BIG little house - Donna Kacmar 2015-01-09

What are the challenges architects face when designing dwelling spaces of a limited size? And what can these projects tell us about architecture – and architectural principles – in general? In BIG little house, award-winning architect Donna Kacmar introduces twenty real-life examples of small houses. Each project is under 1,000 square feet (100 square meters) in size and, brought together, the designs reveal an attitude towards materiality, light, enclosure and accommodation which is unique to minimal dwellings. While part of a trend to address growing concerns about minimising consumption and lack of affordable housing, the book demonstrates that small dwellings are not always simply the result of budget constraints but constitute a deliberate design strategy in their own right. Highly illustrated and in full-colour throughout,

each example is based on interviews with the original architect and accompanied by detailed floor plans. This ground-breaking, beautifully designed text offers practical guidance to any professional architect or homeowner interested in small scale projects.

The Philosophy of Psychology - George Botterill 1999-08-19

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.
