughness with which he explores an important aspect of the complex and interrelated problems posed by any attempt to create a new social and moral order based on principles that could prove to be self-contradictory and were neither understood nor welcomed by a substantial proportion of the population."--English Historical Review "This is one of the most important pieces of scholarship on the French Revolution since the 1989 bicentennial."--David Bell, Johns Hopkins University For two centuries, the early years of the French Revolution have inspired countless democratic movements around the world. Yet little attention has been paid to the problems of violence, justice, and repression between the Reign of Terror and the dictatorship of Napoleon Bonaparte. In *Ending the French Revolution*, Howard Brown analyzes these years to reveal the true difficulty of founding a liberal democracy in the midst of continual warfare, repeated coups d'état, and endemic civil strife.

By highlighting the role played by violence and fear in generating illiberal politics, Brown speaks to the struggles facing democracy in our own age. The result is a fundamentally new understanding of the French Revolution's disappointing outcome. Howard G. Brown, Professor of History at Binghamton University, State University of New York, is the author of *War, Revolution, and the Bureaucratic State: Politics and Army Administration in France, 1791-1799* and coeditor of *Taking Liberties: Problems of a New Order from the French Revolution to Napoleon*. Winner of the American Historical Association's 2006 Leo Gershoy Award and the University of Virginia's 2004 Walker Cowen Memorial Prize for an outstanding work of scholarship in eighteenth-century studies [The Civilising Offensive](#) - Christoph De Spiegeleer 2018-12-03

"This volume offers a multifaceted selection of studies on 19th-century Belgian reformers and initiatives they instigated to solve the 'social question' by 'civilising' and moralising the lower classes. Around 1850 Belgium was continental Europe's most heavily industrialised state. From the mid-century until the Belle Époque many international social reform associations were based in Belgium, as well as their main international actors. This book aims to place the history of social, moral and educational reform in Belgium during the long 19th century within a broader European perspective. This collection of contributions by both young and established scholars from various disciplinary backgrounds not only fills some gaps in Belgian historiography, but also offers a better understanding of broad epochal processes such as the bourgeois civilising offensive, the expansion of educational action and the historical growth of welfare states.

[Major Companies of Europe 2000](#) - Gale Group 1999-10

This established directory has been thoroughly revised, updated and expanded to provide current and comprehensive information on more than 24,000 of Europe's largest companies. Four volumes are filled with facts and contacts for major public and private companies in all 20 countries of Western Europe.

[The International Corporate 1000](#) - R. Whiteside 2012-12-06

The International Corporate 1000 represents a joint venture between Monitor Publishing Company of Washington, DC, and Graham & Trotman Limited of London. Monitor Publishing Company is well known as the publisher of The Federal Yellow Book, The Congressional Yellow Book, and The Corporate 1000. Graham & Trotman's annual directories providing data on the major companies in many parts of the world are equally established. The two publishing companies have pooled their expertise in this joint venture to research, compile and publish The International Corporate 1000, A Directory of/Who Runs The World's 1000 Leading Corporations. The directory was designed to help you identify and contact the senior executives who lead and manage these companies. Accordingly, you will find extensive, valuable detail about who does what, and how to reach them, but you will find little financial or statistical data. We have designed the book in this way because we believe there is a great need for an accurate and current executive directory, whereas a wealth of financial data is already available from many different sources. The organization of the directory is by key geographical region, then by major country within each region, and then alphabetically by company within each country.

The Unknown Dead - Peter Schrijvers
2005-04-08

Telling the harrowing stories of noncombatants caught up in the maelstrom of war, The Unknown Dead surveys this crucial battle and its consequences from an entirely new perspective. Peter Schrijvers, a native Belgian, describes in detail the horrific war crimes committed by German military units on the front lines and by Nazi security services behind the battle lines. He also reveals the devastating effects of Allied responses to the enemy threat, including incessant artillery barrages and massive bombings of small towns.

Between the Living and the Dead - Eva Pocs
1999-01-01

The author, one of the most highly respected scholars of historical anthropology, has undertaken extensive research on folk beliefs related to communication with the supernatural sphere. In this book, she examines the systems of such communication known by early modern

Hungarians, and the role these systems played in the everyday life of the village. New types of mediators are identified such as "the neighborhood witch," the healing witch, and the demons seen in dreams. Representing a major contribution to the most up-to-date international research, Eva Pocs draws on significant East European material and literature not previously coordinated with that from the West. In so doing, she makes a valuable contribution to a subject that has recently attracted the attention of several leading scholars.

Grimoires - Owen Davies 2010-09-23

What is a grimoire? The word has a familiar ring to many people, particularly as a consequence of such popular television dramas as Buffy the Vampire Slayer and Charmed. But few people are sure exactly what it means. Put simply, grimoires are books of spells that were first recorded in the Ancient Middle East and which have developed and spread across much of the Western Hemisphere and beyond over the ensuing millennia. At their most benign, they contain charms and remedies for natural and supernatural ailments and advice on contacting spirits to help find treasures and protect from evil. But at their most sinister they provide instructions on how to manipulate people for corrupt purposes and, worst of all, to call up and make a pact with the Devil. Both types have proven remarkably resilient and adaptable and retain much of their relevance and fascination to this day. But the grimoire represents much more than just magic. To understand the history of grimoires is to understand the spread of Christianity, the development of early science, the cultural influence of the print revolution, the growth of literacy, the impact of colonialism, and the expansion of western cultures across the oceans. As this book richly demonstrates, the history of grimoires illuminates many of the most important developments in European history over the last two thousand years.

Shaping the Transnational Sphere - Davide Rodogno 2014-12-01

In the second half of the nineteenth century a new kind of social and cultural actor came to the fore: the expert. During this period complex processes of modernization, industrialization, urbanization, and nation-building gained pace, particularly in Western Europe and North America. These processes created new forms of specialized expertise that grew in demand and became indispensable in fields like sanitation, incarceration, urban planning, and education. Often the expertise needed stemmed from problems at a local or regional level, but many transcended nation-state borders. Experts helped shape a new transnational sphere by creating communities that crossed borders and languages, sharing knowledge and resources through those new communities, and by participating in special events such as congresses and world fairs.

Inclusive Legal Positivism - Wilfrid J. Waluchow 1994

This book develops a general theory of law, inclusive legal positivism, which seeks to remain within the tradition represented by authors such as Austin, Hart, MacCormick, and Raz, while sharing some of the virtues of both classical and modern theories of natural law, as represented by authors such as Aquinas, Fuller, Finnis, and Dworkin. Its central theoretical questions are: Does the existence or content of positive law ever depend on moral considerations? If so, is this fact consistent with legal positivism? The author shows how inclusive positivism allows one to answer yes to both of these questions. In addition to articulating and defending his own version of legal positivism, which is a refinement and development of the views of H.L.A. Hart as expressed in his classic book *The Concept of Law*, the author clarifies the terms of current jurisprudential debates about the nature of law.

These debates are often clouded by failures to appreciate that different theorists are offering differing kinds of theories and attempting to answer different questions. There is also a failure, principally on the part of Ronald Dworkin, to characterize opposing theories correctly. The clarity of Waluchow's work will help to remove the confusion which has hitherto marred some jurisprudential debate, particularly about Dworkin's work.

Red Data Book of the Flowering Plants of Cameroon - Jean-Michel Onana 2011

This is tropical Africa's first Red Data book for plants. Cameroon contains tropical Africa's most species-diverse hotspots for plants; many are rare and threatened with extinction. In the book 815 species are documented as being threatened using IUCN global assessments, most being assessed for the first time. Short species descriptions to aid identification in the field are given, as well as notes on habitats and threats, together with distribution maps and management suggestions to assist better conservation.

The English Police - Clive Emsley 2014-09-19

A comprehensive history of policing from the eighteenth century onwards, which draws on largely unused police archives. Clive Emsley addresses all the major issues of debate; he explores the impact of legislation and policy at both national and local levels, and considers the claim that the English police were non-political and free from political control. In the final section, he looks at the changing experience of police life. Established as a standard introduction to the subject on its first appearance, the Second Edition has been substantially revised and is now published under the Longman imprint for the first time.

Rigorous Numerics in Dynamics - Jan Bouwe van den Berg 2018-07-12

This volume is based on lectures delivered at the 2016 AMS Short Course "Rigorous Numerics in Dynamics", held January 4-5, 2016, in Seattle, Washington. Nonlinear dynamics shapes the world around us, from the harmonious movements of celestial bodies, via the swirling motions in fluid flows, to the complicated biochemistry in the living cell. Mathematically these phenomena are modeled by nonlinear dynamical systems, in the form of ODEs, PDEs and delay equations. The presence of nonlinearities complicates the analysis, and the difficulties are even greater for PDEs and delay equations, which are naturally defined on infinite dimensional function spaces. With the availability of powerful computers and

sophisticated software, numerical simulations have quickly become the primary tool to study the models. However, while the pace of progress increases, one may ask: just how reliable are our computations? Even for finite dimensional ODEs, this question naturally arises if the system under study is chaotic, as small differences in initial conditions (such as those due to rounding errors in numerical computations) yield wildly diverging outcomes. These issues have motivated the development of the field of rigorous numerics in dynamics, which draws inspiration from ideas in scientific computing, numerical analysis and approximation theory. The articles included in this volume present novel techniques for the rigorous study of the dynamics of maps via the Conley-index theory; periodic orbits of delay differential equations via continuation methods; invariant manifolds and connecting orbits; the dynamics of models with unknown nonlinearities; and bifurcations diagrams.

Soldiers, Citizens and Civilians - A. Forrest 2008-11-27

The Revolutionary and Napoleonic Wars affected millions of people's lives across Europe and beyond. Yet the extent to which the constant warfare of the period 1792-1815 shaped everyday experience has been little studied. This volume of essays discusses the formative experience of these wars for men and women, as soldiers, citizens and civilians.

Children's Rights: Progress and Perspectives - Michael D. A. Freeman 2011-10-28

The International Journal of Children's Rights has been a major player in all this. Its impact is worldwide. It has established itself as the leading journal in the field. The journal is now in its 19th year, and is flourishing. This volume has been compiled not only to commemorate the journal's work, but also the 20th anniversary of the Convention coming into operation, and of the first World Summit on Children. An anthology of the best articles published in these formative years, this volume offers a representative sample of what the journal has achieved. Some of the articles are ones which are frequently cited, whilst others are less well known; some deal with theory, others with practice. The case for children's rights is to be found throughout this

collection, as is the history of children's rights.

Man as Witch - R. Schulte 2009-06-25
Witch-hunts in Central Europe were by no means focused only on women; one in four alleged witches was male. This study analyzes and describes the witch trials of men in French and German-speaking regions, opening up a little known chapter of early modern times, and revealing the conflicts from which witch-hunts of men evolved.

Crime and Culture - René Lévy 2017-03-02
Scholarly interest in the history of crime has

grown dramatically in recent years and, because scholars associated with this work have relied on a broad social definition of crime which includes acts that are against the law as well as acts of social banditry and political rebellion, crime history has become a major aspect not only of social history, but also of cultural as well as legal studies. This collection explores how the history of crime provides a way to study time, place and culture. Adopting an international and interdisciplinary perspective to investigate the historical discourses of crime in Europe and the United States from the sixteenth to the late twentieth century, these original works provide new approaches to understanding the meaning of crime in modern western culture and underscore the new importance given to crime and criminal events in historical studies. Written by both well-known historians and younger scholars from across the globe, the essays reveal that there are important continuities in the history of crime and its representations in modern culture, despite particularities of time and place.
